Reimagining the Human Service Relationship Jaber F. Gubrium, Tone A. Andreassen, Per K. Solvang, 2016-07-05 The traditional lines of demarcation between service providers and service users are shifting Professionals in managed service organizations are working to incorporate the voices of service users into their missions and the way they function and service users with growing access to knowledge have taken on the semblances of professional expertise Additionally the human services environment has been transformed by administrative imperatives The drive toward greater efficiency and accountability has weakened the bond between users and providers Reimagining the Human Service Relationship is informed by the premise that the helping relationship should be seen as developing in the interactive space between those who provide human services and those who receive them The contributors to this volume redefine the contours roles institutional divisions means and aims of providing and receiving services in a range of settings including child welfare addiction treatment social enterprise doctoring mental health and palliative care Though they advocate an experience near approach they remain sensitive to the ambiguities and competing rationalities of the service relationship Taken together these chapters reimagine the service relationship by making visible the working relevancies of service delivery *The Dynamics of the Social Worker-Client Relationship* Joseph F. Walsh, 2021 While providing competent intervention modalities is vital for a social worker s success in direct practice it is only part of what makes a social worker effective Outcomes also depend on the social

worker's ability to develop and maintain constructive relationships with clients. An essential book for social work students and professionals alike. *The Dynamics of the Social Worker-Client Relationship* details the many ways that such relationships can be developed with clients who display a wide range of presenting problems in many types of social service agencies. Each chapter focuses on a particular challenge that social workers may encounter in that process. These include boundaries, the use of self, the working alliance, relationship ruptures, special issues presented by children and adolescents, terminations and transfers, clients about whom a social worker experiences highly positive or negative feelings, the use of physical contact, the use of humor, working with psychotic clients, and the use of technology. In every chapter, graduate students provide case studies to illustrate how relationships can be formed and perhaps tested. Written in an accessible style and full of stories and examples, this book provides future social service professionals with the much-needed insight into creating and maintaining professional relationships with clients.
