Nowak, 2005 Although they are highly intelligent ruthless predators carnivores are increasingly rare From the dwarf mongoose to the polar bear carnivores are at once respected and misunderstood invoking both fear and curiosity in the humans with whom they share their world Ronald M Nowak celebrates these fascinating mammals in Walker's Carnivores of the World This comprehensive guide featuring 225 illustrations covers the world's eight terrestrial families of carnivores Each generic account comprises scientific and common names number and distribution of species physical attributes measurements hunting and social activity reproduction habitat population dynamics longevity and status of threatened species A thought provoking overview by David W Macdonald and Roland W Kays is packed with results of the latest field and laboratory research on topics ranging from evolutionary history to the adaptive value of fur patterns Emphasizing the interplay of social life morphology and predatory behavior it provides an up to date panorama of the world's carnivores      *Mammalogy* George A. Feldhamer, 2007-09-07 The Class Mammalia is amazingly diverse ranging from whales to marsupials to bats to primates The more than 5 400 species occupy many habitats with mammals present on all the continents They are rare only on Antarctica and a few isolated islands Mammals present a complex set of conservation and management issues Some species have become more numerous with the rise of human populations while others have been extirpated or nearly so such as the Caribbean monk seal the thylacine the Chinese river dolphin and the Pyrenean ibex In this new edition of their classic textbook George A Feldhamer and his colleagues cover the many aspects of mammalogy Thoroughly revised and updated this edition includes treatments of the most recent significant findings in ordinal level mammalian phylogeny and taxonomy special topics such as parasites and diseases conservation and domesticated mammals interrelationships between mammalian structure and function and the latest molecular techniques used to study mammals Instructors email mammalogy.press@jhu.edu for a free instructor resource disc containing all 510 illustrations printed in Mammalogy Adaptation Diversity Ecology third edition      **Wildlife Resources** Harald H. Roth, Günter Merz, 2013-06-29 The general interest and attention paid to the use of the renewable natural resources of the world have increased greatly during the last decades This is due to the environmental dilemma into which mankind has got itself by the total disregard of ecological facts and laws the underpricing of natural resources and the overemphasis on economic development coupled with unimpeded rapid population growth and the preponderance of materialistic consumption oriented attitudes The

management and use of natural resources such as forests grasslands rivers and lakes were formerly considered purely in a financial context whereas latterly a consciousness of their social function and the indirect economic benefits which can be derived from them has developed Thus as regards these traditional resources multi use concepts comprising eco nomically oriented utilisation as well as recreational educational and social use have be come widely accepted Conservation of natural resources for sustainable consumptive as well as non consumptive uses has been recognised as a key element for maintaining eco nomic development all over the world Fortunately the industrialised countries have started to apply this principle themselves and in their technical and financial aid to the developing Third World countries This is manifest from policy documents such as the World Bank Policy on Development of Wild Lands issued in 1987
