Countering the Proliferation of Weapons of Mass Destruction Thanos P Dokos, 2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West's massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have been used in the past the region's geographic proximity to Europe and the vital interests of the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO's political and military posture Thanos P Dokos presents an assessment of the Alliance's options for dealing with the problem This book represents

Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes The Oxford

Weeramantry, 2023-12-11 This work an important bridge between the worlds of science and law is one of a series but may be purchased separately It is one of the most detailed studies thus far on the interrelationship of science and technology with the growing discipline of human rights Apart from general perspectives it also deals specifically with the obligations of doctors engineers nuclear scientists computer technologists genetic engineers genetic counsellors mining technologists and others No library of science medicine engineering or technology of any description should be without it for it provides an irreducible minimum of human rights knowledge without which these disciplines cannot function in the next century with due regard to their social and human rights implications Not all scientists will agree with all the author s views but he poses them challengingly and brings into the open a number of major issues which can no longer be ignored The volume is a plea for an interdisciplinary and broad based approach to scientific problems scientific education and continuing education of scientists It places the scientific endeavour in its overall social and human rights context in a manner which neither students of science nor established scientists can ignore With an approach which is both imaginative and practical it explores the future of scientific endeavour in a humanistic perspective American Defense Policy Miriam Krieger, Lynne Chandler Garcia, John Riley, Will Atkins, 2021-08-10 A vital text for understanding the twenty first century battlefield and the shifting force structure this book prepares students to think critically about the rapidly changing world they ll inherit American Defense Policy first published in 1965 under the leadership of Brent Scowcroft has been a mainstay in courses on political science international relations military affairs and American national security for more than 50 years This updated and thoroughly revised ninth edition which contains about 30% all new content considers questions of continuity and change in America s defense policy in the face of a global climate beset by geopolitical tensions rapid technological change and terrorist violence The book is organized into three parts Part I examines the theories and strategies that shape America s approach to security policy Part II dives inside the defense policy process exploring the evolution of contemporary civil military relations the changing character of the profession of arms and the issues and debates in the

budgeting organizing and equipping process Part III examines how purpose and process translate into American defense policy This invaluable and prudent text remains a classic introduction to the vital security issues the United States has faced throughout its history It breaks new ground as a thoughtful and comprehensive starting point to understand American defense policy and its role in the world today Contributors Gordon Adams John R Allen Will Atkins Deborah D Avant Michael Barnett Sally Baron Jeff J S Black Jessica Blankshain Hal Brands Ben Buchanan Dale C Copeland Everett Carl Dolman Jeffrey Donnithorne Daniel W Drezner Colin Dueck Eric Edelman Martha Finnemore Lawrence Freedman Francis Fukuyama Michael D Gambone Lynne Chandler Garcia Bishop Garrison Erik Gartzke Mauro Gilli Robert Gilpin T X Hammes Michael C Horowitz G John Ikenberry Bruce D Jones Tim Kane Cheryl A Kearney David Kilcullen Michael P Kreuzer Miriam Krieger Seth Lazar Keir A Lieber Conway Lin Jon R Lindsay Austin Long Joseph S Lupa Jr Megan H MacKenzie Mike J Mazarr Senator John McCain Daniel H McCauley Michael E McInerney Christopher D Miller James N Miller John A Nagl Henry R Nau Ren e de Nevers Joseph S Nye Jr Michael E O Hanlon Mancur Olson Jr Sue Payton Daryl G Press Thomas Rid John Riley David Sacko Brandon D Smith James M Smith Don M Snider Sir Hew Strachan Michael Wesley Richard Zeckhauser

The Technology Trap Lloyd J. Dumas, 2010-09-02 In this eye opening book author Lloyd J Dumas argues that our capacity for developing ever more powerful technologies and the unavoidable fallibility of both machine and man will lead us towards a disaster of an unprecedented scale Most of us assume that those in charge can always find a way to control any technology mankind creates no matter how powerful But in a world of imperfect human beings who are prone to error emotion and sometimes to malevolent behavior this could be an arrogant and disastrous assumption This book is filled with compelling factual stories that illustrate how easy it is for situations to go terribly wrong despite our best efforts to prevent any issue The author is not advocating an anti technology return to nature nor intending to highlight the marvels of our high tech world Instead the objective is to reveal the potential for disaster that surrounds us in our modern world elucidate how we arrived at this predicament explain the nature and ubiquity of human fallibility expose why proposed solutions to these Achilles heels cannot work and suggest alternatives that could thwart human induced technological disasters *Future Survey Annual 1987* Michael Marien, 1988-01-01

The Need for a New Economic System John Scales Avery, 2016-02-07 It is clear that our present economic system is unsustainable Never ending exponential industrial growth on a finite planet is a logical absurdity We are already using resources at a rate which it would take 1 6 planet earths to replace We are already undermining the ecological systems which support all of life Our present economic system has led to an unbelievable degree of economic inequality To maintain this inequality both between nations and within nations military force is used and democracy is replaced by oligarchy The future of human civilization is endangered both by the threat of thermonuclear war and by the threat of catastrophic climate change and both of the twin threats are results of our present economic system This book documents in detail the serious economic problems of today s world and it also proposes sustainable solutions
