Regulatory Bargaining And Public Law:

Regulatory Bargaining and Public Law Jim Rossi, 2005-06-06 This text explores the implications of a bargaining perspective for institutional governance and public law in deregulated industries such as electric power and telecommunications Leading media accounts blame deregulated markets for failures in competitive restructuring policies However the author argues that governmental institutions often influenced by private stakeholders share blame for the defects in deregulated markets The first part of the book explores the minimal role that judicial intervention played for much of the twentieth century in public utility industries and how deregulation presents fresh opportunities and challenges for public law The second part of the book explores the role of public law in a deregulatory environment focusing on the positive and negative incentives it creates for the behavior of private stakeholders and public institutions in a bargaining focused political process

The Politics of Regulation in the UK Daniel Fitzpatrick, 2016-09-30 This book explores the discourse of regulatory crisis in the UK and examines why despite the increasing contestation of the principles underpinning the regulatory state its institutions and practices continue to be firmly embedded within the governance of the British state It considers its implications for our understanding of the contemporary nature of the British state and to the study of regulation which is no longer confined to the domain of low politics populated by technocrats but is scrutinised by elected politicians and the subject of the front pages rather than the financial pages The author sets the British regulatory tradition in a wider context both spatially in terms of the challenges presented by Europeanisation and temporally critically analysing the process of crisis construction in the narratives of neoliberalism and participatory democracy in the contemporary era

The Legitimacy and Responsiveness of Industry Rule-making Karen Lee, 2018-09-06 Rule making is no longer an activity undertaken exclusively by public actors Private actors are increasingly allowed by legislatures and regulatory bodies to take part in and in some cases assume responsibility for the formation of legally binding rules for example in the US UK Australia and the EU Departing from traditional forms of rule making by involving private actors may enhance the ability of regulatory systems to achieve social goals as regulatory scholars argue However because private actors are permitted to act in their own best interests their involvement also raises doubts about the legitimacy of the underlying rule making processes and the rules that are formulated The principal aim of this book is to highlight that the tension between the responsiveness that leading international regulatory scholars advocate in order to improve regulatory effectiveness and the law and its formal substantive procedural and institutional values is not as great as may first appear Drawing on three in depth case studies of the experience of the Australian telecommunications industry with self regulatory rule making a form of rule making that bears the hallmarks of responsive regulation democratic experimentalism smart regulation and other strategies of proceduralization it is argued that industry rule making can as a matter of practice be responsive and legitimate at the same time In doing so the book formulates and applies criteria against which industry rule making should be evaluated and

identifies a number of indicia that point to when industry rule making is likely to be simultaneously legitimate and responsive

Rescuing Regulation Reza R. Dibadj, 2012-02-01 The traditional debate on governmental regulation has run its course with economically minded analysts pointing to regulation s inefficiency while those focused on justice purposefully avoid the economic paradigm to defend regulation s role in protecting consumers workers and society s disadvantaged In *Rescuing Regulation* Reza R Dibadj challenges both camps He squarely addresses the shortcomings of the conventional economic critique that portrays regulation as a waste and also confronts those focused on justice to marshal economic arguments for public intervention against social inequities and abusive market behavior Providing novel answers to the questions of why and how to regulate Dibadj contends that the law and economics paradigm must not remain an apologist for laissez faire public policy He also demonstrates how incorporating the latest economics and revamping institutions can help improve our public agencies *Rescuing Regulation* not only suggests ways to develop public institutions reflective of a democracy but also broadly outlines how social science can inform normative legal discourse

The Regulatory Regime of Food Safety in China Guanqi Zhou, 2017-05-23 This book examines the decade from 2004 to 2013 during which people in China witnessed both a skyrocketing number of food safety crises and aggregating regulatory initiatives attempting to control these crises Multiple cycles of crisis regulatory efforts indicated the systemic failure of this food safety regime The book explains this failure in the social foundations for the regulatory governance of food safety It locates the proximate causes in the regulatory segmentation which is supported by the differential impacts of the food regulatory regime on various consumer groups The approach of regulatory segmentation does not only explain the failure of the food safety regime by digging out its social foundation but is also crucial to the understanding of the regulatory state in China
