

Rejets urbains par temps de pluie et qualité microbiologique des milieux aquatiques

Période : août 2010 à octobre 2010

Stéphanie PETIT et Benoît COURNOYER

Université Claude Bernard Lyon1 – UMR CNRS 5557 écologie microbienne – Eq Bactéries pathogènes opportunistes et environnement – Villeurbanne

Mots clés : Contamination fécale, Déversoir d'orage, Eaux de ruissellement, Eaux récréatives, Eaux usées, Évaluation des risques, Micro-organismes pathogènes, Temps de pluie

En France, de nombreuses agglomérations utilisent des systèmes d'assainissement unitaire où eaux usées et eaux pluviales sont collectées et évacuées vers des systèmes d'épuration (Passerat et al., 2010). Cependant, lors de fortes pluies, des dispositifs de « surverse » appelés déversoir d'orage (DO), conçus pour éviter le débordement des stations d'épuration et l'inondation des habitations et voiries, rejettent eaux usées et pluviales dans les cours d'eau naturels. Ces rejets de DO peuvent transformer une petite rivière en collecteur d'eaux usées « naturel », véhiculant déchets fécaux, matières solides et particules infectieuses.

De par ses activités récréatives et professionnelles, l'homme peut être exposé à des eaux contaminées par des rejets par temps de pluie. Des études épidémiologiques ont montré un risque plus élevé de contraction de gastro-entérite suite à une exposition à des eaux de baignade contaminées par des déchets fécaux (Prüss et al., 1998; Zmirou et al., 2003; Wade et al., 2003). Ces études ont contribué au développement de modèles d'évaluation quantitative des risques microbiens (QMRA) après intégration de données concernant les relations avec les concentrations en agents pathogènes ou bactéries indicatrices de la contamination fécale (Zmirou et al., 2003; Ashbolt et al., 2010; Soller et al., 2010). Ces modèles doivent aujourd'hui être alimentés par des jeux de données permettant d'affiner l'estimation des probabilités d'infection en fonction des paramètres environnementaux pouvant affecter l'appréciation des relations dose-réponse. Des facteurs site-spécifiques intégrant la complexité écologique des zones d'exposition aux organismes pathogènes et une différenciation des sources doivent être pris en compte pour obtenir une bonne évaluation des risques (Ashbolt et al., 2010).

Les études abordées dans cette note d'actualité scientifique présentent des jeux de données permettant une meilleure appréciation des risques d'exposition aux agents pathogènes et des probabilités d'infection lors d'une utilisation des masses d'eau à des fins récréatives.

Impact d'un événement intense de rejets d'eaux par temps de pluie par un déversoir d'orage sur la qualité microbiologique de la Seine

Passerat J, Quartara NK, Mouchel JM, Rodheir V, Servais P. Impact of an intense combined sewer overflow event on the microbiological water quality of the Seine river. *Water Res.* 2010; 45: 893-903

Analyse

Une analyse comparative de la qualité microbiologique d'un cours d'eau par temps sec et lors d'un événement de rejets de déversoir d'orage (DO) par temps de pluie, est présentée dans cet article (Passerat et al., 2010). L'événement de déversement analysé a eu une durée de 6 heures. La stratégie d'échantillonnage et les volets météorologiques visaient à définir la zone d'impact, en termes de km, d'un DO, le rôle des matières en suspension dans le transport des bactéries indicatrices de contaminations fécales, et l'impact relatif des eaux usées sur leurs concentrations dans les rejets d'un DO. Douze séries d'échantillons d'eaux rejetées par le DO, et des eaux de quatre secteurs de la Seine répartis sur 25 km, dont 1 en amont du DO et 3 en aval, ont été analysés. Des prélèvements d'eau de la Seine et d'eaux usées par temps sec ont servi de référence. La conductivité a été utilisée comme

indicateur des proportions d'eaux usées et pluviales rejetées par le DO. Les eaux usées ont constitué 10 % en moyenne, et 40 % lors des 30 premières minutes, des rejets du DO. De façon similaire, les concentrations en matière en suspension (MES) des eaux rejetées par le DO suggèrent des apports extérieurs en provenance des eaux pluviales de l'ordre de 86 %. Cependant, lors des 30 premières minutes de rejets, les fortes concentrations en MES observées étaient plus probablement reliées à une remise en suspension de dépôts présents dans le collecteur d'égout. Les concentrations en indicateurs fécaux ont également suivi ces tendances, avec des concentrations plus élevées en début de période de rejets et des concentrations variant en fonction du mélange Eaux Usées/Eaux Pluviales. Sur la période de rejets, environ 10^{11} E. coli ont été déversées dont 77 % étaient adsorbées sur les MES. Selon les auteurs, la remise en suspension des dépôts (sédiments) du réseau unitaire aurait contribué à hauteur de 45 % et 65 % de la charge en E. coli et en entérocoques intestinaux, respectivement. Les concentrations en bactéries indicatrices de contaminations fécales dans les eaux de la Seine, lors de l'événement de rejets du DO, ont augmenté d'environ un log entre l'amont et l'aval du DO, démontrant un impact significatif du DO. Les concentrations pour les eaux collectées jusqu'à une distance

Rejets Urbains Par Temps De Pluie

Caractérisation et impact de la pollution dans les rejets urbains par temps de pluie (RUTP) sur des bassins versants de l'agglomération Orléanaise Mohammed Al-Juhaishi,2018 L objectif de cette th se est de caract riser les Rejets Urbains par

Temps de Pluie RUTP et leur flux au niveau des exutoires d'eaux pluviales de trois sous bassins majeurs de l'agglomération orléanaise. Pour cela des prélèvements ponctuels d'eau ont été effectués et un modèle conceptuel a été utilisé. Les trois sous bassins La Corne 463 ha, l'Egoutier 2080 ha et Ormes 2256 ha ont des occupations du sol différentes. D'une manière générale la conductivité, la demande chimique en oxygène DCO, la demande biochimique en oxygène DBO5 et la DBO28, le carbone organique dissout COD, l'azote total NT et les concentrations en anions et cations majeurs étaient plus élevées par temps sec que par temps de pluie indiquant un effet de dilution par les précipitations. Il a été mis en évidence un mélange des eaux pluviales avec des eaux usées dans le sous bassin d'Ormes. L'occupation des sols et les activités anthropiques influencent de manière significative la qualité du ruissellement. Par exemple dans le sous bassin de l'Egoutier la présence d'une zone imperméable (industries et habitations) importante (40% de la surface) est responsable d'une augmentation des paramètres DBO5, DBO28, COD et NT. Les flux aux exutoires des différents paramètres de qualité de l'eau ont été évalués et comparés ceux issus des quatre principales stations de purification STEP et ceux de la Loire. La charge des trois sous bassins urbains représente environ 16,61% de la charge des quatre STEP. Les trois sous bassins ont un faible impact sur la Loire en termes de flux annuels environ 1,62% pour les MES par temps de pluie. Deux versions d'un modèle conceptuel dit d'accumulation-lavage-transport ont été évaluées pour estimer les flux de ruissellement des polluants : la version classique et une version modifiée dans laquelle le paramètre d'accumulation des polluants a une forme logarithmique. Les performances des modèles étaient acceptables pour les MES et la DCO. Les coefficients de corrélation étaient supérieurs à 90% pour le sous bassin de l'Egoutier par exemple. Pour les éléments traces métalliques en phase particulaire la corrélation avec l'expérience était bonne également. D'une manière générale lorsqu'un flux mesurait inférieur à 1 kg/h les modèles n'étaient plus applicables. Des premiers essais de simulation de la qualité et la quantité de RUTP ont été effectués à partir de MIKE URBAN qui couple les deux logiciels de modélisation MOUSE et SWMM. Les hydrogrammes ont indiqué que le débit maximum obtenu avec SWMM était toujours inférieur à celui obtenu avec MOUSE. La qualité de l'eau (masse de MES) était toujours plus fortement impactée par le lessivage des MES dans le modèle MOUSE que dans SWMM. Ce travail constitue la première étape du travail d'évaluation de RUTP pour l'Agglomération orléanaise. Il constitue une base solide pour un futur programme de surveillance continue.

Sewer Networks and Processes within Urban Water Systems

Jean-Luc Bertrand-Krajewski, 2004-11-01. The papers in this volume were originally presented at the 18th European Junior Scientists Workshop EJSW Portugal on 8-11 November 2003 and at the 1st Asian Junior Scientists Workshop AJSW Malaysia on 7-10 February 2004. The workshops were organised by the SS modelling of pollutant loads calibration of models bed load transport sewer pipe roughness advection in sewers anoxic processes infiltration and exfiltration runoff source control pollutant loads ventilation and oxygen uptake. From the 37 full papers presented at the two workshops 16 papers have been selected by independent reviewers from the SS PWG for publication in Sewer Networks and Processes within Urban Water Systems. They reflect rather well the variety of topics presented during both workshops and bring the high

quality work of these junior authors to the wider audience it merits

Oceans, Rivers and Lakes: Energy and Substance Transfers at Interfaces J.-C. Amiard, B. Le Rouzic, B. Berthet, G. Bertru, 2012-12-06 An international symposium on Ocean River and Lakes Energy and Substance Transfers at Interfaces was held in Nantes France in October 1996 It was the third International Joint Conference on Limnology and Oceanography which brings together specialists of both environments Considered to be necessary in Europe this confrontation of two different aspects of common subjects could produce innovative approaches The main purpose concerns scientific researches relative to the interfaces between various aquatic environment compartments The principal treated topics are bioavailability and mobility of substances influence of biotic and abiotic factors on transfers and fluxes at the interfaces It is particularly interesting to note the contribution of Limnologists and Oceanographers on the impact of nutrients and pollutants and flux quantification of river basin inputs As well as scientists this book is also of interest to all engineers and consultants involved in teaching and working in aquatic management restoration and enhancement

Eaux pluviales urbaines et rejets urbains par temps de pluie Chocat, **Data Requirements for Integrated Urban Water Management** Tim Fletcher, Ana Deletic, 2008-01-07 Integrated urban water management relies on data allowing us to analyse understand and predict the behaviour of the individual water cycle components and their interactions The concomitant monitoring of the complex of urban water system elements makes it possible to grasp the entirety of relations among the various components of the urban water cycle and so develop a holistic approach to solving urban water problems Data Requirements for Integrated Urban Water Managements issuing from UNESCO s International Hydrological Programme project on this topic is geared towards improving integrated urban water management by providing guidance on the collection validation storage assessment and utilization of the relevant data The first part of this volume describes general principles for developing a monitoring programme in support of sustainable urban water management The second part examines in detail the monitoring of individual water cycle components Two case studies in the final part illustrating attempts to deliver an integrated monitoring system help demonstrate the fundamental principles of sustainable urban water management elaborated here

Contribution à la gestion des rejets urbains du temps de pluie par les bassins de retenue Chantal Jacopin, 1999 **Évaluation de l'impact des rejets urbains de temps de pluie sur le compartiment algal des écosystèmes aquatiques** Yannis Ferro, 2014 La gestion des eaux pluviales constitue un d fi important relever dans les villes du monde entier aujourd hui on ne compte plus les probl mes d inondation et de pollution probl mes chroniques qui tendent s amplifier mesure que l urbanisation grandit en parall le du changement climatique Une gestion durable de ces eaux est au c ur des enjeux du XXIe si cle et afin de faire face ces probl mes le Minist re de l ecologie et du D veloppement Durable a engag une op ration de recherche sur cette th matique Parmi les probl mes pos s par les eaux pluviales notre tude se focalise sur les rejets urbains de temps de pluie RUTP Ces rejets constituent un apport important et impr visible de nombreux polluants pour les masses d eaux r ceptrices La pollution des RUTP est tudi e depuis de

nombreuses années et alors que les connaissances en la matière s'affinent il n'existe à l'heure actuelle aucune étude de grande ampleur permettant d'identifier l'impact des RUTP sur les écosystèmes récepteurs. Notre travail a consisté à étudier l'impact environnemental de différents chantillons de RUTP collectés sur 3 sites d'assainissement pluvial de l'agglomération lyonnaise. Pour cela nous avons sélectionné des bioindicateurs pertinents : les microalgues d'eau douce, organismes unicellulaires à la base des chaînes trophiques et très sensibles aux polluants présents dans les RUTP. Nous avons réalisé des bioessais cotoxicologiques connus de la littérature et contribué au développement de nouveaux indicateurs de toxicité complémentaires. De plus nous avons cherché à adapter ces bioessais pour permettre leur utilisation sur le terrain. En parallèle nous avons travaillé à l'amélioration d'un biocapteur enzymatique à cellules algales. Ses performances ont été évaluées sur des chantillons de RUTP avant de réaliser la construction d'une station automatisée qui nous a permis de réaliser des mesures directement sur les sites d'assainissement en ligne. Ce travail contribue à mettre en évidence l'impact important des RUTP sur le milieu récepteur tout en confirmant le caractère hétérogène de ce type d'effluent et l'intérêt des dispositifs de surveillance in situ.

Solids in Sewers
 Richard M. Ashley, Jean-Luc Bertrand-Krajewski, T. Hvitved-Jacobsen, M. Verbanck, 2004-04-30
 This Report presents information on the current state of knowledge of the origins, occurrence, nature and effects of sewer solids for use by engineers, scientists, administrators and water quality planners for the planning, design and operation of sewerage systems. The report addresses both sewer maintenance requirements and environmental protection issues. Increasing environmental standards coupled with public expectations have led to stringent water quality standards. In response to this it has been necessary to develop new methodologies and computer based analytical techniques to model and understand the performance of all aspects of waste water systems. Fundamental to these techniques is the understanding of the way in which sewer solids contribute to the poor performance of wastewater systems and consequential environmental damage. The information presented in this Report about the origins, nature, movement, hydraulic and polluting effects of solids in sewers has enabled strategies and rules to be developed for the management of sewerage systems to minimise the deleterious effects of these solids and associated pollutants. Scientific Technical Report No 14.

Cities of the Future
 Vladimir Novotny, Paul Brown, 2007-09-04
 This book is developed from and includes the presentations of leading international experts and scholars in the 12-14 July 2006 Wingspread Workshop. With urban waters as a focal point, this book will explore the links between urban water quality and hydrology and the broader concepts of green cities and smart growth. It also addresses legal and social barriers to urban ecological sustainability and proposes practical ways to overcome those barriers. Cities of the Future features chapters containing visionary concepts on how to ensure that cities and their water resources become ecologically sustainable and are able to provide clean water for all beneficial uses. The book links North American and Worldwide experience and approaches. The book is primarily a professional reference aimed at a wide interdisciplinary audience including universities, consultants, environmental advocacy groups and legal/environmental professionals.

Chemical Water and Wastewater Treatment III Rudolf Klute, Hermann H. Hahn, 2012-12-06 Exactly ten years ago an experiment was started that proved to be extremely successful the First Gothenburg Symposium Its intent was to further the understanding of all processes pertaining to Chemical Water and Wastewater Treatment and to bring together specialists working in basic research as well as in development and administration Now the Proceedings of the Sixth Symposium are about to be published clearly proving that there is a need for this forum They dramatically illustrate the significance and the dynamic development of the topics of these symposia It is fascinating to witness that in this time of reduced economic growth or even standstill the environmental drive has not come to a halt as many anticipated or feared It is accepted more and more that the protection of the environment a constant theme in all the Gothenburg Symposia is not only a topic to be dealt with in times of affluence it is now also seen as an instrument for cutting expenditure saving energy and husbanding resources The ever growing interest in these Gothenburg Symposia documented by the large number of contributions the scientific panel received and the large demand for the books of this series that always exceeds the supply testify to this commitment

Récupérer et gérer les eaux pluviales Brigitte Vu, 2011-07-07 Réaliser des économies d'énergie et réutiliser des ressources naturelles dans le but de préserver notre environnement sont des préoccupations importantes dans la construction d'aujourd'hui Desireuses de promouvoir une démarche en parfaite adéquation

Symbolic and Quantitative Approaches to Reasoning with Uncertainty Sébastien Destercke, Thierry Denoeux, 2015-07-11 This book constitutes the refereed proceedings of the 13th European Conference on Symbolic and Quantitative Approaches to Reasoning with Uncertainty ECSQARU 2015 held in Compiègne France in July 2015 The 49 revised full papers presented were carefully reviewed and selected from 69 submissions and cover topics on decision theory and preferences argumentation conditionals game theory belief update classification inconsistency graphical models Bayesian networks belief functions logic and probabilistic graphical models for scalable data analytics Papers come from researchers interested in advancing the technology and from practitioners using uncertainty techniques in real world applications The scope of the ECSQARU conferences encompasses fundamental issues representation inference learning and decision making in qualitative and numeric uncertainty paradigms

Wet-Weather Flow in the Urban Watershed Richard Field, Daniel Sullivan, 2002-08-27 According to the National Resources Defense Council stormwater runoff rivals or exceeds discharges from factories and sewage plants as a source of pollution throughout the United States The Environmental Protection Agency identifies urban stormwaters as the second largest source of water quality damage in estuaries and a significant contributor to *Design and Modeling of Mechanical Systems—III* Mohamed Haddar, Fakher Chaari, Abdelmajid Benamara, Mnaouar Chouchane, Chafik Karra, Nizar Aifaoui, 2017-11-25 This book offers a collection of original peer reviewed contributions presented at the 7th International Congress on Design and Modeling of Mechanical Systems CMSM 2017 held in Hammamet Tunisia from the 27th to the 29th of March 2017 It reports on both research findings innovative industrial applications and case studies concerning mechanical

systems and related to modeling and analysis of materials and structures multiphysics methods nonlinear dynamics fluid structure interaction and vibroacoustics design and manufacturing engineering Continuing on the tradition of the previous editions this proceedings offers a broad overview on the state of the art in the field and a useful resource for academic and industry specialists active in the field of design and modeling of mechanical systems CMSM 2017 was jointly organized by two leading Tunisian research laboratories the Mechanical Modeling and Manufacturing Laboratory of the National Engineering School of Sfax and the Mechanical Engineering Laboratory of the National Engineering School of Monastir

Groundwater Quality and Geochemistry in Arid and Semi-Arid Regions Shakir Ali, Abdelazim Negm, 2024-03-19

This book reviews groundwater quality and its major global contaminants and collects the latest advances in the analysis remediation risk assessment and hydrogeochemistry of groundwater in countries such as Algeria Egypt Ghana Kazakhstan Morocco Saudi Arabia and the USA This book mainly focuses on the major arid and semi arid areas where groundwater is scarce and highly polluted with geogenic and anthropogenic contaminants and the recharge to the groundwater is negligible due to limited rainfall Divided into 2 parts the book starts by covering topics like assessment and protection of groundwater in arid and semi arid regions groundwater pollution and contamination risk assessment Particular attention is given to the application of environmental isotopes in groundwater studies and how anthropogenic activities impact groundwater quality the impact of irrigation reservoirs in groundwater and soil quality and how artificial intelligence is applied to forecast groundwater quality In the second part of this book readers will find more about the major global contaminants of groundwater in arid and semi arid areas including a geochemical analysis of fluoride and nitrate contamination Supported by regional case studies this book appeals to researchers scholars and professionals working in the field of groundwater contamination and remediation and is also an important account for policymakers

Unveiling the Energy of Verbal Beauty: An Mental Sojourn through **Rejets Urbains Par Temps De Pluie**

In a global inundated with screens and the cacophony of instantaneous communication, the profound energy and mental resonance of verbal artistry usually disappear in to obscurity, eclipsed by the regular barrage of sound and distractions. However, located within the musical pages of **Rejets Urbains Par Temps De Pluie**, a fascinating work of literary elegance that impulses with raw thoughts, lies an wonderful trip waiting to be embarked upon. Composed by way of a virtuoso wordsmith, this interesting opus manuals viewers on a psychological odyssey, softly revealing the latent potential and profound impact stuck within the complicated internet of language. Within the heart-wrenching expanse of this evocative evaluation, we can embark upon an introspective exploration of the book is key themes, dissect their captivating writing style, and immerse ourselves in the indelible impact it leaves upon the depths of readers souls.

Rejets Urbains Par Temps De Pluie Introduction

In today's digital age, the availability of Rejets Urbains Par Temps De Pluie books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Rejets Urbains Par Temps De Pluie books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Rejets Urbains Par Temps De Pluie books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Rejets Urbains Par Temps De Pluie versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Rejets Urbains Par Temps De Pluie books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Rejets Urbains Par Temps De Pluie books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature

enthusiasts. Another popular platform for Rejets Urbains Par Temps De Pluie books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Rejets Urbains Par Temps De Pluie books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Rejets Urbains Par Temps De Pluie books and manuals for download and embark on your journey of knowledge?

FAQs About Rejets Urbains Par Temps De Pluie Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Rejets Urbains Par Temps De Pluie is one of the best book in our library for free trial. We provide copy of Rejets Urbains Par Temps De Pluie in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Rejets Urbains Par Temps De Pluie.

Where to download Rejets Urbains Par Temps De Pluie online for free? Are you looking for Rejets Urbains Par Temps De Pluie PDF? This is definitely going to save you time and cash in something you should think about.
