Relationships and Evolution of Flamingos (Aves: Phoenicopteridae) Storrs L. Olson, 1980 **Relationships and Evolution of Flamingos [Aves, Phoenicopteridae]** Storrs L. Olson, Alan Feduccia, 1980 *Relationships and Evolution of Flamingos [Aves, Phoenicopteridae]* Storrs L. Olson, 1980 *The Origin and Evolution of Birds* Alan Feduccia, Professor Alan Feduccia, 1999-01-01 An exploration of all that is known about the origin of birds and of avian flight It draws on fossil evidence and studies of the structure and biochemistry of living birds to present knowledge and data on avian evolution and to propose a new model of this evolutionary process **Wild Flamingos**, 1997 A photo essay describing the physical characteristics natural habitat and behavior of the flamingos of Bonaire Netherlands Antilles **Molecules and Morphology in Evolution** Colin Patterson, 1987-07-09 Papers presented at the Third International Congress of Systematic and Evolutionary Biology held at the University of Sussex 4 11 July 1985 *Monthly Catalogue, United States Public Documents*, 1981 *North Atlantic Right Whales* David W. Laist, 2017-03-29 In the cold waters of the North Atlantic Ocean some of the heartiest humans of medieval days ventured out in search of whales Through the centuries people became increasingly dependent on whale oil and other cetacean products To meet this growing demand whaling became ever more sophisticated and intense leading to the collapse of what was once a seemingly inexhaustible supply of large cetaceans Central to the whale s subsequent struggle for existence has been one species the North Atlantic right whale This book is a history of the North Atlantic right whale from its earliest encounters with humans to its close brush with extinction to its currently precarious yet hopeful status as a conservation icon **The Flying Zoo** Michael Stock, 2022-08-31 My work as a scientist who studies bird parasites causes me to wonder about the hidden part of the drama unfolding before my eyes the flying zoo that makes each bird what it is As I gaze out at my favourite birds I wonder what role their parasites have played in shaping their fascinating behaviours and alluring appearance From Chapter 1 In The Flying Zoo Michael Stock gives readers an enthusiastic tribute to birds and the parasites that live in and on them From the Crozet Archipelago and the Galapagos Islands to our own backyards parasites fleas lice ticks and flukes live in a sinister yet symbiotic relationship with their host birds With a scientist s exuberance Stock reveals a co evolutionary dance among an astounding cast of creatures living in a complex and paradoxical co habitation Following in the footsteps of Fleas Flukes and Cuckoos this contemporary classic deserves a place on the shelves of students and teachers of biology natural history buffs and birders **Monthly Catalog of United States Government Publications** United States. Superintendent of Documents, 1981 **Constructional Morphology and Evolution** Norbert Schmidt-Kittler, Klaus Vogel, 2012-12-06 Constructional morphology explains features of organisms from a constructional and functional point of view By means of physical analysis it explains the operational aspects of organic structures how they can perform the activities organisms are expected to fulfil in order to survive in their environment Constructional morphology also explains options and constraints during the evolution determined by internal

Birder's Handbook Paul Ehrlich, David S. Dobkin, Darryl Wheye, 1988 On t p A field guide to the natural history of North American birds including all species that regularly breed north of Mexico

Paleogene Fossil Birds Gerald Mayr, 2022-02-12 This second completely revised edition of Paleogene fossil birds gives a comprehensive updated overview of the avian fossil record from a geological period that lasted from the end Cretaceous mass extinction event 66 million years ago to the end of the Oligocene epoch 23 mya Paleogene avifaunas are highly diversified and not only feature unusual archaic groups without close living relatives but also offer unique insights into the evolution and biogeographic history of extant birds The main body of the book constitutes an in depth survey of the known diversity of Paleogene avifaunas The reader is introduced into basic skeletal features of extinct avian taxa with these fossil forms being placed into a phylogenetic context in the light of current hypotheses on the interrelationships of extant birds The geographical and temporal occurrences of the various fossil groups are outlined and their evolutionary significance is discussed Concluding sections inform more general aspects of Paleogene avifaunas such as possible causes of major faunal changes In addition to being a reference work for the early evolution of modern birds from a paleornithological perspective the present work also enables researchers in other fields of vertebrate paleontology to gain an improved understanding of Paleogene ecosystems Numerous color photos of representative specimens furthermore make the new edition attractive to a wider audience interested in the avian fossil record

Coevolution of Life on Hosts Dale H. Clayton, Sarah E. Bush, Kevin P. Johnson, 2015-12-24 For most the mere mention of lice forces an immediate hand to the head and recollection of childhood experiences with nits medicated shampoos and traumatic haircuts But for a certain breed of biologist lice make for fascinating scientific fodder especially enlightening in the study of coevolution In this book three leading experts on host parasite relationships demonstrate how the stunning coevolution that occurs between such species in microevolutionary or ecological time generates clear footprints in macroevolutionary or historical time By integrating these scales Coevolution of Life on Hosts offers a comprehensive understanding of the influence of coevolution on the diversity of all life Following an introduction to coevolutionary concepts the authors combine experimental and comparative host parasite approaches for

testing coevolutionary hypotheses to explore the influence of ecological interactions and coadaptation on patterns of diversification and codiversification among interacting species Ectoparasites a diverse assemblage of organisms that ranges from herbivorous insects on plants to monogenean flatworms on fish and feather lice on birds are powerful models for the study of coevolution because they are easy to observe mark and count As lice on birds and mammals are permanent parasites that spend their entire lifecycles on the bodies of their hosts they are ideally suited to generating a synthetic overview of coevolution and thereby offer an exciting framework for integrating the concepts of coadaptation and codiversification

Stray Feathers Leo Joseph, Penny Olsen AM, 2011-06-21 *Stray Feathers* showcases some of the remarkable adaptations of Australian birds A brief introduction describes how evolution shapes form and function followed by a series of vignettes illustrating the wondrous variety of forms and functions shaped by evolution For example did you know that Barn Owls can hunt in absolute darkness and that cuckoos commence incubation before their egg is laid Sections include anatomy and physiology the senses giving voice tongues talking plumage getting around finding and handling food optimising foraging and feeding reducing competition using tools communicating quality vs quantity courtship nests parental care chicks and living together The book is superbly illustrated with black and white drawings of a range of birds making it a worthy addition to the bookshelves of bird lovers everywhere

Avian Biology Donald Farner, 2012-12-02 *Avian Biology Volume VIII* assesses selected aspects of avian biology It is generally the conceptual descendant of Marshall's earlier treatise *Biology and Comparative Physiology of Birds* but is more than simply a revision of it This volume consists of two relatively lengthy diverse chapters that focus on adaptive significance of coloniality in birds and fossil records of birds In particular this volume looks into group phenomena related to central place systems that is systems in which one or more individuals move to and from a centrally located place in the course of daily activities It also addresses selective factors that have been suggested to explain why individuals should form colonies rather than disperse within the available foraging space This book will be useful as a reference material for advanced students and instructors in this field of interest
