Relativity A Point Of View Poems:

Relativity Kelly Cherry, 1977 **Yeats, Eliot, Pound and the Politics of Poetry** Cairns Craig, 2015-12-22 It has long been recognised that there is an apparently paradoxical relationship between the revolutionary poetic style developed by Yeats Eliot and Pound in the period during and after the First World War and the reactionary politics with which they were associated in the 1920s and 1930s Concentrating on their writings in the period up to the 1930s this study first published in 1982 helps to resolve the paradox and also provides a much needed reappraisal of the factors influencing their poetic and political development The work of these poets has usually been seen as deriving from the tradition of continental symbolist poetics Yeats Eliot Pound and the Politics of Poetry will be of interest to students of literature The Measured Word Kurt Brown, 2001 Though the interests of science and art frequently seem to inhabit opposite poles The Measured Word assembles a brilliant anthology of twelve essays that illumine the historic and newly emerging relationships between the poetic and scientific imaginations Assembling the writings of leading contemporary poets essayists and thinkers Kurt Brown highlights ways in which poets use scientific discoveries and mathematical ideas to their artistic advantage and offers insight on the recently apparent integration of technology and other discoveries into the postmodernist poetry Here are meditations on the similarities and differences between the poetic and scientific imagination on the poetic use of fractals on hypertext on the changing shape of poetry in the scientific age Commentary by Czech poet and immunologist Miroslav Holub Paul Lake Alison Hawthorne Deming Alice Fulton Forrest Gander and Stephanie Strickland among others presents a diverse selection of opinions These viewpoints are complemented by many careful innovative readings of individual poems informed by the sciences The writings in this collection not only celebrate the advent of a new age of discovery but also identify the need for a revision of the western thinking that separates the mind and the heart replacing division with the reciprocity of mutual communication *A Gathering of Poets* Maggie Anderson, Alex Gildzen, Raymond A. Craig, 1992 A collection of poems commemorating the twentieth anniversary of the killing of four Kent State students on May 4 1970 This Ghostly Poetry Daniel Aguirre-Otezia, 2020-04-02 The Spanish Civil War was idealized as a poet s war The thousands of poems written about the conflict are memorable evidence of poetry s high cultural and political value in those historical conditions After Franco s victory and the repression that followed numerous Republican exiles relied on the symbolic agency of poetry to uphold a sense of national identity Exilic poems are often read as claim making narratives that fit national literary history This Ghostly Poetry critiques this conventional understanding of literary history by arguing that exilic poems invite readers to seek continuity with a traumatic past just as they prevent their narrative articulation The book uses the figure of the ghost to address temporal challenges to historical continuity brought about by memory tracing the discordant disruptive ways in which memory is interwoven with history in poems written in exile Taking a novel approach to cultural memory This Ghostly Poetry engages with literature history and politics while exploring issues of voice time representation and disciplinarity

The Poetry of Physics and the Physics of Poetry Robert K. Logan, 2010 This is a textbook for a survey course in physics taught without mathematics that also takes into account the social impact and influences from the arts and society It combines physics literature history and philosophy from the dawn of human life to the 21st century It will also be of interest to the general reader

Poet's Work, Poet's Play Daniel Tobin, Pimone Triplett, 2008 An indispensable resource for anyone interested in the art and craft of contemporary poetry

Browning, Victorian Poetics and the Romantic Legacy Dr Britta Martens, 2013-05-28 Taking an original approach to Robert Browning's poetics Britta Martens focuses on a corpus of relatively neglected poems in Browning's own voice in which he reflects on his poetry his self conceptualization and his place in the poetic tradition She analyzes his work in relation to Romanticism Victorian reactions to the Romantic legacy and wider nineteenth century changes in poetic taste to argue that in these poems as in his more frequently studied dramatic monologues Browning deploys varied dramatic methods of self representation often critically and ironically exposing the biases and limitations of the seemingly authoritative speaker Browning The poems thus become devices for Browning's detached evaluation of his own and of others poetics an evaluation never fully explicit but presented with elusive economy for the astute reader to interpret The confrontation between the personal authorial voice and the dramatic voice in these poems provides revealing insights into the poet's highly self conscious conflicted and sustained engagement with the Romantic tradition and the diversely challenging reader expectations that he faces in a post Romantic age As the Victorian most rigorous in his rejection of Romantic self expression Browning is a key transitional figure between the sharply antagonistic periods of Romanticism and Modernism He is also as Martens persuasively demonstrates a poet of complex contradictions and an illuminating case study for addressing the perennial issues of voice authorial authority and self reference

On the Nature of Poetry Kenneth Verity, 2007-06-01 The entire history of Western poetry is surveyed in this study from the ancient world the Middle Ages the Renaissance and the modern period Two hundred poems extracts are included and 10 poets are covered in depth with critical appraisals of their lives and work Problems of translation in poetry are carefully considered and the book provides a working definition of poetry calling it a form of expression human beings turn to when they need to say something important in a memorable way

A Persian Sufi Poem Bo Utas, 2017-07-28 This book first published in 1978 treats methods of describing the total and special vocabularies of a given text and demonstrates a procedure of description of the vocabulary of the Sufi Mathnavi poem *ar q ut ta q q* composed in the middle of the fourteenth century The book gives a complete concordance also indicating inflexional forms and a complete frequency word list of this New Persian text The word lists are followed by a statistical survey of the general vocabulary the Arabic loan words and the Sufi religious terminology

Resistance to Science in Contemporary American Poetry Bryan Walpert, 2011-09-26 This book examines types of resistance in contemporary poetry to the authority of scientific knowledge tracing the source of these resistances to both their literary precedents and the scientific zeitgeists that helped to produce them Walpert argues that contemporary poetry

offers a palimpsest of resistance using as case studies the poets Alison Hawthorne Deming Pattiann Rogers Albert Goldbarth and Joan Retallack to trace the recapitulation of romantic arguments inherited from Keats Shelly and Coleridge which in turn were produced in part in response to Newtonian physics modernist arguments inherited from Eliot and Pound arguments influenced in part by relativity and quantum theory and postmodernist arguments arguments informed by post structuralist theory e g Barthes Derrida Foucault with affinities to arguments for the limitations of science in the philosophy sociology and rhetoric of science Some of these poems reveal the discursive ideologies of scientific language reveal in other words the performativity of scientific language In doing so these poems themselves can also be read as performative acts and therefore as forms of intervention rather than representation Reading Retallack alongside science studies scholar Karen Barad the book concludes by proposing that viewing knowledge as a form of intervention rather than representation offers a bridge between contemporary poetry and science

Chinese Poetic Modernisms Paul Manfredi, Christopher Lupke, 2019-05-15 This volume of fourteen essays explores Chinese poetic modernism in all its facets from its origins in the 1920s through 21st century manifestations Modernisms in the plural reflects the complexity of the ideas and forms which can be associated with this literary historical term The volume s contributors take a variety of focus points from literary groups such as 9 Leaves or Bamboo Hat to individuals such as modernist sonneteer Feng Zhi or Taiwan experimentalist Xia Yu Hsia Y and Hong Kong modernist Leung Ping kwan to non biographically oriented chapters concerning modernist language poetry and visual art among other issues Collectively the volume endeavors to present as complete a picture of modernist practice in Chinese poetry as possible

W.H. Auden's Poetry R. Victoria Arana, 2009 W H Auden is perhaps the most important English language poet of the 20th century He produced marvelous poems even in his last days However critics and reviewers not only have not recognized the aesthetics of the poetry Auden wrote after 1965 but they have ignored or made prejudiced and disparaging remarks about it thus diverting subsequent critical and popular attention from its remarkable virtues The aim of W H Auden s *Poetry Mythos Theory and Practice* is to clarify Auden s career long interest in poetic theory and above all to show how his changing thoughts about poetry impelled him towards the production of the last three volumes of his verse Because it links the poet s biographia literaria and his aesthetic vision this book will appeal to poets as well as to students of writing particularly those interested in the creative process and its correlation to artistic forms Students of 20th century American and British literature will find in these pages a comprehensive survey of Auden s thoughts about his art and the poetry of his predecessors as well as of his contemporaries Teachers of Auden s works will appreciate the strong light such a survey casts on Auden s poetic practice Engineers and architects physicists and biologists cultural critics social scientists philosophers and especially Gestalt psychologists might well enjoy reading about the ways their fields have intersected and influenced the thinking of one of the twentieth century s most brilliant and courageous poets

Global Modernists on Modernism Alys Moody, Stephen J. Ross, 2020-01-23 Winner of the Modernist Studies Association MSA Edited Volume Prize

Bringing together works by writers from sub Saharan Africa Turkey central Europe the Muslim world Asia South America and Australia many translated into English for the first time this is the first collection of statements on modernism by writers artists and practitioners from across the world Annotated throughout the texts are supported by critical essays from leading modernist scholars exploring major issues in the contemporary study of global modernism *Global Modernists on Modernism* is an essential resource for students and scholars of modernism and world literature and one that opens up a dazzling new array of perspectives on the field

Nineteenth-Century Poetry and the Physical Sciences Gregory Tate, 2020-06-17 Poetical Matter examines the two way exchange of language and methods between nineteenth century poetry and the physical sciences The book argues that poets such as William Wordsworth Mathilde Blind and Thomas Hardy identified poetry as an experimental investigation of nature s materiality It also explores how science writers such as Humphry Davy Mary Somerville and John Tyndall used poetry to formulate their theories to bestow cultural legitimacy on the emerging disciplines of chemistry and physics and to communicate technical knowledge to non specialist audiences The book s chapters show how poets and science writers relied on a set of shared terms form experiment rhythm sound measure and how the meaning of those terms was debated and reimagined in a range of different texts A stimulating analysis of nineteenth century poetry and physics In this groundbreaking study Tate turns to sound to tease out fascinating continuities across scientific inquiry and verse Reflecting that the processes of the universe were themselves rhythmic he shows that a wide range of poets and scientists were thinking through undulatory motion as a space where the material and the immaterial met The motion of waves Tate demonstrates was the exemplary form in the physical sciences Sound waves light energy and poetic meter were each characterized by a process of undulation that could be understood as both a physical and a formal property Drawing on work in new materialism and new formalism Tate illuminates a nineteenth century preoccupation with dynamic patterning that characterizes the undulatory as in John Herschel s words not things but forms Anna Henschman Associate Professor of English at Boston University USA This impressive study consolidates and considerably advances the field of physics and poetry studies Moving easily and authoritatively between canonical and scientist poets *Nineteenth Century Poetry and the Physical Sciences* draws scientific thought and poetic form into telling relation disclosing how they were understood variously across the nineteenth century as both comparable and competing ways of knowing the physical world Clearly written and beautifully structured *Nineteenth Century Poetry and the Physical Sciences* is both scholarly and accessible a fascinating and indispensable contribution to its field Daniel Brown Professor of English at the University of Southampton UK Essential reading for Victorianists Tate s study of nineteenth century poetry and science reconfigures debate by insisting on the equivalence of accounts of empirical fact and speculative theory rather than their antagonism The undulatory rhythms of the universe and of poetry the language of science and of verse come into new relations Tate brilliantly re reads Coleridge Tennyson Mathilde Blind and Hardy through their explorations of matter and ontological reality He also addresses

contemporary theory from Latour to Jane Bennett Isobel Armstrong Emeritus Professor of English at Birkbeck University of London UK *Poetry, Physics, and Painting in Twentieth-Century Spain* C. Gala, 2011-11-18 This book reads the work of Salinas Guill n Larrea Diego Alberti M ndez and Lorca in analogical relation with Cubism and with the revolutionary discoveries of modern physics Gala advances traditional criticism by considering these artists in the broader cultural context of Spain Europe and European Modernism

Between Languages Sarah Lynn Higley, 2010-11-01 Early Welsh and Old English poetry are rarely spoken of together but when they are they have been described as like or different from one another Sarah Higley breaks this cycle of mutual marginalization by examining what it means to read otherness or sameness into a text concluding that too much of our reading is anglo centric in its expectations and dictated by invisible ideological agendas Examinations of the Llywarch Hen Corpus for instance have sought comparisons among the Old English elegies but mainly for the purpose of demonstrating how the Welsh are of a color with them derived from the same penitential genre merely less explicit in their penitential thrust Scholars have been reluctant to acknowledge the secular nature of these Welsh laments which are discomfitingly silent about divine solace and which like the Old English poems do not cooperate with our efforts to categorize them The author reexamines notions of genre category and poetic explicitness and how they snare us Higley sees the English and Welsh traditions as foils to one another rather than as template and variation and she starts with the connection of natural image and emotion employed differently in these two contiguous but separate traditions She shows how the English poems long thought to be disjointed and cryptic are invested in explanation and disclosure to a degree that the Welsh are not The Welsh omissions might be better understood as dynamic juxtapositions wherein other poetic aspects metrics imagery context serve to link ideas perhaps even to disrupt them She sees difficulty ambiguity and dialogism as loci of power neither accidents of our reading distance nor defects in other classical standards of wholeness Reading the English and the Welsh together with a respect for the mutual differences helps us to get beyond some of the clich e s about what is English and familiar and what is Celtic and other Her argument revolves around the plight of the lone human as he or she is depicted in these texts in a precarious state of connection with the rest of the world caught between society and wilderness inside and outside sacred and secular meaning and nonmeaning This focus on connection informs the title as well between languages expresses our position as readers reading two different cultures together reading ancient literature mediated through modern poetic theory and the position of medieval scholarship in its struggle between traditional and postmodern approaches Between Languages brings obscure and moving poems into a wider academic orbit offering new editions and translations of Old English and Early Welsh elegies wisdom poems and enigmata including one of the few complete English translations in this century of a vatic text from The Book of Taliesin
