Relations Of Development And Aging:

Relations of Development and Aging James E. Birren, 1980-01-01 *Relations of Development and Aging* James E. Birren, 1964 *Handbook of Emotion, Adult Development, and Aging* Carol Magai, Susan H. McFadden, 1996-10-24

The field of emotions research has recently seen an unexpected period of growth and expansion both in traditional psychological literature and in gerontology. The *Handbook of Emotion, Adult Development, and Aging* provides a broad overview and summary of where this field stands today specifically with reference to life course issues and aging. Written by a distinguished group of contributing authors, the text is grounded in a life span developmental framework while advancing a multidimensional view of emotion and its development and incorporating quantitative and qualitative research findings. The book is divided into five parts. Part One discusses five major theoretical perspectives including biological, discrete emotions, ethological, humanistic, and psychosocial. Part Two on affect and cognition discusses the role of emotion in memory, problem solving, and internal perceptions of self and gender. Part Three on emotion and relationships expands on the role of emotion in sibling and parent-child relationships as well as relationships between friends and romantic partners and the emotional reaction to interpersonal loss across the life span. Part Four on stress, health, and psychological well-being treats issues of stress and coping, religion, personality, and quality of life. The final part on continuity and change in emotion patterns and personality discusses emotion and emotionality throughout the life span. An ideal reference source for professionals across a wide range of disciplines, the text summarizes recent important developments in this fast-growing area of psychology and proposes many new directions for future research. Provides a biopsychological view on emotion in adulthood from a life span context. Presents the new perspective on emotion in older adults actively engaged in emotion self-regulation. Describes the intimate connection between emotion and the structure of personality. Demonstrates a new perspective on what emotion is, its importance across the life span, its connections with cognition, its role in interpersonal relation, and the way it influences both stability and change in adulthood. Illustrates the interpersonal nature of emotion. Provides theoretically based, leading edge research from international authors. Five areas of coverage include: Theoretical perspectives, Affect and cognition, Emotion and relationships, Stress, health, and psychological well-being, Continuity and change in emotion patterns and personality. Coverage includes: Five major theoretical perspectives including biological, discrete emotions, ethological, humanistic, and psychosocial. The role of emotion in memory, problem solving, and internal perceptions of self and gender. The role of emotion in sibling and parent-child relationships, relationships between friends and romantic partners, and the emotional reaction to interpersonal loss across the lifespan. Issues of stress and coping, religion, personality, and quality of life. Emotion and emotionality throughout the lifespan.

Fostering Development in Midlife and Older Age Irina Catrinel Crăciun, 2023-02-22

This handbook integrates and discusses a growing evidence base concerning individual development across middle and late adulthood. The book includes a comprehensive analysis of what growth implies within midlife and

older age and considers how different developmental areas are intertwined i.e physical cognitive social and emotional development as well as personality growth As the gap between theory and practice still constitutes an issue in developmental research the handbook also aims to provide illustrative examples of prevention and intervention from a positive psychology perspective These were selected to represent a variety of topics relevant for individual development where research informs practice ranging from happiness grandparenthood love and sexuality to loneliness depression anxiety suicide prevention and coping with death This handbook is a must have resource for students and researchers working in developmental psychology health psychology gerontology and public health It will also be of interest to practitioners such as counsellors life coaches psychotherapists organizational psychologists health professionals social workers or public health planners

Developments in Aging United States. Congress. Senate. Special Committee on Aging,1987 *Relationships as Developmental Contexts* W. Andrew Collins,Brett Laursen,1999-03-01 The volume s topic was chosen in part because of the rapidly growing salience of dyadic research perspectives in developmental psychology but also in social psychology and in fields such as communication and family studies It provides the most complete representation now available on current theory and research on the significance of personal relationships in child and adolescent development This volume addresses the ways in which the study of social development has been altered by an emphasis on research questions and techniques for studying children and adolescents in the context of their significant dyadic relationships Leading scholars many of them pioneers in the concepts and methods of dyadic research have contributed chapters in which they both report findings from recent research and reflect on the implications for developmental psychology Their work encompasses studies of relationships with parents siblings friends and romantic partners Opening chapters set the stage by describing the key characteristics of social development research from a dyadic perspective and outlining key themes and contemporary issues in the field It concludes with commentaries from distinguished senior scholars identifying important directions for future research *The Psychology of Control and Aging* Margret M. Baltes,Paul B. Baltes,2014-08-01 Originally published in 1986 the central topic of this book is the analysis and application of control related beliefs and behaviours for theory and practice in the psychology of aging The volume was written for two specific interrelated purposes aimed at cross fertilization between the psychology of control and the field of gerontology The first purpose was to summarise available research and theory on the psychology of control for researchers and professionals interested in gerontology at the time The second was to enrich the field of the psychology of control *Adult Development and Aging* Richard Schulz,Robert B. Ewen,1988 *Studying Children: A Cultural-Historical Approach* Hedegaard, Marianne,Fleer, Marilyn,2008-12-01 This work discusses the complexity of child development It provides a critique of alternative perspectives of research and development and shows how to do research with the concepts of cultural historical theory [Handbook of Theories of Aging, Second Edition](#) Merril Silverstein PhD,Vern L. Bengtson PhD,Norella Putney PhD,Daphna Gans PhD,2008-10-27 The field of gerontology has often

been criticized for being data rich but theory poor The editors of this book address this issue by stressing the importance of theory in gerontology While the previous edition focused on multidisciplinary approaches to aging theory this new edition provides cross disciplinary integrative explanations of aging theory The contributors of this text have reached beyond traditional disciplinary boundaries to partner with researchers in adjacent fields in studying aging and age related phenomena This edition of the Handbook consists of 39 chapters written by 67 internationally recognized experts in the field of aging It is organized in seven sections reflecting the major theoretical developments in gerontology over the past 10 years Special Features Comprehensive coverage of aging theory focusing on the biological psychological and social aspects of aging A section dedicated to discussing how aging theory informs public policy A concluding chapter summarizing the major themes of aging and offering predictions about the future of theory development Required reading for graduate students and post doctoral fellows this textbook represents the current status of theoretical development in the study of aging

Development of Person-context Relations Thomas A. Kindermann, Jaan Valsiner, 2013-06-17 Traditionally developmental psychology has its focus on individuals Developmentalists aim to describe regularities in individuals change and development across time to explain the processes and mechanisms that are involved in producing change and regularity and eventually to design strategies for optimization and modification of developmental pathways Although the role of contexts has always been of central concern for these purposes it is nevertheless quite surprising to note that compared to the effort devoted to individuals relatively little attention has been paid to the study of the nature and organization of their contexts This volume is an exploration of the idea that how we describe and explain human development will be closely tied to our understanding of what contexts are how individuals and contexts become influential for one another what contexts do to and with individuals and how contexts and their influences change themselves across time A major theme is whether the traditional dichotomy between individuals and their contexts may be artificial perhaps culturally biased and after psychologists have adhered to it for about a century may have become an impediment to increasing our understanding of developmental processes With this volume the editors contribute a serious consideration of development and systematic change to emerging models of person context relations and provide suggestions about how it may be possible to incorporate these notions in developmental research and theorizing *Relations of Development and Aging. A Symposium Presented Before the Gerontological Society at the 15th Annual Meeting, Miami Beach, Florida* John E. Anderson, James E. Birren, Margaret Blenkner, 1964

Understanding Communication and Aging Jake Harwood, 2007-05-08 The book examines key topics such as interpersonal and family relationships in old age media portrayals of aging cultural variations in intergenerational communication and health communication in old age **The Relation of Crime and Delinquency to Age and Intelligence** Hortense M. Mullane, 1927 [International Handbook of Population Aging](#) Peter Uhlenberg, 2009-04-29 The International Handbook of Population Aging examines research on a wide array of the profound

implications of population aging It demonstrates how the world is changing through population aging and how demography is changing in response to it **The Study of Human Development** Richard A. Settersten Jr., Megan M.

McClelland, 2018-10-18 If you had just one wish for the study of human development what would it be How would it advance the field And what would it take for your vision to be realized This was the charge given to twenty eight scholars coming from different disciplines and fields and who study different periods of the life course This book compiles provocative contributions from a wide range of established scholars organized into seven thematic areas conceptual advances systems levels and contexts individual differences methodological advances harnessing science for human welfare and social justice underexplored life course dynamics and interdisciplinary collaboration and playing well with others This book was originally published as a special issue of Research in Human Development **Relationship Development Intervention with Young**

Children Steven Gutstein, Rachele K Sheely, 2002-02-15 Friendship requires hard work and the odds are heavily stacked against those with autism spectrum conditions Designed for younger children this comprehensive set of enjoyable activities emphasizes foundation skills such as social referencing regulating behavior conversational reciprocity and synchronized actions **The Communication Age** Autumn Edwards, Chad Edwards, Shawn T. Wahl, Scott A. Myers, 2015-12-07 We are in

the communication age No matter who you are or how you communicate we are all members of a society who connect through the internet not just to it From face to face interactions to all forms of social media The Communication Age Second Edition invites you to join the conversation about today's issues and make your voice heard This contemporary and engaging text introduces students to the essentials of interpersonal small group and public communication while incorporating technology media and speech communication to foster civic engagement for a better future Personal Relationships and

Personal Networks Malcolm R. Parks, 2017-09-25 The effort to understand personal relationships has traditionally focused on the individual characteristics of participants Personal Relationships and Personal Networks takes this analysis a step further focusing on research linking participants feelings and actions within a given personal relationship to the larger social context surrounding it Author Malcolm R Parks expands on the idea that the initiation development maintenance and dissolution of relationships are inextricably connected to each participant's social network a perspective that allows for a better appreciation of our connection to the world and a greater understanding our significant power as social actors This book offers a new way to consider basic notions about how relationships form such as how particular people meet and how relationships are started Among many findings the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other's personal networks and when they believe that network members support their relationship Additional topics discussed include how this social context model is applicable to different types of relationships how participants interact with network members how social networks are involved in the deterioration of personal relationships and what drives change in relationships

Students researchers and professionals in a wide variety of disciplines such as communication psychology sociology anthropology family studies clinical psychology public health nursing education and social work will find this book useful as will anyone seeking to better understand their own personal relationships

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23

Children are already learning at birth and they develop and learn at a rapid pace in their early years This provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning Despite the fact that they share the same objective to nurture young children and secure their future success the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well Transforming the Workforce for Children Birth Through Age 8 explores the science of child development particularly looking at implications for the professionals who work with children This report examines the current capacities and practices of the workforce the settings in which they work the policies and infrastructure that set qualifications and provide professional learning and the government agencies and other funders who support and oversee these systems This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning shared knowledge and competencies for care and education professionals and principles for effective professional learning Young children thrive and learn best when they have secure positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice specific actions to improve professional learning systems and workforce development and research to continue to build the knowledge base in ways that will directly advance and inform future actions The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children
