

Summary: Amine Protecting Groups

Since amines are so nucleophilic, it's often desirable to mask their reactivity using a removable protecting group.

The most common situation is in **peptide synthesis**, where two amino acids are joined together. If the nitrogens of both amino acids are unprotected, then we can get undesired mixtures of products!

Carbamates are practical protecting groups for amines. They can be installed and removed under relatively mild conditions.

Two of the most common carbamate protecting groups are *t*-butyloxycarbonyl (Boc) and carboxybenzyl (Cbz).

Hypothalamic Peptide Hormones and Pituitary Regulation

John Porter, 2012-12-06 The proceedings of a workshop conference are presented in this volume entitled Hypothalamic Peptide Hormones and Pituitary Regulation The workshop was held in Wilson Hall on the campus of the National Institutes of Health Bethesda Maryland during the days of November 1 2 1976 and is the most recent of three symposia on neuroendocrinology that have been sponsored by the National Institutes of Health The first one was held on December 6 8 1961 in the New Everglades Hotel at Miami Florida During the first meeting much emphasis was given to the anatomical and physiological basis for the fledgling science of neuroendocrinology The proceedings of that symposium were published under the title of Advances in Neuroendocrinology A V Nalbandov ed University of Illinois Press Urbana Illinois 1963 The second workshop was held on January 8 11 1969 in the Arizona Inn at Tucson Arizona and was unique in several respects It was evident to the participants that definitive identification and the determination of the chemical structure of at least one hypothalamic releasing factor was at hand see Workshop Conference on Bioassay and Chemistry of the Hypophysis tropic Hormones of the Hypothalamus Critical Evaluation i J Meites ed The Williams and Wilkins Co Baltimore Maryland 1970 Much of what was presented at the second workshop was dedicated to methods of bioassay of the various releasing factors

Neuroendocrine Regulation and Altered Behaviour Pavel D. Hrdina, Radhey L. Singhal, 2012-12-06 In recent years it has become clearly recognized that many behavioural disturbances and psychiatric illnesses are intimately associated with alterations in neuroendocrine function This volume is designed to provide a thorough up to date review of our current knowledge of the neuroendocrine correlates of altered behaviour in man and experimental animals Particular emphasis has been focused on the mechanisms which may underlie the coupling of mental functions with endocrine changes and the possible common links in the central regulation of both endocrine and psychic activities One of the main objectives of this book is to consider both the experimental and clinical approaches in studying the interrelationship between neuroendocrine regulation and altered behaviour and to assess its importance in the pathogenesis diagnosis and treatment of mental disorders The book has been organized into four major sections which focus on i the role of pituitary hormones in the regulation of CNS function ii the relationship between brain endorphin systems psychotropic drugs and neuroendocrine regulation iii the importance of neuroendocrine regulation in the pathogenesis of mental disorders and iv biological markers of altered mental function Each chapter is organized for ease of comprehension as well as for rapid retrieval of progress and essential information concerning the neuroendocrine basis of altered behaviour and psychiatric illnesses The contributing authors were selected because of their widely recognized expertise in the field Psychopharmacology Bulletin, 1966

The Pineal Gland and Cancer C. Bartsch, H. Bartsch, D.E. Blask, D.P. Cardinali, W.J.M. Hrushesky, Dieter Mecke, 2012-12-06 The link between the pineal gland and cancer is a rapidly emerging research field due to promising experimental and clinical trials with melatonin The pineal gland acts as a transducer of environmental light to regulate rhythmic processes including reproductive function in seasonally breeding animals and the entrainment of circadian

rhythms such as the sleep wake cycle in man This book elucidates the physiological significance of the pineal gland and surveys phenomena and mechanisms of pineal tumor interaction at the neuroendocrine neuroimmune neural and molecular levels Yet unidentified low molecular weight pineal substances with tumor inhibiting capacity a possible involvement of melatonin in electromagnetic field effects on cancer and the oncotherapeutic potential of melatonin are also addressed The encouraging results should incite further research to elucidate the exact nature of the link between the pineal gland and cancer for the benefit of patients *Dale's Principle and Communication between Neurones* Neville N. Osborne,2013-10-22 Dale s Principle and Communication Between Neurones is based on a colloquium of the Neurochemical Group of the Biochemical Society held at Oxford University July 1982 This book focuses on communication between neurones by means of chemical signals The book contains an introductory chapter by V P Whittaker and nine further chapters on various aspects of the chemical communication processes between neurones Topics covered include chemical communication between excitable cells the neuroendocrine division of the nervous system evidence for a neurone having the capacity to use two chemicals in the same process and non synaptic interneuronal communication Each article is based on the excellent lectures given by the main authors and the discussion which ensued in the one day colloquium held in Oxford The final chapter is a specially invited contribution by Drs Polak and Varndell who agreed to produce an article on their new method of localising transmitter like molecules at the electron microscopic level **Brody's Human Pharmacology - E-Book** Lynn Wecker,Susan L.
