All Things Act Assistant Professor of Philosophy Mercedes Valmisa, Mercedes Valmisa, 2025 This book explores the collective character of action to expand the ways we think about agency First it resists viewing agency as a capacity much less one exclusive to humans Instead it defines agency as an umbrella term for the concrete sociomaterial processes that emerge from the collaborative efforts of multiple entities acting together Agency isn t the faculty of an individual entity or self it s always the function of a network or assembly of actors Second many of the actors involved in these processes are nonhuman things without intentions will or even awareness This relational and collective approach adopts a conception of action that doesn t hinge on mental states To act is to participate in contribute to shape facilitate organize constrain and modify the course of events This book argues that there s no such thing as an individual action and that agency is collectively distributed across a heterogeneous field of human and nonhuman actors Provided by publisher

Bronze and Stone Yunchiahn C. Sena, 2019-04-01 Despite China s long tradition of venerating the past as the ultimate source of cultural authority the discourse of antiquity prior to the Song period 960 1279 demonstrated little concern for ancient objects With a focus on physical artifacts of the past Song intellectuals began a new discipline the study of bronze and stone jinshixue that generated collections of items such as bronze vessels and bells stone steles and ink rubbings of inscriptions carved or cast on objects This first comprehensive study in English of the Song antiquarian movement and how it refashioned the distant past uses textual and material evidence to examine this development which has had long lasting influence on Chinese intellectual

history and on the preservation of material objects In addition to collecting and comparing artifacts Song antiquaries compiled extensive catalogs that included drawings measurements and meticulous descriptions Their studies have contributed to the way history has been documented since the eleventh century and serve as a basis for archaeology of the modern period Bronze and Stone contextualizes the Song antiquarian movement among previous Chinese engagements with antiquity subsequent popular interest in ancient objects and world antiquarianism
