Long Waves Of Regional Development:

Long Waves of Regional Development Michael Marshall, 1985 **Long Waves of Growth, Hegemonic Power, and Climate Change in the World Economy** Phillip Anthony O'Hara, 2025-10-02 This book investigates eras of major geopolitical and socioeconomic power development relative demise and potential renewal for four major political economies. It concentrates on the Dutch Golden Age of the late 1500s and 1600s, British hegemony of the 1800s, Pax Americana of the 1900s, and Chinese potential hegemony of the 2000s, as well as long wave patterns of change over successive centuries to the present and to some degree into the future. Dutch, British, US, and Chinese economies are situated within patterns of long-term successive rise and fall and fall and rise of economic growth, hegemony, and climate change in the world political economy, including linkages between core, periphery, and semi-periphery. Patterns of multiple crises tend to appear in between hegemonic periods, and climate change often undergoes complex dynamics through time while currently climate anomalies are emerging during mostly long wave downswings and polycrises in the world economy. Contemporary themes of the book include the ongoing competition for world domination between the US and China, the conflict over Ukraine, Taiwan, that some think may generate world war 3, the climate change crisis that continues to plague the world, and whether the world and its major economies are likely to undergo a Golden Age into the future. Chapter 7 of this book on US hegemony and long waves includes extracts of material that won the Myrdal Prize for Book of the Year Prize from EAEPE, as well as Journal Article of the Year from Curtin Business School. Ideas from parts of Chapter 9 emanate from a volume that won Book of the Year Award from CBS. A climate change paper that won Journal Article of the Year Awards from EAEPE and CBS informed ideas that are used in several parts of this book. The book outlines key stylized facts from the analysis and presents hypotheses for further investigation on the relationship between long-term growth, hegemony, and climate change. The book uses the work of Kondratiev, Schumpeter, and company, themes in economic history, modern political economy schools, and the principles of political economy contingency paradigm to reformulate long wave hegemony and climate change hypotheses and empirics.

Local and Regional Development Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andrés Rodríguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue. For localities and regions, the challenge of enhancing prosperity, improving wellbeing, and increasing living standards has become acute. For localities and regions formerly considered discrete parts of the developed and developing worlds, amid concern over the definitions and sustainability of development, a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories. Local and Regional Development engages and addresses the key questions: what are the principles and values that shape definitions and strategies of local and regional development? What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development? What are the main policy interventions and instruments? How do localities and regions attempt to effect development in practice? What kinds of

local and regional development should we be pursuing This book addresses the fundamental issues of what kind of local and regional development and for whom frameworks of understanding and instruments and policies It outlines what a holistic progressive and sustainable local and regional development might constitute before reflecting on its limits and political renewal With the growing international importance of local and regional development this book is an essential student purchase illustrated throughout with maps figures and case studies from Asia Europe and Central and North America

Regional Development and Decentralization Policy in South Korea Ludwig Schätzl,Karin Wessel,Yong-Woo Lee,1997 This book investigates the interdependent relations between economic development regional development and spatial economic policy in newly industrialized countries using South Korea as a case study The analysis concentrates on three aspects a long term economic restructuring starting with labour intensive production followed by capital intensive and finally human capital and technology intensive production b the effects of the economic transformation process on regional development and c the significance of spatial economic policy for sectoral and regional economic restructuring *Frontiers in Regional*

Development Y. Gradus,Harvey Lithwick,1996 In fifteen insightful new essays noted scholars in geography economics and public policy provide a comparative examination of the problems and prospects for development in frontier areas Blending theory with case studies the essays challenge the widely held notion that peripheral areas are marginal or backward The Long-Wave Debate Tibor Vasko,2013-03-09 The proceedings reflect the state of the art of long term fluctuations in economic growth as well as discussing promising areas of research in this field The unique combination of participants from East and West including the People s Republic of China is a guarantee for wide coverage and unusual insights The problems treated range from the identification of long term fluctuations in developing and developed countries in both East and West to their relationship to important economic variables profit prices money supply Particular attention is focused on structural changes and the role of technological development in the light of the long term fluctuation concept It is interesting to follow the treatment of this issue by scientists with different orientations The role of financial and monetary variables is also analyzed by leading researchers in the field **New Firms and Regional Development in Europe** David Keeble,Egbert

Wever,2016-07-15 When originally published in 1986 this book was one of the first to deal solely with the urban and regional incidence and development implications of new firm formation in particular EU countries It reviews the extent of and reasons for geographical variation in numbers of new firms examines the nature of such firms and assesses the regional impact and policy implications in various EC countries *Handbook of Regional Innovation and Growth* Philip Cooke,Bjørn Asheim,Ron Boschma,Ron Martin,Dafna Schwartz,Franz Tötting,2011-01-01 Today economic growth is widely understood to be conditioned by productivity increases which are in turn profoundly affected by innovation This volume explores these key relationships between innovation and growth bringing together experts from both fields to compile a unique Handbook The Handbook considers innovation from fresh perspectives encompassing topics such as services innovation inward investment

and innovation creative industry innovation and green innovation It is divided into seven sections dealing with regional innovation and growth theory dynamics evolution agglomeration innovation worlds innovation system institutions and innovation governance and policy This definitive compendium on regional innovation and growth will undoubtedly appeal to teachers students researchers and practitioners of innovation and growth dynamics worldwide **Regional Planning** John Glasson,Tim Marshall,2007-11-21 This comprehensive introduction to the concepts and theory of regional planning in the UK Drawing on examples from throughout the UK is the essential up to date text for students interested in all aspects of this increasingly influential subject America's Johannesburg Bobby M. Regional Inequality in Transitional China Felix Haifeng Liao,Yehua Dennis Wei,Li Huang,2020-09-17 This book investigates uneven regional development in China with particular focus on the cases of Guangdong and Zhejiang provinces which have been at the forefront of debate since Chinese economic reform Rapid economic growth since the opening up of China has been accompanied by significant disparities in the regional distribution of income this book represents one of the most recent studies to present a picture of this inequality Built upon a multi scale and multi mechanism framework it provides systematic examination of both the patterns and mechanisms of regional development and inequality in provincial China emphasizing the effects of economic transition Approaching from a geographical perspective its authors consider the interplay between the local the state and the global forces in shaping the landscape of regional inequality in China Extensive empirical findings will prove useful to those researching other developing countries within the frontier of globalization and economic transition Regional Inequality in Transitional China will appeal to scholars and students of geography economics and Chinese studies more broadly Innovation and Regional Development Hans-Jürgen Ewers,Jürgen Allesch,2019-07-08 No detailed description available for Innovation and Regional Development Pathways to Industrialization and Regional Development Allen J. Scott,Michael Storper,2005-09-27 The world has seen a shift in socio economic relations in the patterns and processes of industrialization and regional development The social regulation of the economic order flexible production organization and industrial district formation have brought periods places and pathways to the heart of economic debate Pathways to Industrialization and Regional Development provides a platform from which to address a new economic order All the major schools of thought are represented Focussing upon the interactions between economic logic and political institutions at both the local and global levels the authors set the agenda for the 1990s **Innovative Cities** James Simmie,2003-09-02 Innovative Cities presents a unique international comparison of innovation in Amsterdam London Milan Paris and Stuttgart Based on research funded by the ESRC program on Cities Competitiveness and Cohesion it compares and contrasts the reasons why these sites are among the top ten innovative cities in Europe Innovation is one of the key driving forces of economic growth in modern economies The research reported here takes a careful and directly comparable look at

what characteristics and conditions in the five cities have led to the flourishing of innovation in them Researchers with detailed local knowledge have applied the same analytical tools and survey techniques to investigating this question and the result present a unique international comparison of innovation in the five cities *New Technology and Regional Development* Bert Van Der Knapp, Egbert Wever, 2003-08-16 First Published in 2004 Since the second half of the seventies a period of economic recession a growing interest for technological change can be noticed in all old industrial countries The reason for this phenomenon is the conviction that the economic future of these countries will depend to a large degree on their ability to create new products and processes and to make these commercially viable Hence the stimulation and subsidising of all kinds of Research and Development R D activities by the governments of these countries Against this background it was certainly not unexpected that the IGU Commission on Industrial Change presided by Godfrey Linge decided to organise a congress on Technology and Industrial Change This congress was held in August 1985 at Nijmegen in the Netherlands In this book some of the papers presented there are published We are very happy that we were allowed to include the very interesting contributions of the representatives of Philips in Eindhoven and of the European Commission in Brussels

Long Waves and Regional Development Michael Marshall, 1987

Regional Development in an Age of Structural Economic Change Piet Rietveld, Daniel Shefer, 2024-02-22 First published in 1999 this volume addresses various themes in regional development studies from the perspective of structural economic change Particular attention is paid to factors having long run implications for regional development such as innovation and knowledge production Innovation and research and development activities appear to take place at particular locations This has implications for long run spatial and sectoral developments Another factor is transport infrastructure its impact on efficiency and equity is surveyed Other themes covered relate to the role of tourism and adjustments in urban economies The book aims to offer a balance between modelling and non modelling approaches In addition to country specific contributions some are offered at the European level

European Regional Development Paweł Churski, Tomasz Herodowicz, Barbara Konecka-Szydłowska, Robert Perdał, 2021-11-18 This book offers a comprehensive overview of contemporary issues of regional development It places particular emphasis on its socio economic and socio political determinants which accompany the problem of existing and ever widening differences in the level of regional development in various parts of Europe In order to diagnose the scale of those differences and to indicate the main forces behind the divergence of development the authors propose an original systematisation of regional development factors drawing attention to the need to consider them within the framework of present day socio economic megatrends The proposed approach to the development factors is also used for the author's operationalisation of the concept of territorial capital which is at the centre of regional place based policy The wide spatial aspect of the analysis national and local and its extensive temporal scope 2004-2019 yields unique results and creates an important element of added value for this book which shows the regularities of the process of regional development in

Europe at three spatial levels pan European national and intra regional Furthermore it indicates the challenges faced by regionalists who attempt to carry out research on different territorial levels with a diverse number of units 205 EU regions 16 Polish voivodeships 2 478 Polish local units and extended observation periods 2004 2017 The solutions proposed by the authors who show the potential of overcoming the barriers resulting from limited access to complete and comparable statistical data series should be inspiring for many researchers The unique results of direct research carried out on a large sample of respondents and entrepreneurs via diverse field research techniques constitute a valuable source of information on local conditions that impact contemporary development processes in less developed regions Their value is even greater because they were carried out in a unique laboratory created by the authors for testing the regularity of formation and impact of socio economic development factors in various locally determined conditions of this process It consists of purposefully selected test units LAU2 Located in a less developed region they represent all growth types and functional test units identified in the course of the research Consequently the results obtained may be generalised and applied to other areas showing similar features of territorial capital The monograph is addressed primarily to a wide group of regionalists connected with economic and social sciences as well as to practitioners involved in the implementation of development policies at various levels

Kondratieff Waves, Warfare and World Security Tessaleno C. Devezas, 2006 Considerable progress has been made in understanding the underlying mechanisms driving the long wave behaviour of the world socioeconomic development A controversial mechanism discussed is the close relationship between K waves and the outbreak of major wars

Global Challenge and Local Response Walter B. Stöhr, 1990 The volume grew out of research undertaken as a part of the UN University's European Perspectives Project It addresses the consequences of the failure of large scale industrial enterprise and the inability of central government policies to cope with the results of economic restructuring in a series of comparative case studies showing how local communities throughout Europe East and West rural and industrial have responded to economic dislocation and decline and how these local initiatives have become the basis for economic regeneration Annotation copyrighted by Book News Inc Portland OR

Long Waves Of Regional Development Introduction

In the digital age, access to information has become easier than ever before. The ability to download Long Waves Of Regional Development has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Long Waves Of Regional Development has opened up a world of possibilities. Downloading Long Waves Of Regional Development provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Long Waves Of Regional Development has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Long Waves Of Regional Development. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Long Waves Of Regional Development. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Long Waves Of Regional Development, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Long Waves Of Regional Development has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
