**Toxicology of the Pancreas** Parviz M. Pour, 2005-07-27 The increased incidence of pancreatic cancer in the Western world and its grave prognosis has resulted in an urgency for research in this area Until now the available data on toxicology of the pancreas has been few and fragmentary scattered throughout the literature A benchmark volume Toxicology of the Pancreas pulls together information in this neglected area of toxicological research and highlights fundamental research performed in the last ten years Leaders in the field discuss important structures the detoxification and toxification process at the cellular and sub cellular level the distribution of phase 1 and phase 2 drug metabolizing enzymes and their role in pancreatic disease and the role of diet and toxicants on pancreatic disease The book also covers the role of altered genes in the integrity of the pancreas and explores comparative toxicology in humans and in the lab species used in testing Illustrated with histological electron microscopical and immunohistochemical formats this book provides a comprehensive and novel presentation of biological and toxicological data It stands alone as a reliable resource of information easily accessible to professionals in different disciplines

*Evolution of Longevity in Animals* Avril Woodhead, 2013-03-07 The analysis of intra group correlations between LS and BW at representative intervals yields no consistent support for the hypothesis that lower BW is associated with longer LS Indeed among male Wistar rats and C57BL 6J and A J mice followed since weaning on AL diets the data suggested that relatively higher BW across the adult LS was generally associated with longer life Even when the diet was restricted by EOD or RES regimens this pattern of positive correlations between LS and BW persisted for the C57BL 6J and A J strains when relative ages were analyzed However when BW at absolute ages were correlated with LS support for the positive relationship between BW and LS was not as forthcoming When AL groups were assessed beginning at later ages 10 months the pattern of positive correlations was very evident for the Wistar rats heavier rats tended to live longer This pattern was also evident among AL fed C57BL 6J mice followed since 6 months but was lost in the 10 month group in this strain Among A J mice on AL diets the pattern became somewhat negative when followed at 6 and 10 months of age However among both C57BL 6J and A J mice placed on EOD diets at 6 and 10 months of age the pattern clearly tended toward the positive

**Report of the ... Meeting ANZAAS (Association), 1928** **Encyclopedia of Biomedical Gerontology**, 2019-11-20 Encyclopedia of Biomedical Gerontology Three Volume Set presents a wide range of topics ranging from what happens in the body during aging the reasons and mechanisms relating to those age related changes and their clinical psychological and social modulators and determinants The book covers the biological and medical aspects of gerontology within the general framework of the biological basis of assessing age biological mechanisms of aging age related changes in biological systems human age related diseases the biomedical practicality and impracticality of interventions and finally the ethics of intervention Provides a one stop resource to information written by world leading scholars in the field of biomedical gerontology Fills a critical gap of information in a field that has seen significant progress in the last 10 years

**Understanding Ageing** Robin Holliday,1995-01-27 This book presents a completely novel approach to the understanding of ageing which many believe is an unsolved problem in biology It explains why ageing exists in animals and reviews our understanding of it at the biological level This includes a discussion of the origins and evolution of ageing The book is not a review of research on ageing but instead draws on material from a wide range of disciplines including the very extensive biomedical information about age related diseases in humans Understanding Ageing argues that much research needs to be done on the cellular and molecular aspects of ageing if the origins of these diseases are to be understood and their prevention made possible This thought provoking book will appeal to all students and researchers who are interested in ageing whether they are working in the clinical or basic research sphere

**Long-lived Proteins in Human Aging and Disease** Roger J. W. Truscott,2021-02-12 This authoritative overview on an emerging topic in the molecular life sciences covers all aspects of the aging of long lived proteins It describes the molecular mechanisms of aging on the protein level in particular the most common side chain modifications and includes analytical methods to study protein half life and the accumulation of modifications Finally the impact of protein aging on several age related diseases in humans is dissected and their role in limiting human lifespan is discussed *Longevity and healthy aging* Tzvi Dwolatzky,Gil Atzmon,2023-08-03

**The Complete Works of Aristotle. Illustrated** Aristotle,2021-09-21 Aristotle s works shaped centuries of philosophy from Late Antiquity through the Renaissance and even today continue to be studied with keen interest Aristotle left a great body of work perhaps numbering as many as two hundred treatises from which approximately thirty one survive His writings cover many subjects including physics biology zoology metaphysics logic ethics aesthetics poetry theatre music rhetoric psychology linguistics economics politics meteorology geology and government Taught by Plato he was the founder of the Lyceum the first Peripatetic school of philosophy and the Aristotelian tradition LOGIC Categories On Interpretation Prior Analytics Posterior Analytics Topics Sophistical Refutations PHYSICS Physics On the Heavens On Generation and Corruption Meteorology On the Universe On the Soul The Parva Naturalia On Breath History of Animals Parts of Animals Movement of Animals Progression of Animals Generation of Animals On Colours On Things Heard Physiognomonics On Plants On Marvelous Things Heard Mechanics Problems On Indivisible Lines The Situations and Names of Winds On Melissus Xenophanes and Gorgias METAPHYSICS Metaphysics ETHICS AND POLITICS Nicomachean Ethics Great Ethics Nicomachean Ethics Great Ethics Eudemian Ethics On Virtues and Vices Politics Economics RHETORIC AND POETICS Rhetoric Rhetoric to Alexander Poetics Constitution of the Athenians MicroRNAs in Medicine Charles H.

Lawrie,2013-10-30 MicroRNAs in Medicine provides an access point into the current literature on microRNA for both scientists and clinicians with an up to date look at what is happening in the emerging field of microRNAs and their relevance to medicine Each chapter is a comprehensive review with descriptions of the latest microRNA research written by international leaders in their field Opening with an introduction to what microRNAs are and how they function the book goes

on to explore the role of microRNAs in normal physiological functions infectious diseases non infectious diseases cancer circulating microRNAs as non invasive biomarkers and finally their potential as novel therapeutics Including background information on the field as well as reviews of the latest research breakthroughs MicroRNAs in Medicine is a one stop source of information to satisfy the specialists and non specialists alike appealing to students researchers and clinicians interested in understanding the potential of microRNAs in medicine and research **Oxford Textbook of Cancer Biology** Francesco

Pezzella, Mahvash Tavassoli, David Kerr, 2019-05-02 The study of the biology of tumours has grown to become markedly interdisciplinary involving chemists statisticians epidemiologists mathematicians bioinformaticians and computer scientists alongside biologists geneticists and clinicians The Oxford Textbook of Cancer Biology brings together the most up to date developments from different branches of research into one coherent volume providing a comprehensive and current account of this rapidly evolving field Structured in eight sections the book starts with a review of the development and biology of multi cellular organisms how they maintain a healthy homeostasis in an individual and a description of the molecular basis of cancer development The book then illustrates as once cells become neoplastic their signalling network is altered and pathological behaviour follows It explores the changes that cancer cells can induce in nearby normal tissue the new relationship established between them and the stroma and the interaction between the immune system and tumour growth The authors illustrate the contribution provided by high throughput techniques to map cancer at different levels from genomic sequencing to cellular metabolic functions and how information technology with its vast amounts of data is integrated with traditional cell biology to provide a global view of the disease The effect of the different types of treatments on the biology of the neoplastic cells are explored to understand on the one side why some treatments succeed and on the other how they can affect the biology of resistant and recurrent disease The book concludes by summarizing what we know to date about cancer and in what direction our understanding of cancer is moving Edited by leading authorities in the field with an international team of contributors this book is an essential resource for scholars and professionals working in the wide variety of sub disciplines that make up today's cancer research and treatment community It is written not only for consultation but also for easy cover to cover reading Redox Signaling and Regulation in Biology and Medicine Claus
