Regulation And Market Access:

The Regulation of Services and Intellectual Property Bryan C. Mercurio, 2017-07-05 International rules on trade in services and intellectual property are new additions to the multilateral trading system but both have played an important role in the system since their entry. Accompanied by a detailed introduction, this volume contains essays which cover not only the law and jurisprudence of these topics but also the underlying economics and politics behind their incorporation into the multilateral system and continued prominence. The volume provides readers with a comprehensive overview of the development of these controversial and increasingly important areas of international trade law. **European Free Trade System and Policy Handbook Volume 1 Integration, Policy, Regulations** IBP, Inc., 2017-06-16 EFTA European Free Trade Association Trade and Investment Agreements Handbook Strategic Information and Basic Agreements *Regulatory Autonomy and International Trade in Services* Bregt Natens, 2016-07-27 This book considers how the interplay between multilateral and preferential liberalisation of trade in services increasingly raises concerns both from the perspective of the beneficiaries of such liberalisation whose rights are uncertain and that of regulators whose regulatory autonomy is constrained. The author shows how these concerns lead to vast underutilisation of and strong prejudices against the benefits of services liberalisation. The book meticulously analyses and compares the EU's obligations under the GATS and the services chapters of several RTAs to finally assess the merits of the raised concerns. The Economic Regulation of Airports Peter Forsyth, David W. Gillen, Andreas Knorr, Otto G. Mayer, David Starkie, 2017-09-29 This tour d'horizon book reviews airport regulation and competition in different regions of the world and contrasts different policy perspectives. Organized in four parts, the first three examine in turn Australasia, North America and Europe while the last section looks at the institutional reforms that have taken place in these regions. The book covers the regulation of airports and competition in different regions as well as privatization policy, the interaction between airports and airlines and regional economic impacts. It also examines the linkages between governance structures and forms of regulation. The book's global sweep embraces all the large aviation markets, bringing together the ideas and challenges of academic economists, airlines, airport managers, consultants and government regulators. As well as looking at different methods, degrees and paradigms of regulation, it also spells out the stress points in a way that makes essential reading for airport operators, airline operations staff as well as academic economists concerned with transport studies. It also offers interesting reading and important lessons for those concerned with regulation of the utility industries such as telecommunications, water and power generation and distribution where infrastructure can be subject to natural monopoly characteristics and where firms competing in downstream markets are dependent on the investment and operational strategies of the upstream infrastructure operator. *The Regulation of International Trade* Robert Howse, Antonia Eliason, 2005-08-08 The Regulation of International Trade 2nd Edition introduces the rules and institutions that govern international trade. Critics of globalization claim that economic liberalization leads to a lowering of regulatory standards As capital and corporations move more freely across national boundaries a race to the bottom results as governments are forced to weaken labor and environmental standards to retain current contracts or attract new business The essays in this volume argue that on the contrary under certain circumstances global economic integration can actually lead to the strengthening of consumer and environmental standards This volume extends the argument of David Vogel's book *Trading Up* which discussed environmental standards by focusing on the impact of globalization on labor rights women's rights and capital market regulations

book presents Regulatory Reforms in Italy Dieter Kerwer, 2018-01-18 This title was first published in 2001 The question this thesis attempts to answer is summarized as follows what accounts for the amazing stability of Italian transport policy in the face of European challenges given the fact that as most national and European policy makers readily believe it is not capable of addressing the problem of the sector This study analyzes the transport policy in Italy from the 1990s into the 21st century It looks at how the two sub sectors of surface transport road haulage and railways have been managed by the public and private actors involved In both sectors the policy appears to have failed either by not offering a remedy to problems or by aggravating them further The author believes that studying transport policy in Italy will shed light on the wider question of how national policy making patterns are influenced by developments in the international environment in this case looking closely at the influence of the European Union SEC Docket United States. Autonomous Vehicles and the Law Gilles Pillet, 2025-05-20 The development of autonomous vehicles requires all the countries of the world to adapt their respective legal systems The scale and complexity of the task is daunting The law is called upon to enable and even encourage the advent of this revolution while guaranteeing a fair allocation of the resulting risks and ensuring public safety What's more the law must rise to this challenge at a time when it is impossible to predict in the medium term the speed at which autonomous vehicles will enter circulation or even their degree of autonomy Adapting civil liability law appears to be the key to success Faced with the peculiarities of autonomous vehicles many concepts on which current liability regimes are based will need rethinking For instance the complex manufacturing of driving systems multiplies the number of potential liable parties and the black box effect associated with the operation of learning AI increases the burden of proof in the event of a failure *International Trade in Services and Domestic Regulations* Panagiotis

National Regulation and Trade Liberalization in Services Markus Krajewski, 2003-01-01 Like tariffs and other border measures national regulatory barriers impede international trade Unlike tariffs however such barriers usually indicate an important domestic policy choice This conflict of interest has emerged as a crucial issue in international law particularly with regard to services such as telecommunications and health services This study is the first to analyze the potential impact of incompatibilities between national regulatory regimes and the rules and obligations imposed by the General Agreement on Trade in Services GATS In the process of arriving at his challenging concluding theses the author investigates such relevant concepts as the following the political and ideological dynamics of GATS negotiations services trade liberalization in regional integration systems particularly in EC law policies common to diverse national regulatory systems the notions of deregulation and privatization the human rights implications of international trade law the GATS obligations of market access national treatment and most favoured nation treatment the role of the WTO's dispute settlement organs GATS transparency obligations Professor Krajewski's study is of enormous significance to specialists in regulatory policies and instruments at all national and sectoral levels especially in the

context of ongoing GATS negotiations As the author warns Unless GATS negotiators and national regulators have a thorough understanding of the relationship between GATS obligations and regulatory policies and instruments they cannot effectively use the flexible elements of GATS and could reach an agreement which they may later regret
