Shared Vulnerability The Media And American Perceptions Of The Bhopal Disaster:

Shared Vulnerability Lee Wilkins, 1987-04-21 This book chronicles the American media's coverage of the 1984 chemical spill in Bhopal India and its aftermath in the US. It explains how the press reported about Bhopal and examines journalism's subsequent influence on public perceptions about technological safety. It is an excellent addition to university collections in science writing, journalism criticism, and mass media research and should be useful to undergraduates at all levels. Choice
More than two years after the Bhopal disaster, fatalities and illnesses in this central Indian city continue to be reported by US media. Litigation involving Union Carbide still makes the front page. In this new book, Professor Wilkins offers a unique case study of news accounts of the worst industrial accident in history, combining a detailed review of media coverage with an analysis of public reaction to those reports.

Vulnerability and Security in Human Rights Literature and Visual Culture Alexandra Schultheis Moore, 2015-10-23 This book responds to the failures of human rights the way its institutions and norms reproduce geopolitical imbalances and social exclusions through an analysis of how literary and visual culture can make visible human rights claims that are foreclosed in official discourses. Moore draws on theories of vulnerability, precarity, and dispossession to argue for the necessity of recognizing the embodied and material contexts of human rights subjects. At the same time, she demonstrates how these theories run the risk of reproducing the structural imbalances that lie at the core of critiques of human rights. Pairing conventional human rights genres—legal instruments, human rights reports, reportage, and humanitarian campaigns—with literary and visual culture, Moore develops a transnational feminist reading praxis of five sites of rights and their violation over the past fifty years: UN human rights instruments and child soldiers in Nigerian literature; human rights reporting and novels that address state-sponsored ethnocide in Zimbabwe; the international humanitarian campaigns and disaster capitalism in fiction of Bhopal India; the work of M. decins Sans Frontières in the Sahel; Afghanistan, Democratic Republic of Congo, and Burma as represented in various media campaigns and in photographic narratives; and finally, the human rights campaigns, fiction, and film that have brought Indonesia's history of anti-leftist violence into contemporary public debate. These case studies underscore how human rights norms are always subject to conditions of imaginative representation and how literature and visual culture participate in that cultural imaginary. Expanding feminist theories of embodied and imposed vulnerability, Moore demonstrates the importance of situating human rights violations not only in the context of neo-liberal development policies but also in relation to the growth of security networks that serve the nation-state, often at the expense of the security of specific subjects and populations. In place of conventional victims and agents, the intersection of vulnerability and human rights opens up readings of human rights claims and suffering that are at once embodied and shareable yet which run the risk of cooptation by security rhetoric.

Advocacy after Bhopal Kim Fortun, 2009-05-04 The 1984 explosion of the Union Carbide chemical plant in Bhopal India was undisputedly one of the world's worst industrial disasters. Some have argued that the resulting litigation provided an innovative model for dealing

with the global distribution of technological risk others consider the disaster a turning point in environmental legislation still others argue that Bhopal is what globalization looks like on the ground Kim Fortun explores these claims by focusing on the dynamics and paradoxes of advocacy in competing power domains She moves from hospitals in India to meetings with lawyers corporate executives and environmental justice activists in the United States to show how the disaster and its effects remain with us Spiraling outward from the victims stories the innovative narrative sheds light on the way advocacy works within a complex global system calling into question conventional notions of responsibility and ethical conduct Revealing the hopes and frustrations of advocacy this moving work also counters the tendency to think of Bhopal as an isolated incident that can't happen here

Accountability and Corporate Human Rights Violations in Tort and International Law

Emmanuel Nartey, 2021-10-04 This volume identifies a coherent legal principle in order to establish a novel duty of care for corporate human rights violations and environmental damages It examines whether tort and civil law offer better accountability and remedies for victims of corporate human rights abuses and carries out an in depth and critical analysis of the concept of corporate accountability Moreover a fundamental part of this book is devoted to examining the extent to which international criminal law influences international human rights law in its use of tort law and civil law remedies Finally the book sets out a theoretical mechanism for duty of care as well as a proposal for the establishment of a Hybrid International Transnational Corporation Court that would have the potential to effectively interpret the concept of the corporate duty of care under tort law
