*A Franz Boas Reader* Franz Boas, 1989-03-15 The Shaping of American Anthropology is a book which is outstanding in many respects Stocking is probably the leading authority on Franz Boas he understands Boas's contributions to American anthropology as well as anthropology in general very well He is in a word the foremost historian of anthropology in the world today The reader is both a collection of Boas's papers and a solid 23 page introduction to giving the background and basic assumptions of Boasian anthropology David Schneider University of Chicago While Stocking has not attempted to present a person biography nevertheless Boas's personal characteristics emerge not only in his scholarly essays but perhaps more vividly in his personal correspondence Stocking is to be commended for collecting this material together in a most interesting and enjoyable reader Gustav Thaiss American Anthropologist Shaping American Anthropology Stocking, 1974-07-11 The Shaping of American Anthropology, 1883-1911 Franz Boas, 1974 *A Social History of Anthropology in the United States* Thomas C. Patterson, 2020-05-12 In part due to the recent Yanomami controversy which has rocked anthropology to its very core there is renewed interest in the discipline's history and intellectual roots especially amongst anthropologists themselves The cutting edge of anthropological research today is a product of earlier questions and answers previous ambitions preoccupations and adventures stretching back one hundred years or more This book is the first comprehensive history of American anthropology Crucially Patterson relates the development of anthropology in the United States to wider historical currents in society American anthropologists over the years have worked through shifting social and economic conditions changes in institutional organization developing class structures world politics and conflicts both at home and abroad How has anthropology been linked to colonial commercial and territorial expansion in the States How have the changing forms of race power ethnic identity and politics shaped the questions anthropologists ask both past and present Anthropology as a discipline has always developed in a close relationship with other social sciences but this relationship has rarely been scrutinized This book details and explains the complex interplay of forces and conditions that have made anthropology in America what it is today Furthermore it explores how anthropologists themselves have contributed and propagated powerful images and ideas about the different cultures and societies that make up our world This book will be essential reading for anyone interested in understanding the roots and reasons behind American anthropology at the turn of the twenty first century Intellectual historians social scientists and anyone intrigued by the growth and development of institutional politics and practices should read this book **An Analysis of Franz Boas's Race, Language and Culture** Anna Seiferle-Valencia, 2017-07-05 Born in 1858 Franz Boas permanently changed the standards and practices of anthropology His 1940 work *Race Language and Culture* brings together a half century's worth of ground breaking scholarship in one volume **The Collage Aesthetic in the Harlem Renaissance** Rachel Farebrother, 2016-12-05 Beginning with a subtle and persuasive analysis of the cultural context Farebrother examines collage in modernist and Harlem Renaissance figurative art

and unearths the collage sensibility attendant in Franz Boas's anthropology. This strategy makes explicit the formal choices of Harlem Renaissance writers by examining them in light of African American vernacular culture and early twentieth century discourses of anthropology, cultural nationalism and international modernism. At the same time, attention to the politics of form in such texts as Toomer's *Cane*, Locke's *The New Negro* and selected works by Hurston reveals that the production of analogies, juxtapositions, frictions and distinctions on the page has aesthetic, historical and political implications. Why did these African American writers adopt collage form during the Harlem Renaissance? What did it allow them to articulate? These are among the questions Farebrother poses as she strives for a middle ground between critics who view the Harlem Renaissance as a distinctive and necessarily subversive kind of modernism and those who foreground the cooperative nature of interracial creative work during the period. A key feature of her project is her exploration of neglected connections between Euro American modernism and the Harlem Renaissance, a journey she negotiates while never losing sight of the particularity of African American experience. Ambitious and wide ranging, Rachel Farebrother's book offers us a fresh lens through which to view this crucial moment in American culture.

**Scenes from the High Desert** Virginia Kerns, 2010-10-01 If a religion cannot attract and instruct young people, it will struggle to survive, which is why recreational programs were second only to theological questions in the development of twentieth century Mormonism. In this book, Richard Ian Kimball explores how Mormon leaders used recreational programs to ameliorate the problems of urbanization and industrialization and to inculcate morals and values in LDS youth. As well as promoting sports as a means of physical and spiritual excellence, Progressive Era Mormons established a variety of institutions such as the Deseret Gymnasium and camps for girls and boys, all designed to compete with more worldly attractions and to socialize adolescents into the faith. Kimball employs a wealth of source material, including periodicals, diaries, journals, personal papers and institutional records, to illuminate this hitherto underexplored aspect of the LDS church. In addition to uncovering the historical roots of many Mormon institutions still visible today, *Sports in Zion* is a detailed look at the broader functions of recreation in society.

**Visions of Culture** Jerry D. Moore, 2018-11-09 *Visions of Culture: An Introduction to Anthropological Theories and Theorists*, Fifth Edition, has been updated and expanded and provides a succinct, clear and balanced introduction to theoretical developments in the field. The key ideas of thirty major theorists are briefly described and unique to this textbook, linked to the biographical and fieldwork experiences that helped shape their theories. The impact of each scholar on contemporary anthropology is presented along with numerous examples, quotations from the theorists' writings and a description of the broader intellectual setting in which these anthropologists worked. In addition to six new chapters, Moore has updated all the profiles to incorporate recent scholarship. The book is linked to the companion work *Visions of Culture: A Reader*, Second Edition, to encourage the fullest intellectual engagement for students. **NEW TO THIS EDITION** Part VII: Neo-Darwinian Evolutionary Theories 25 Eric Alden Smith, *Human Behavioral Ecology* 26 John Tooby and Leda Cosmides, *The Evolved Mind* 27 Robert Boyd and Peter Richerson, *Culture and Evolution*

Dual Inheritance Theory Part VIII The Ontological Turn 28 Tim Ingold An Intersubjective World 29 Philippe Descola Nature and Culture 30 Bruno Latour The Creation of Knowledge      *Dispersing the Ghetto* Jack Glazier, 2018-10-18 In the early twentieth century the population of New York City's Lower East Side swelled with the arrival of vast numbers of eastern European Jewish immigrants. The teeming settlement whose inhabitants faced poverty and frequent unemployment provoked the attention of immigration restrictionists. Established American Jews, arrivals from the German states only a generation before, feared that their security might be threatened by the newcomers. They established the Industrial Removal Office (IRO) to assist in relocating the immigrants to the towns and cities of the nation's interior. *Dispersing the Ghetto* is the first book to describe in detail this important but little known chapter in American immigration history. Founded in 1901, the IRO for nearly two decades directed the resettlement of Jewish immigrants in New York and other port cities to hundreds of communities nationwide where the prospects of employment and rapid assimilation were brighter. Drawing on a variety of sources including the IRO archive, local records, first person accounts of resettlement, and the lively Jewish press, Jack Glazier recounts the operations of the IRO and the experiences of those it aided. He closely examines the complex relationship between the two sets of Jewish immigrants, emphasizing the mix of motives underlying the assistance the American Jews of German origin rendered the newcomers from eastern Europe.

*Linguistic Relativities* John Leavitt, 2010-12-23 There are more than six thousand human languages, each one unique. For the last five hundred years, people have argued about how important language differences are. This book traces that history and shows how language differences have generally been treated, either as of no importance or as all important, depending on broader approaches taken to human life and knowledge. It was only in the twentieth century, in the work of Franz Boas and his students, that an attempt was made to engage seriously with the reality of language specificities. Since the 1950s, this work has been largely presented as yet another claim that language differences are all important, by cognitive scientists and philosophers who believe that such differences are of no importance. This book seeks to correct this misrepresentation and point to the new directions taken by the Boasians, directions now being recovered in the most recent work in psychology and linguistics.

*Franz Boas* Noga Arikha, 2025-05-13 A thought provoking account of the life and work of Franz Boas and his influential role in shaping modern anthropology. Franz Boas (1858-1942) is widely acknowledged for his pioneering work in the field of cultural anthropology. His rigorous studies of variations across societies were aimed at demonstrating that cultures and peoples were not shaped by biological predispositions. This book traces Boas's life and intellectual passions from his roots in Germany and his move to the United States in 1884, partly in response to growing antisemitism in Germany, to his work with First Nations communities and his influential role as a teacher, mentor, and engaged activist who inspired an entire generation. Drawing from Boas's numerous but rarely read writings, Noga Arikha brings to life the man and the ideas he developed about the complex interplay of mind and culture, biology and history, language and myth. She provides a comprehensive picture of the cultural

contexts in which he worked of his personal and professional relationships and of his revolutionary approach to fieldwork He was celebrated in his lifetime for the cultural relativism he developed and the arguments he marshaled against entrenched racialism But his was a constant battle and Arikha shows how urgently relevant his voice and legacy have become again today

**The Quest for Jewish Assimilation in Modern Social Science** Amos Morris-Reich, 2008-01-15 The transformation of the human sciences into the social sciences in the third part of the 19th century was closely related to attempts to develop and implement methods for dealing with social tensions and the rationalization of society This book studies the connections between academic disciplines and notions of Jewish assimilation and integration and demonstrates that the quest for Jewish assimilation is linked to and built into the conceptual foundations of modern social science disciplines Focusing on two influential assimilated Jewish authors anthropologist Franz Boas and sociologist Georg Simmel this study shows that epistemological considerations underlie the authors' respective evaluations of the Jews' assimilation in German and American societies as a form of group extinction or as a form of social identity This conceptual model gives a new key to understanding pivotal issues in recent Jewish history and in the history of the social sciences

*Undisciplined* Nihad Farooq, 2016-07-19 In the 19th century personhood was a term of regulation and discipline in which slaves criminals and others could be made and unmade Yet it was precisely the fraught uncontainable nature of personhood that necessitated its constant legislation wherein its meaning could be both contested and controlled Examining scientific and literary narratives Nihad M Farooq's *Undisciplined* encourages an alternative consideration of personhood one that emerges from evolutionary and ethnographic discourse Moving chronologically from 1830 to 1940

Farooq explores the scientific and cultural entanglements of Atlantic travelers in and beyond the Darwin era and invites us to attend more closely to the consequences of mobility and contact on disciplines and persons Bringing together an innovative group of readings from field journals diaries letters and testimonies to novels stage plays and audio recordings Farooq advocates for a reconsideration of science personhood and the priority of race for the field of American studies Whether expressed as narratives of acculturation or as acts of resistance against the camera the pen or the shackle these stories of the studied subjects of the Atlantic world add a new chapter to debates about personhood and disciplinarity in this era that actively challenged legal social and scientific categorizations **A History of Anthropological Theory** Paul A.
