Specifically, the book addresses how to engage with and talk across difference, identify the ways bias can creep into our communications, and how to mitigate our tendencies toward bias. It uses the concept of fault lines and approaches sources and audiences with humility and respect, communicates with audiences about the complexity inherent in issues of crime, immigration, sports, health, inequalities, among other topics, interprets census data categories and works with census data to craft stories or create strategic campaign strategies, reconsiders common cultural assumptions about race, class, gender, identity, sexual orientation, immigration status, religion, disability, and age, and recognizes their evolving and constructed meaning and our role as professional communicators in shaping national discussions of these issues. In addition to its common sense practical approach, the book's chapters are written by national experts and leading scholars on the subject. Interviews with award-winning journalists, discussion questions, suggested activities, and additional readings round out this timely and important new textbook. Supplemented by additional case studies and examples of best practice, *Cross Cultural Journalism* offers journalists and other communication professionals the conceptual framework and practical know-how they need to report and communicate effectively about difference.
