However, speakers with nonstandard dialects are perceived as being either unintelligent or less educated and therefore less trustworthy. Furthermore, speakers of non-standard dialects are often the targets of prejudice and discrimination. As a result, many people may avoid speaking in a nonstandard dialect, even in informal contexts. This can lead to a loss of cultural identity and a sense of alienation. Therefore, it is important to recognize and value linguistic diversity and to create an environment where all dialects are accepted and respected.

Abstract: The relative contribution of cognitive, affective, and motivational factors to the quality of these learning experiences for parents with children at risk for emotional and behavioral problems was examined. Parents' perceptions of their children's behavior were also predicted by reading the children's behavior. All participants and experienced researchers completed measures of cognitive, affective, and motivational factors. Results indicated that parents with children at risk for emotional and behavioral problems were more likely to report negative learning experiences than parents with children who were not at risk. Parents with children at risk for emotional and behavioral problems were also more likely to report negative learning experiences than parents with children who were not at risk. Parents with children at risk for emotional and behavioral problems were also more likely to report negative learning experiences than parents with children who were not at risk.

Regulation Of Health Care Professionals:

Health Care Regulation in America Robert I. Field, 2006-11-09 Regulation shapes all aspects of America's fragmented health care industry from the flow of dollars to the communication between physicians and patients. It is the engine that translates public policy into action. While the health and lives of patients as well as almost one sixth of the national economy depend on its effectiveness, health care regulation in America is bewilderingly complex. Government agencies at the federal, state, and local levels direct portions of the industry, but hundreds of private organizations do so as well. Some of these overseers compete with one another, some conflict, and others collaborate. Their interaction is as important to the provision of health care as are the laws and rules they implement. *Health Care Regulation in America* is a guide to this regulatory maze. It succinctly recaps the past and present conflicts that have guided the oversight of each industry segment over the past hundred years and explains the structure of regulation today. To make the system comprehensible, this book also presents the sweep of regulatory policy in the context of the interests, values, goals, and issues that guide it. Chapters cover the process of regulation and each key area of regulatory focus: professionals, institutions, financing, arrangements, drugs, and devices; public health; business relationships; and research. In a uniquely American way, the system thrives on confrontation between competing interests but survives by engendering compromise. Robert Field shows that health care regulation is an inexorable force that nurtures as well as restricts the enterprise of American health care. For the student, practitioner, executive, policy analyst, or concerned citizen, this book is an invaluable guide to the policy, politics, and practice of an industry that directly touches us all.

Regulation of health care professionals Great Britain: Law Commission, 2012-03 In this consultation paper, the Law Commissions of England and Wales, Scotland, and Northern Ireland are seeking views on the regulation of health care professionals in the UK and social workers in England. In their first joint consultation, the Commissions are asking how a new legal framework would give the regulators increased flexibility in the use of their powers while ensuring public accountability, enable them to ensure proper standards of professional education, conduct, and practice, and have at its heart a duty on the regulators to protect the public. It makes provisional proposals which seek to simplify and modernise the law and establish a streamlined, transparent, and responsive system of regulation of health care professionals, and in England only the regulation of social workers.
