Regulation And The Revolution In United States Farm Productivity:

Regulation and the Revolution in United States Farm Productivity Sally H. Clarke, 2002-07-25 This book explains how US government activity in the 1930s led to gains in farm productivity **Days on the Family Farm** Carrie A. Meyer, 2013-11-30 From the beginning of the twentieth century to World War II farm wife May Lyford Davis kept a daily chronicle that today offers a window into a way of life that has all but disappeared May and her husband Elmo lived through two decades of prosperity the Great Depression and two World Wars in their Midwestern farming community Like many women of her time Davis kept diaries that captured the everyday events of the family farm she also kept meticulous farming accounts In doing so she left an extraordinary record that reflects not only her own experiences but also the history of early twentieth century American agriculture May and Elmo s story engagingly told by Carrie A Meyer showcases the large scale evolution of agriculture from horses to automobiles and tractors a surprisingly vibrant family and community life and the business of commercial farming Details such as what items were bought and sold what was planted and harvested the temperature and rainfall births and deaths and the direction of the wind are gathered to reveal a rich picture of a world shared by many small farmers With sustainable and small scale farming again on the rise in the United States Days on the Family Farm resonates with both the profound and mundane aspects of rural life past and present in the Midwest

Regulating Agricultural Biotechnology Richard E. Just, Julian M. Alston, David Zilberman, 2006-12-26 This book presents the first thorough economic analysis of current agricultural biotechnology regulation The contributors most of whom are agricultural economists working either in universities or NGOs address issues such as commercial pesticides the costs of approving new products liability benefits consumer acceptance regulation and its impacts transgenic crops social welfare implications and biosafety **Reader's Guide to American History** Peter J. Parish, 2013-06-17 There are so many books on so many aspects of the history of the United States offering such a wide variety of interpretations that students teachers scholars and librarians often need help and advice on how to find what they want The Reader s Guide to American History is designed to meet that need by adopting a new and constructive approach to the appreciation of this rich historiography Each of the 600 entries on topics in political social and economic history describes and evaluates some 6 to 12 books on the topic providing guidance to the reader on everything from broad surveys and interpretive works to specialized monographs The entries are devoted to events and individuals as well as broader themes and are written by a team of well over 200 contributors all scholars of American history **On The Great Plains** Geoff Cunfer, 2005 To support his theory Cunfer looks at the entire Great Plains 450 counties in ten states tapping historical agricultural census data paired with GIS mapping to illuminate land use on the Great Plains over 130 years Coupled with several community and family case studies this database allows Cunfer to reassess the interaction between farmers and nature in the Great Plains agricultural landscape **BOOK JACKET** *A Comprehensive Assessment of the Role of Risk in U.S. Agriculture* Richard E. Just, Rulon D.

Pope,2013-11-11 After all the research on agricultural risk to date the treatment of risk in agricultural research is far from harmonious Many competing risk models have been proposed Some new methodologies are largely untested Some of the leading empirical methodologies in agricultural economic research are poorly suited for problems with aggregate data where risk averse behavior is less likely to be important This book is intended to i define the current state of the literature on agricultural risk research ii provide a critical evaluation of economic risk research on agriculture to date and iii set a research agenda that will meet future needs and prospects This type of research promises to become of increasing importance because agricultural policy in the United States and elsewhere has decidedly shifted from explicit income support objectives to risk related motivations of helping farmers deal with risk Beginning with the 1996 Farm Bill the primary set of policy instruments from U S agriculture has shifted from target prices and set aside acreage to agricultural crop insurance Because this book is intended to have specific implications for U S agricultural policy it has a decidedly domestic scope but clearly many of the issues have application abroad For each of the papers and topics included in this volume individuals have been selected to give the strongest and broadest possible treatment of each facet of the problem The result is this comprehensive reference book on the economics of agricultural risk *Feeding the World* Giovanni Federico,2010-12-16 In the last two centuries agriculture has been an outstanding if somewhat neglected success story Agriculture has fed an ever growing population with an increasing variety of products at falling prices even as it has released a growing number of workers to the rest of the economy This book a comprehensive history of world agriculture during this period explains how these feats were accomplished Feeding the World synthesizes two hundred years of agricultural development throughout the world providing all essential data and extensive references to the literature It covers systematically all the factors that have affected agricultural performance environment accumulation of inputs technical progress institutional change commercialization agricultural policies and more The last chapter discusses the contribution of agriculture to modern economic growth The book is global in its reach and analysis and represents a grand synthesis of an enormous topic

Routledge Handbook of Major Events in Economic History Randall E. Parker,Robert Whaples,2013 This book aims to introduce readers to the important macroeconomic events of the past two hundred years It explains what went on and why during the most significant economic epochs of the nineteenth twentieth and early twenty first centuries and how where we are today fits in this historical timeline **Socialist Optimism** Paul Auerbach,2016-04-08 Paul Auerbach s Socialist Optimism offers an alternative political economy for the twenty first century Present day capitalism has generated growing inequality of income and wealth persistent high levels of unemployment and ever diminishing prospects for young people But in the absence of a positive vision of how society and the economy might develop in the future the present trajectory of capitalism will never be derailed no matter how acute the critique of present day developments The detailed blueprint presented here focuses upon the education and upbringing of children in the context of social equality and household

security It yields a well defined path to human development and liberation as well as democratic control of working life and public affairs Socialism as human development gives a unity and direction to progressive policies that are otherwise seen to be a form of pragmatic tinkering in the context of a pervasive capitalist reality Family Farmers, Land Reforms and Political Action James Simpson,2024-08-27 This book examines how European farmers responded to the economic and political challenges created by the First World War and the Great Depression The difficulties of interwar Europe have been frequently explored but rarely from the perspective of the agricultural sector where two fifths of the population earned their livelihood mostly as small family farmers The traditional literature argues that the landed elites conspired to undermine many of Europe s young democracies after the Great War This book shows instead that by the early 1920s most had either sold their land or seen it confiscated following the widespread land reforms of Eastern Europe leaving the family farm as the dominant unit of production The book advances several theories that place the family farmer at the heart of change and explores why some proved to be enthusiastic supporters of liberal democracy while others preferred political ideologies as diverse as social democracy in Scandinavia or fascism in Germany and Italy It explores the nuanced and evolving links between family farms and government interests showing how this relationship varied in different countries and contexts across Western and Central Europe The book discusses the impact of family farms on agricultural market trends the influence of collective action on government policies and the increasing politicization of farmers and rural populations more broadly The book also sheds light on how agrarian problems and their solutions differed in industrial agrarian and transforming societies in interwar Europe This book will be an illuminating read for scholars of economic history comparative history and European history interested in agriculture and rural communities Eisenhower Louis Galambos,2018-01-20 Part I Getting a grip on Ike Trouble Abilene Locked in Epiphany Tested Part II Becoming supreme Combat The decision Tested again Part III Becoming a leader of the free world Duty honor party Pursuing prosperity 1953 1961 Pursuing peace 1953 1961 The wise man *Ontario's Cattle Kingdom* Margaret Elsinor Derry,2001-01-01 The story of the purebred cattle breeders world includes nineteenth century medical opinions and strategies for disease control the evolution of cattle associations and the development of state regulation **The Challenge of Remaining Innovative** Sally H. Clarke,Naomi R. Lamoreaux,Steven W. Usselman,2009 The contributors explore two main themes the challenge of remaining innovative and the necessity of managing institutional boundaries in doing so The book is organized into four parts which move outward from individual firms to networks or clusters of firms to consultants and other intermediaries in the private economy who operate outside of the firms themselves and finally to government institutions and politics Editor **Liberalism in the Shadow of Totalitarianism** David Ciepley,2006 This book argues that it was primarily the encounter with totalitarianism that dissolved the ideals of American progressivism and crystallized the ideals of postwar liberalism In politics the ideal of governance by a strong independent executive was rejected and a politics of contending interest groups was embraced

Money and Credit Bruce G. Carruthers, Laura Ariovich, 2013-05-03 This book offers a fresh and uniquely sociological perspective on money and credit As basic economic institutions money and credit are easy to overlook when they work well When they malfunction as they did in the new millennium s global financial crisis their importance becomes obvious and demands further investigation Bruce Carruthers and Laura Ariovich examine the social dimensions of money and credit at both the individual and corporate levels from the development of personal credit and a consumer society to the role of government in the creation of money In clear prose they illustrate how the overall future of the economy is governed by the financial system and the flow of capital into and out of firms operating in particular industrial sectors as well as the social meanings money itself acquires and the ways people distinguish between dirty and clean money This accessible and engaging book will be essential reading for upper level students of economic sociology and those interested in how the bills coins and plastic in our pockets shape the world we live in

Lives in Transition Peter Baskerville, Kris Inwood, 2015-01-01 Collective histories and broad social change are informed by the ways in which personal lives unfold *Lives in Transition* examines individual experiences within such collective histories during the nineteenth and twentieth centuries This collection brings together sources from Europe North America and Australia in order to advance the field of quantitative longitudinal historical research The essays examine the lives and movements of various populations over time that were important for Europe and its overseas settlements including the experience of convicts transported to Australia and Scots who moved freely to New Zealand The micro level roots of economic change and social mobility of settler society are analyzed through populations studies of Chicago Montreal as well as rural communities in Canada and the United States Several studies also explore ethnic inequality as experienced by Polish immigrants French Canadians and Aboriginal peoples in Canada *Lives in Transition* demonstrates how the analysis of collective experience through both individual level and large scale data at different moments in history opens up important avenues for social science and historical research Contributors include Luiza Antonie Guelph Peter Baskerville Alberta Kandace Bogaert McMaster John Cranfield Guelph Gordon Darroch York Allegra Fryxell Cambridge Ann Herring McMaster Kris Inwood Guelph Rebecca Kippen Melbourne Rebecca Lenihan Guelph Susan Hautaniemi Leonard Michigan Hamish Maxwell Stewart Tasmania Janet McCalman Melbourne Evan Roberts Minnesota J Andrew Ross Guelph Sherry Olson McGill Ken Sylvester Michigan Jane van Koeverden Waterloo Aaron Van Tassel Western

Atatürk on Screen Enis Dinç, 2020-04-16 Mustafa Kemal Atatürk was not widely known when he led the national resistance movement in Anatolia in 1919 However the effort and attention that his government devoted to the creation of his public image gradually turned him into a superhuman figure in the eyes of many Film played a crucial role in the creation and dissemination of this image and helped Atatürk to advance his project of building a new imagined community of the Turkish nation But despite the impact of film and film making on the political and cultural life of Early Republican Turkey there is almost no research that has analysed this footage *Atatürk on Screen* uncovers various film archives to reveal

the significant albeit paradoxical role of film during this period Enis Din shows that while film making was crucial for the creation of Atatürk's public image and the presentation of Turkey's new modern image to the world it also posed risks as it could be re used re edited and re framed for the purposes of counter propaganda The main analysis in the book is of the film footage itself including rare contemporary cinematic sources which have never received comprehensive analysis before The book also makes use of other primary sources such as letters memoirs newspapers reports newsletters and production files providing readers with a multi layered account of the period

From Buildings and Loans to Bail-Outs David L.

Mason,2004-07-05 For most Americans the savings and loan industry is defined by the fraud ineptitude and failures of the 1980s However these events overshadow a long history in which thrifts played a key role in helping thousands of households buy homes First appearing in the 1830s savings and loans then known as building and loans encourage their working class members to adhere to the principles of thrift and mutual co operation as a way to achieve the American Dream of home ownership This book traces the development of this industry from its origins as a movement of a loosely affiliated collection of institutions into a major element of America's financial markets It also analyses how diverse groups of Americans including women ethnic Americans and African Americans used thrifts to improve their lives and elevate their positions in society Finally the overall historical perspective sheds new light on the events of the 1980s and analyses the efforts to rehabilitate the industry in the 1990s

American Agriculture in the Twentieth Century Bruce L. Gardner,2006-03-31 Looking at U

The Birth of Development Amy L. S. Staples,Amy L. Sayward,2006 A comprehensive examination of economic globalization Focused on the creation and evolution of post 1945 internationalist ideology The Birth of Development highlights efforts to diffuse the destructive role of the nation state in world affairs by constructing truly international organizations with global agendas the World Bank the Food and Agriculture Organization and the World Health Organization These organizations and the men and women who worked for them pioneered the advancement of the quality of life for all and established an ongoing obligation to promote worldwide economic development As author Amy Staples reveals the results of their efforts were mixed Grounded in archival research conducted in the archives of the World Bank Food and Agriculture Organization and World Health Organization as well as in other archives in the United States Canada and Great Britain The Birth of Development provides a foundational understanding for many of today's debates on economic globalization especially those that involve the World Bank and World Trade Organization Given the current role of international peacekeepers and multinational aid agencies this story is timely and makes clear that the issues that confronted early postwar planners and reformers remain in many ways unsolved even today The Birth of Development is the only comparative study of these crucial architects of the theory and practice of economic development and it contributes significantly to the ongoing effort to view the postwar period as more than simply an East

West Cold War It breaks new ground conceptually and methodologically and will be a welcome addition to the literature in the fields of modern diplomatic history and international relations
