Long March To Power:

From People's War to People's Rule Timothy J. Lomperis, 2000-11-09 Timothy Lomperis persuasively argues the ironic point that the lessons of American involvement in Vietnam are not to be found in any analysis of the war by itself. Rather, he proposes a comparison of the Vietnam experience with seven other cases of Western intervention in communist insurgencies during the Cold War era: China, Indochina, Greece, the Philippines, Malaya, Cambodia, and Laos. Lomperis maintains that popular insurgencies are manifestations of crises in political legitimacy which occur as a result of the societal stresses caused by modernization. Therefore, he argues, any intervention in a people's war will succeed or fail depending on how it affects this crisis. The unifying theme in the cases Lomperis discusses is the power of land reform and electoral democracy to cement political legitimacy and therefore deflect revolutionary movements. Applying this theory to the ongoing Sendero Luminoso insurgency in Peru, Lomperis makes a qualified prediction of that conflict's outcome. He concludes that a global trend toward democratization has produced a new era of people's rule.

Politics and Purges in China Frederick C. Teiwes, 1993 Drawing upon released documents, memoirs, and party history works, the process and impact of the political campaigns in China between 1950 and 1965 is documented. Complete with extensive interviews with Chinese scholars and former officials, the book reviews the findings of the first edition.

China in Transformation Colin Mackerras, 2014-06-11 In the first half of the twentieth century, China moved from a millennium of imperial rule to the Communist Party-led People's Republic of China, which remains today. China in Transformation argues that this enormously significant period in Chinese history saw wrenching change throughout Chinese society, amounting to a social, cultural, and political transformation. This new, fully revised and updated edition takes full advantage of new research and formerly unavailable material to analyse the fascinating processes of revolution, reform, reaction, and change in China during the period. Mackerras discusses the wars, occupations, and uprisings that marked the period, including the Boxer Rebellion and the Japanese occupation, and includes a new chapter on postwar China and the Civil War. Examines nation building and revolutions, including the successful communist movement that has led to the rise of today's state. Acknowledges the prevalence of poverty and famine in the period but also gives space to the areas in which there was progress: the introduction of mass secular education, improvements in the status of women, and in a new chapter, details significant developments in culture, literature, and theatre. Written in an accessible style with a rich collection of documents, chronology, glossary, a guide to further reading, and a Who's Who summarising the careers and contributions of the main figures, this new edition is essential for all those interested in understanding China's modern history.

Women and Gender in Chinese Studies Nicola Spakowski, Cecilia Nathansen Milwertz, 2006 The State of the World's Girls report has tackled many topics: girls in the global economy, education, girls affected by conflict and by disaster, the new digital world, and its implications, both negative and positive, for girls' lives. The challenges and risks of increasing urbanisation, working with men and boys, and looked at attitudinal, structural, and

institutional barriers to gender equality

The Militarization and Weaponization of Space Matthew

Mowthorpe, 2004-01-01 The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War. Satellite reconnaissance, navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space. Today, as the prominence of information technology, computing and telecommunications advances, so does the concept of space as a battlefield. In *The Militarization and Weaponization of Space*, Matthew Mowthorpe diligently analyzes the military space policies of the United States, the Soviet Union, Russia and the People's Republic of China from the Cold War period to the present day. Mowthorpe focuses on the development of the ballistic missile defense and other anti-satellite systems and aptly assesses to what degree space will become armed. This work cogently addresses an issue of increasing urgency to scholars of international politics.

Space, Politics, and Cultural Representation in Modern China Enhua

Zhang, 2016-12-08 Regarding revolution as a spatial practice, this book explores modes of spatial construction in modern China through a panoramic overview of major Chinese revolutionary events and nuanced analysis of cultural representations. Examining the relationship between revolution, space and culture in modern China, the author takes five spatially significant revolutionary events as case studies: the territorial dispute between Russia and the Qing dynasty in 1892, the Land Reform in the 1920s, the Long March 1934-36, the mainland-Taiwan split in 1949 and the Cultural Revolution 1966-76, and analyses how revolution constructs, conceives and transforms space. Using materials associated with these events, including primarily literature as well as maps, political treatises, historiography, plays, film and art, the book argues that, in addition to redirecting the flow of Chinese history, revolutionary movements operate in and on space in three main ways: maintaining territorial sovereignty, redefining social relations and governing an imaginary realm. Arguing for reconsideration of revolution as a reorganization of space as much as time, this book will appeal to students and scholars of Chinese culture, society, history and literature.

Wind Power in China Julia Kirch Kirkegaard, 2018-11-12 Whilst China's growing economy is widely regarded as being responsible for severe environmental degradation and a high reliance on energy from fossil fuels, China is emerging as a potential leader in new green energy technologies. Outlining the extraordinary growth in China's wind power capacity since 2005, this book explores the deliberate creation of a whole industry and the strategy of transitioning the power sector to

renewable energy by accelerated experimentation and through literally pushing the emerging wind power sector to its limits. Investigating how wind power may not always be considered as sustainable in a wider Chinese developmental context, the book traces the struggle China has had in getting this high technology sector to qualify as truly Chinese scientific development whilst often being opaquely at the mercy of foreign expertise, technology and certification. The book furthermore exposes the surprising nuances, dynamics and potency of unexpected players in Chinese wind power marketisation. Complex interplays are revealed between wind turbine control systems, algorithms in critical software technology, relationships between suppliers, wind farm developers, financiers, the electrical grid itself, the coal lobby, the broader Chinese state and much more. The book has important implications far beyond wind power and contemporary China studies, highlighting the much wider story of China's fragmented and experimental style of innovating, upgrading and greening.

China's Emergence as a Defense Technological Power Tai Ming Cheung, 2013-10-31. China is flexing its growing military and strategic clout in the pursuit of broadening national security interests. At the same time, the country's economic and technology policies have also become more nationalistic, state centered and ambitious. China's defense economy has set its sights on catching up with the West by the beginning of the 2020s and is making steady progress in building up its innovation capabilities, although this is presently in the form of incremental and sustaining types of activities. More high end disruptive forms of innovation that would lead to major breakthroughs are likely to be beyond China's reach in the near to medium term. This volume provides a wide ranging and detailed assessment of the present state of the Chinese defense economy at a time of rapid change and accelerating advancement in its innovation capabilities and performance. This collection of articles has three main goals: 1. to locate China's defense innovation dynamics within broader historical, technological and methodological frameworks of analysis; 2. to assess the performance of the Chinese defense economy's six principal subsectors; and 3. to compare China's approach to defense industrialization with major counterparts in the Asia Pacific region. This book was originally published as a special issue of the *Journal of Strategic Studies*.

Revolution and Dictatorship Steven Levitsky, Lucan Way, 2024-10-29. Why the world's most resilient dictatorships are products of violent revolution. *Revolution and Dictatorship* explores why dictatorships born of social revolution, such as those in China, Cuba, Iran, the Soviet Union and Vietnam, are extraordinarily durable even in the face of economic crisis, large scale policy failure, mass discontent and intense external pressure. Few other modern autocracies have survived in the face of such extreme challenges. Drawing on comparative historical analysis, Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism. Although most revolutionary governments begin weak, they challenge powerful domestic and foreign actors, often bringing about civil or external wars. These counterrevolutionary wars pose a threat that can destroy new regimes, as in the cases of Afghanistan and Cambodia. Among regimes that survive

however prolonged conflicts give rise to a cohesive ruling elite and a powerful and loyal coercive apparatus This leads to the downfall of rival organizations and alternative centers of power such as armies churches monarchies and landowners and helps to inoculate revolutionary regimes against elite defection military coups and mass protest three principal sources of authoritarian breakdown Looking at a range of revolutionary and nonrevolutionary regimes from across the globe Revolution and Dictatorship shows why governments that emerge from violent conflict endure **Power of Freedom** Chih-Ping Chou, Carlos Lin, 2022-10-17 Dr Hu Shih 1891 1962 was one of China's top scholars and diplomats and served as the Republic of China's ambassador to the United States during World War II As early as 1941 Hu Shih warned of the fundamental ideological conflict between dictatorial totalitarianism and democratic systems a view that later became the foundation of the Cold War narrative In the 1950s after Mao's authoritarian regime was established Hu Shih started to analyze the development and nature of Communism delivering a series of lectures and addresses to reveal what he called Stalin's grand strategy for facilitating the International Communist Movement For decades and today to a certain extent Hu Shih's political writings were considered sensitive and even dangerous As a strident critic of the Chinese Communist Party's oligarchical practices he was targeted by the CCP in a concerted national campaign to smear his reputation cast aspersions on his writings and generally destroy any possible influence he might have in China This volume brings together a collection of Hu Shih's most important mostly unpublished English language speeches interviews and commentaries on international politics China U S relations and the International Communist Movement Taken together these works provide an insider's perspective on Sino American relations and the development of the International Communist Movement over the course of the 20th century Experimental Beijing Sasha Su-Ling Welland, 2018-03-29 During the lead up to the 2008 Beijing Olympics the censorious attitude that characterized China's post 1989 official response to contemporary art gave way to a new market driven culture industry valuation of art Experimental artists who once struggled against state regulation of artistic expression found themselves being courted to advance China's international image In Experimental Beijing Sasha Su Ling Welland examines the interlocking power dynamics in this transformational moment and rapid rise of Chinese contemporary art into a global phenomenon Drawing on ethnographic fieldwork and experience as a videographer and curator Welland analyzes encounters between artists curators officials and urban planners as they negotiated the social role of art and built new cultural institutions Focusing on the contradictions and exclusions that emerged Welland traces the complex gender politics involved and shows that feminist forms of art practice hold the potential to reshape consciousness produce a nonnormative history of Chinese contemporary art and imagine other more just worlds *John Adams's Nixon in China* Professor Timothy A Johnson, 2013-01-28 John Adams's opera Nixon in China is one of the most frequently performed operas in the contemporary literature Timothy A Johnson illuminates the opera and enhances listeners and scholars appreciation for this landmark work This music analytical guide presents a detailed in depth analysis of the music tied to historical and

political contexts The opera captures an important moment in history and in international relations and a close study of it from an interdisciplinary perspective provides fresh compelling insights about the opera The music analysis takes a neo Riemannian approach to harmony and to large scale harmonic connections Musical metaphors drawn between harmonies and their dramatic contexts enrich this approach Motivic analysis reveals interweaving associations between the characters based on melodic content Analysis of rhythm and meter focuses on Adams s frequent use of grouping and displacement dissonances to propel the music forward or to illustrate the libretto The book shows how the historical depiction in the opera is accurate yet enriched by this operatic adaptation The language of the opera is true to its source but more evocative than the words spoken in 1972 due to Alice Goodman s marvelous poetic libretto And the music transcends its repetitive shell to become a hierarchically rich and musically compelling achievement

Politics in China William A. Joseph,2019-04-25 On October 1 2019 the People s Republic of China PRC will celebrate the 70th anniversary of its founding And what an eventful and tumultuous seven decades it has been During that time under the leadership of the Chinese Communist Party CCP China has been transformed from one of world s poorest countries into one of its fastest growing economies and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence But in the late 1950s

the PRC experienced the most deadly famine in human history caused largely by the actions and inactions of its leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy And in 1989 the CCP unleashed the army to brutally crush demonstrations by students and others calling for political reform China is now for the most part peaceful prospering and proud The CCP maintains a firm grip on power through a combination of harsh repression and popular support largely based on its recent record of promoting rapid economic growth Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities ethnic unrest and a rising tide of social protest Politics in China provides an accessible yet authoritative introduction to how the world's most populous nation and rapidly rising global power is governed today The third edition has been extensively revised thoroughly updated and includes a new chapter on the internet and politics in China The book's chapters provide overviews of major periods in China's modern political history from the mid nineteenth century to the present examinations of key topics in contemporary Chinese politics and analyses of developments in four important areas located on China's geographic periphery Tibet Xinjiang Hong Kong and Taiwan

Routledge Handbook of the Arab Spring Larbi Sadiki, 2014-12-17 The self immolation of Mohammed Bouazizi in Tunisia in December 2010 heralded the arrival of the Arab Spring a startling yet not unprecedented era of profound social and political upheaval The meme of the Arab Spring is characterised by bottom up change or the lack thereof and its effects are still unfurling today The Routledge Handbook of the Arab Spring seeks to provide a departure point for ongoing discussion of a fluid phenomenon on a plethora of topics including Contexts and contests of democratisation The sweep of the Arab Spring Egypt Women and the Arab Spring Agents of change and the technology of protest Impact of the Arab Spring in the wider Middle East and further afield Collating a wide array of viewpoints specialisms biases and degrees of proximity and distance from events that shook the Arab world to its core the Handbook is written with the reader in mind to provide students practitioners diplomats policy makers and lay readers with contextualization and knowledge and to set the stage for further discussion of the Arab Spring

[AI and the Bomb](#) James Johnson, 2023 This book provides a coherent innovative and multidisciplinary examination of the potential effects of AI technology on nuclear strategy and escalation risk Its findings have significant theoretical and policy ramifications as well as contributing to the literature on the impact of military force and technological change

Center Liah Greenfeld, Michel L. Martin, 1988-12-29 There are several concepts within the social sciences that refer to the fundamental realities on which the various disciplines focus their attention The concept of the center as defined by Edward Shils has such a status in sociology for it deals with and attempts to provide an answer to the central question of the discipline the question of the constitution of society Center is a commonly used term with a variety of meanings According to editors Liah Greenfeld and Michel Martin center carries a twofold meaning when used as a concept In its first sense it is a synonym for central value system referring to irreducible values and beliefs that establish the identity

of individuals and bind them into a common universe In its second sense center refers to central institutional system the authoritative institutions and persons who often express or embody the central value system Both meanings imply a corresponding idea of periphery referring both to the elements of society that need to be integrated and to institutions and persons who lack authority The original essays compiled in this volume examine and apply the concept of the center in different contexts The contributors come from a broad range of disciplines classics religion philosophy history literary criticism anthropology political science and sociology which serves to underscore the far reaching significance of the Shilsian theory of society The interrelated subsets of the center periphery theme addressed here include symbolic systems intellectuals the expansion of the center into the periphery parallel concepts in the work of other scholars besides Shils and the paths of research inspired by these concepts The volume features an introspective essay by Shils himself in which he reexamines his central ideas in the light of new experiences and the ideas of others some of them contained in this volume By drawing together such diverse scholars around a unified idea this collection achieves a cohesion that makes it an exciting contribution to the comparative analysis of social and cultural systems A collective effort in social theory Center Ideas and Institutions is a testimony to the breadth and complexity of one of man s ideas
