Enchantment

If a player would draw a card, that player removes the top card of an opponent's library from the game face down instead. Each player may look at and play cards he or she removed from the game with Shared Fate as though they were in his or her hand.

Shared Fate:

Canadian Environments Robert C. Thomsen, 2005 Responding to the comprehensive topic Old Environments New Environments scholars from a variety of disciplines reflect the various connotations that the term environment carries in a Canadian context Whether moving within the realm of foreign policy visual arts constitutional questions tourism nature preservation or aboriginal rights these essays put the capaciousness and cohesiveness of the nation to the test by illustrating the pressures enforced upon it by multiculturalism the claims for self determination anti confederate agitation and globalisation The environments scrutinised are many and various but within each the linchpin remains the quest for identity on the part of the individual the group or the nation at large Individually as well as collectively the essays in this volume constitute an important contribution to the ongoing debate on Canadianness

Emotion and Traumatic Conflict

Michalinos Zembylas, 2015-07-01 Do the emotional responses of students and to traumatic conflict constitute insurmountable obstacles in peace education efforts How do hegemonic narratives shape the emotions of ethnic identity and collective memory and what can be done pedagogically to transform the powerful influence of such narratives and emotions Can peace education efforts that foreground emotion in critical ways become a productive pedagogical intervention in conflicted societies Emotion and Traumatic Conflict takes us through an ethnographic journey into a specific site of conflict to show how emotions are entangled with educational efforts towards peacebuilding healing and reconciliation While sociologists anthropologists historians and political scientists have long analyzed the emotional dynamics of conflict and peace rarely have educators looked into the emotional complexities of traumatic conflict the impact of emotion in everyday school interactions and pedagogical practices and the consequences of the role of emotion in what has become known as critical peace education This book not only offers an analysis of the emotional consequences of traumatic conflict in schools it also develops an innovative compelling and cross disciplinary perspective on the entanglement of emotion power politics trauma healing and critical education The book provides a detailed ethnographic analysis of the ideological appropriation of emotions of conflict in schools yet it pushes boundaries further through a theorization of the consequences of this appropriation and the pedagogical interventions required to challenge undermine or subvert this process Zembylas argues that these pedagogical interventions rooted in both psychoanalytic and socio political perspectives of trauma and emotion ought to engage emotions as critical and transformative forces in peace education Grounded in recent literature on affect and emotion that spans the social sciences Zembylas's analysis of the emotions of traumatic conflict in education offers a provocative proposal for the role of critical peace education in healing and reconciliation

Citizenship and Education in

Liberal-Democratic Societies Kevin McDonough, Walter Feinberg, 2003-08-28 The essays in this volume address the educational issues which arise when national sub national and supra national identities compete How can we determine the limits of parental educational rights when the concern of liberalism to protect and promote children's autonomy conflicts

with the desire to maintain communal integrity Given the advances made by the forces of globalization can the liberal democratic state morally justify its traditional purpose of forging a cohesive national identity Or has increasing globalization rendered this educational aim obsolete and morally corrupt Should liberal education instead seek to foster a sense of global citizenship even if doing so would suppress patriotic identification In addressing these and many other questions the volume examines the theoretical and practical issues at stake between nationalists multiculturalists and cosmopolitans in the field of education The fifteen essays plus an introductory essay by the editors provide a genuine productive dialogue between political and legal philosophers and educational theorists

Representation and Democratic Theory David Laycock, 2011-11-01 With public confidence in representative institutions dropping to distressing levels it is time for political theorists to reconnect issues of representation to considerations of justice rights citizenship pluralism and community Representation and Democratic Theory investigates theoretical and practical aspects of innovative political representation in the early twenty first century It reveals the complexity of contemporary political representation and the importance of reinvigorating public life outside legislatures political parties and competitive elections A crucial supplement to empirical studies of conventional political representation this book offers a timely and thought provoking contribution to contemporary democratic theory It will be a necessary and welcome addition to the libraries of many political and social scientists

Psychology and Social Responsibility Sylvia Staub, Paula Green, 1992-06 This book brings together for the first time many of the leading writers and thinkers from the psychological and mental health fields Contributors include Robert Jay Lifton Joanna Macy Roger Walsh and others

English and Translation in the European Union Alice Leal, 2021-06-20 This book explores the growing tension between multilingualism and monolingualism in the European Union in the wake of Brexit underpinned by the interplay between the rise of English as a lingua franca and the effacement of translations in EU institutions bodies and agencies English and Translation in the European Union draws on an interdisciplinary approach highlighting insights from applied linguistics and sociolinguistics translation studies philosophy of language and political theory while also looking at official documents and online resources most of which are increasingly produced in English and not translated at all and the ones which are translated into other languages are not labelled as translations In analysing this data Alice Leal explores issues around language hierarchy and the growing difficulty in reconciling the EU's approach to promoting multilingualism while fostering monolingualism in practice through the diffusion of English as a lingua franca as well as questions around authenticity in the translation process and the boundaries between source and target texts The volume also looks ahead to the implications of Brexit for this tension while proposing potential ways forward encapsulated in the language turn the translation turn and the transcultural turn for the EU Offering unique insights into contemporary debates in the humanities this book will be of interest to scholars in translation studies applied linguistics and sociolinguistics philosophy and political theory

Decent People Norman S. Care, 2000 In this book Norman S Care

addresses the question of what it is to be a good or decent person His discussion is centered on motivation issues rather than on the content of moral principles or the imperatives of ethical theory He argues that decent people are constrained by moral emotional nature to take certain things seriously and this is part of what it means to have a moral life The background of the discussion is the world around us The world is no extension of the affluence that shields a few of us it is instead a sea of pain and despair with only small and sometimes temporary islands of stability and prosperity

Citizenship under Fire Sigal R. Ben-Porath, 2009-03-02 Citizenship under Fire examines the relationship among civic education the culture of war and the quest for peace Drawing on examples from Israel and the United States Sigal Ben Porath seeks to understand how ideas about citizenship change when a country is at war and what educators can do to prevent some of the most harmful of these changes Perhaps the most worrisome one Ben Porath contends is a growing emphasis in schools and elsewhere on social conformity on tendentious teaching of history and on drawing stark distinctions between them and us As she writes The varying characteristics of citizenship in times of war and peace add up to a distinction between belligerent citizenship which is typical of democracies in wartime and the liberal democratic citizenship that is characteristic of more peaceful democracies Ben Porath examines how various theories of education principally peace education feminist education and multicultural education speak to the distinctive challenges of wartime She argues that none of these theories are satisfactory on their own theoretical terms or would translate easily into practice In the final chapter she lays out her own alternative theory expansive education which she believes holds out more promise of widening the circles of participation in schools extending the scope of permissible debate and diversifying the questions asked about the opinions voiced

Secondary Data Analysis John Goodwin, 2012-07-23 One central and enduring image of the social science researcher is of an individual who commits a great deal of time to collecting original primary data from a field of enquiry This approach is often underpinned by a sincerely held belief that key research questions can only be explored by the collection of ever new and ever greater amounts of data or that already existing data are insufficient for researchers to test their ideas Yet such an approach to social science research can be problematic not least because the collection of primary data can be an expensive time consuming and even wasteful approach to social enquiry Secondary analysis can serve many purposes as well as being a valid approach in its own right However despite its widespread application secondary analysis is often undervalued or perceived to be the preserve of only those interested in the re use of large scale survey data Highlighting both the theory and practice of secondary analysis and the use of secondary sources this collection considers the nature of secondary analysis as a research tool reflects on the definitional debates surrounding terms such as secondary analysis data re use and restudies illustrates how secondary analysis is used in social science research and finally reviews the practical methodological and ethical aspects of secondary analysis

Four Ethical Methodological and Practical Issues in Secondary Analysis Cosmopolitanism and the Legacies of Dissent Tamara Caraus, Camil Alexandru Parvu, 2014-07-17 The core idea shared by all cosmopolitan views is that all human beings belong to a single community and the ultimate units of moral concern are individual human beings not states or particular forms of human associations Nevertheless the attempts to ground a political theory on overarching universal principles is in contradiction with the plurality of social cultural political religious interpretative standpoints in the contemporary world Is dissent cosmopolitan Is there a legacy of dissent for a theory of cosmopolitanism This book is a comparative historical analysis of dissident thought and practice for contemporary debates on cosmopolitanism Divided into two parts the editors and contributors explore the contribution of paradigmatic dissidents like Gandhi Martin Luther King Havel Sakharov Mandela Liu Xiaobo Aung San Suu Kyi towards a post universalist cosmopolitan theory Part Two examines the inherent cosmopolitanism of the seemingly peripheral dissent of contemporary forms of protests resistance direct action like NO TAV movement and Occupy Wall Street A timely book which allows for a much needed new engagement in contemporary debates of cosmopolitanism we learn how practical resistance to totalizing hegemonic claims is generated and how dissident thinking might contribute to new enriched ways of conceiving the non totalizing foundations of cosmopolitanism An innovative look at what lessons can scholars of cosmopolitanism learn from dissent dissident movements and what the role of dissent in cosmopolitan democracy could be **Education, Justice & Democracy** Danielle Allen, Rob Reich, 2022-12-22 Education is a contested topic and not just politically For years scholars have approached it from two different points of view one empirical focused on explanations for student and school success and failure and the other philosophical focused on education s value and purpose within the larger society Rarely have these separate approaches been brought into the same conversation Education Justice and Democracy does just that offering an intensive discussion by highly respected scholars across empirical and philosophical disciplines The contributors explore how the institutions and practices of education can support democracy by creating the conditions for equal citizenship and egalitarian empowerment and how they can advance justice by securing social mobility and cultivating the talents and interests of every individual Then the authors evaluate constraints on achieving the goals of democracy and justice in the educational arena and identify strategies that we can employ to work through or around those constraints More than a thorough compendium on a timely and contested topic Education Justice and Democracy exhibits an entirely new more deeply composed way of thinking about education as a whole and its importance to a good society **The Jewish Political Tradition** Michael Walzer, Menachem Lorberbaum, Noam Zohar, Yair Lorberbaum, 2000-01-01 The third of four volumes in a distinguished series this volume includes chapters on the nature of the communal bond marriage and family welfare taxation government and criminal justice The four volume series on the Jewish political tradition that includes this volume seeks to connect the political thought of ancient Israel and the Diaspora with the emerging traditions of the modern Israeli state The first two volumes dealt with authority and membership

respectively this third volume with Madeline Kochen as coeditor deals with community with chapters on the communal bond marriage and family welfare taxation government and criminal justice

American Public Education and the Responsibility of its Citizens Sarah M. Stitzlein, 2017-06-01 Public school systems are central to a flourishing democracy where children learn how to solve problems together build shared identities and come to value justice and liberty for all However as citizen support for public schools steadily declines our democratic way of life is increasingly at risk Often we hear about the poor performances of students and teachers in the public school system but as author Sarah M Stitzlein asserts in her compelling new volume the current educational crisis is not about accountability but rather citizen responsibility Now more than ever citizens increasingly do not feel as though public schools are our schools forgetting that we have influence over their outcomes and are responsible for their success In effect accountability becomes more and more about finding failure and casting blame on our school administrators and teachers rather than taking responsibility as citizens for shaping our expectations of the classroom determining the criteria we use to measure its success and supporting our public schools as they nurture our children for the future *American Public Education and the Responsibility of its Citizens* sheds an important light on recent shifts in the link between education and citizenship helping readers to understand not only how schools now work but also how citizens can take an active and influential role in shaping them Moving from philosophical critique of these changes to practical suggestions for action Stitzlein provides readers with the tools habits practices and knowledge necessary to support public education Further by sharing examples of citizens and successful communities that are effectively working with their school systems Stitzlein offers a torch of hope to sustain citizens through this difficult work in order to keep our democracy strong

economy and so forth are lived fictions They orient our national identity and shape our understanding of political legitimacy responsibility and action John Grant persuasively details why the project of political unity fails it distorts our lived experiences and allows inequality and domination to take root Canada promises unity through democratic politics reconciliation with Indigenous peoples a welfare state that protects the vulnerable and a multicultural approach to cultural relations This book documents the historical failure of these promises and elaborates the kinds of radical institutional and intellectual changes needed to overcome our lived fictions
