orientation and potential for long term sustainability Thesis Series ZEF Development Studies Vol 23 An Introduction to Syntax Robert D. Van Valin, 2001-04-26 This introduction to syntactic theory and analysis presents syntactic phenomena from a wide range of languages and explains to students the major typological issues that syntactic theories must address It includes a number of exercises *Just Responsibility* Brooke A. Ackerly, 2018 It has been well established that many of the injustices that people around the world experience every day from food insecurity to unsafe labor conditions and natural disasters are the result of wide scale structural problems of politics and economics These are not merely random personal problems or consequences of bad luck or bad planning Confronted by this fact it is natural to ask what should or can we do to mitigate everyday injustices In one sense we answer this question when we buy the local homeless street newspaper decide where to buy our clothes remember our reusable bags when we shop donate to disaster relief or send letters to corporations about labor rights But given the global scale of injustices related to poverty environmental change gender and labor can these individual acts really impact the seemingly intractable global social political and economic structures that perpetuate and exacerbate them Moreover can we respond to injustices in the world in ways that do more than just address their consequences In this book Brooke A Ackerly both answers the question of what should we do and shows that it s the wrong question to ask To ask the right question we need to ground our normative theory of global justice in the lived experience of injustice Using a feminist critical methodology she argues that what to do about injustice is not just an ethical or moral question but a political question about assuming responsibility for injustice regardless of our causal responsibility and extent of our knowledge of the injustice Furthermore it is a matter that needs to be guided by principles of human rights As she argues while many understand human rights as political goals or entitlements they can also guide political strategy Her aims are twofold to present a theory of what it means to take responsibility for injustice and for ensuring human rights as well as to develop a guide for how to take responsibility in ways that support local and global movements for transformative politics In order to illustrate her theory and guide for action Ackerly draws on fieldwork on the Rana Plaza collapse in 2013 the food crisis of 2008 and strategies from 125 activist organizations working on women s and labor rights across 26 countries *Just Responsibility* integrates these ways of taking political responsibility into a rich theory of political community accountability and leadership in which taking responsibility for injustice itself transforms the fabric of political life **Morphologie** G. E. Booij, Christian Lehmann, Joachim Mugdan, 2000 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers

both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume

Interpersonal

Communication in Friend and Mate Relationships Anne Maydan Nicotera, 1993-03-24 A concentration on communication processes is essential to sorting out fundamental problems in interpersonal relationships This book provides a general theory of the role of communication in interpersonal relationships that is grounded in the rules perspective and focuses on self concept and interaction as the generative mechanisms of relationship formation and growth The authors explore the kind of information that is exchanged in the process of initiating developing and maintaining friend and mate relationships Both types of relationships are explored in numerous cultural settings including America and American subcultures as well as Korea Nigeria Japan and China The inclusion of Nigerian culture is particularly significant because the research literature in interpersonal communication is lacking any information from the continent of Africa Implications are then considered for communication exchange across three categories of interpersonal communication culture conflict and quality

Trust in Market Relationships Sandro Castaldo, 2007 Trust in Market Relationships illustrates that the importance of trust in a commercial arena has intensified as markets have become more complex As business relationships become ever critical for a firm's economic results in highly competitive markets and trust represents the basic platform for the development of successful long term collaborations Sandro Castaldo attempts to order the analytical complexity and myriad perspectives that characterise research on trust He aims not to simplify this complexity but to present guidelines for an

interpretative model of trust and to define fundamental concepts for trust management strategies Issues explored include the nature of trust the relevance of trust to firms intangible assets and value creation dimensions of trust in marketing studies psychological sociological and organizational studies and the transactional cost theory trust determinants consequences and evolutionary processes and cycles With its wide literature review and complete field overview this multi disciplinary approach to the complex facets of trust in market relationships will strongly appeal to those with an interest in marketing trust management and organizational studies

Valency over Time Silvia Luraghi, Elisa Roma, 2021-10-25 Valency patterns and valency orientation have been frequent topics of research under different perspectives often poorly connected Diachronic studies on these topics is even less systematic than synchronic ones The papers in this book bring together two strands of research on valency i e the description of valency patterns as worked out in the Leipzig Valency Classes Project ValPaL and the assessment of a language s basic valency and its possible orientation Notably the ValPaL does not provide diachronic information concerning the valency patterns investigated one of the aims of the book is to supplement the available data with data from historical stages of languages in order to make it profitably exploitable for diachronic research In addition new research on the diachrony of basic valency and valency alternations can deepen our understanding of mechanisms of language change and of the propensity of languages or language families to exploit different constructional patterns related to transitivity

Differential Subject Marking Helen de Hoop, Peter de Swart, 2007-12-04 Although almost all sentences have subjects not all sentences encode their subjects in the same way Some languages overtly mark some subjects but not others depending on certain features of the subject argument or the sentence in which the subject figures This phenomenon is known as Differential Subject Marking DSM Languages differ in which conditions govern DSM Some languages differentiate their subjects on the basis of semantic features of the argument such as thematic role volitionality animacy whereas others differentiate on the basis of clausal features such as tense aspect and the main dependent clause distinction DSM comes in different formal guises case marking agreement inverse systems and voice alternations Relatively much is known about cross linguistic variation in the marking of subjects yet little attempt has been made to formalize the facts This volume aims to unify formal approaches to language and presents both specific case studies of DSM and theoretical approaches
