legal framework main tourist destinations leisure itineraries and hotel information Killers in the Water - The New Super Sharks Terrorising The World's Oceans Sue Blackhall, 2012-07-27 Sharks are intriguing and beautiful creatures but they can also be deadly As we humans have explored the world's oceans and exploited them for tourism and recreation we have found ourselves coming into contact with more and more sharks And the outcome can be fatal From the Seychelles to South Africa and Australia to North America tourists divers and surfers have seemingly found themselves under increased threat from unprovoked shark attacks Fatal attacks have occurred in locations that were previously thought to be safe and in late 2010 the Egyptian resort of Sharm el Sheikh was rocked by an incredible five shark attacks in a matter of weeks But are sharks really ruthless vicious killers or are they simply reacting to humans invading their habitat Has the number of shark attacks increased in recent years What can be done to prevent shark attacks All these questions and more are answered in this fascinating book *Dictionary Catalog of the Department Library* United States. Department of the Interior. Library, 1969

Whale Sharks Alistair D.M. Dove, Simon J. Pierce, 2021-08-25 Whale sharks are the largest of all fishes fascinating for comparative studies of all manner of biological fields including functional anatomy growth metabolism movement ecology behavior and physiology These gentle ocean giants have captured the interest of scientists and the imagination of the public yet their future is uncertain The conservation status of whale sharks was upgraded to Endangered on the IUCN Red List and the species faces a range of intense threats from human activities Can these iconic living animals who have survived for millions of years survive us Written by the world's leading experts in whale shark biology ecology and conservation *Whale Sharks Biology Ecology and Conservation* is the first definitive volume about the world's biggest fish Chapters include discussions of satellite linked tags used to track whale shark movements genetic sequencing to examine evolutionary adaptations even the use of underwater ultrasound units to investigate the species reproduction The editors hope that by collating what is known they can make it easier for future researchers conservationists and resource managers to fill some of the remaining knowledge gaps and provide the information they need to join the team As you work your way through this book we hope that you will develop a sense of awe and marvel at all of our good fortune to share the ocean and the planet with this utterly extraordinary species **Sharks and People** Thomas P. Peschak, 2014-02-27 At once feared and revered sharks have captivated people since our earliest human encounters Children and adults alike stand awed before aquarium shark tanks fascinated by the giant teeth and unnerving eyes And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real and very cinematic dangers of shark bites But our interactions with sharks are not entirely one sided the threats we pose to sharks through fisheries organized hunts and gill nets on coastlines are more deadly and far reaching than any bite In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe A contributing photographer to National Geographic Peschak is best known for his unusual photographs of sharks his iconic image of a great white shark

following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world The other images gathered here are no less riveting bringing us as close as possible to sharks in the wild Alongside the photographs Sharks and People tells the compelling story of the natural history of sharks Sharks have roamed the oceans for more than four hundred million years and in this time they have never stopped adapting to the ever changing world their unique cartilage skeletons and array of super senses mark them as one of the most evolved groups of animals Scientists have recently discovered that sharks play an important role in balancing the ocean including maintaining the health of coral reefs Yet tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone Today more than sixty species of sharks including hammerhead mako and oceanic white tip sharks are listed as vulnerable or in danger of extinction The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks They are certain to enthrall and inspire
