Longrun Dynamics

A General Economic and Political Theory

Christine Donaldson, Toronto

Longrun Dynamics

Graeme Donald Snooks

Longrun Dynamics:

Longrun Dynamics G. Snooks,1998-04-08 Longrun Dynamics is a ground breaking work that begins where the author s Economics without Time 1993 left off It employs the inductive method proposed by J S Mill to develop a general dynamic theory that integrates the separate disciplines of economic growth economic fluctuations and political decision making The central feature of this general theory is dynamic demand which provides both a realist form for the model and a new explanation of macroeconomics variables The general theory also provides an entirely new basis for policy and is designed to counter the influence of neo liberalism in economic theory

The Dynamic Society Graeme Snooks,2002-09-11 This book discusses the nature and process of change in human society over the past two million years The author draws on economic historical and biological concepts to examine the driving forces of change and looks to likely developments in the future This analysis produces some very thought provoking and controversial conclusions

How Long is the Long Run? A Dynamic Analysis of the Spanish Business Cycle Ms.Stefania Fabrizio,Mr.Angel J. Ubide,J. Humberto Lopez,1997-06-01 This paper studies the sources of Spanish business cycles It assumes that Spanish output is affected by two types of shocks The first one has permanent long run effects on output and it is identified as a supply shock The second one has only transitory effects on output and it is identified as a demand shock Spain seems to have long business cycles of about 15 years As restrictive demand policies to control the inflation rate could prove painful and disappointing supply side policies aimed at reducing rigidities in the product and labor market would be a better way to achieve the same objective

The Ephemeral Civilization Graeme Snooks,2002-09-11 The Ephemeral Civilization is an astonishing intellectual feat in which Graeme Snooks develops an original and ground breaking analysis of changing sociopolitical forms over the past 3 000 years Snooks challenges the prevailing theories of social evolutionism with an innovative approach which also looks ahead to the twenty first century The Ephemeral Civilization builds on the model of dynamic strategy outlined in the author s highly acclaimed companion volume The Dynamic Society The Ephemeral Society is divided into three parts theory history and future

Long-run Growth, Social Institutions and Living Standards Neri Salvadori,Arrigo Opocher,2014-05-14 This engaging book contains a set of original contributions to the much debated issues of long run economic growth in relation to institutional and social progress It explores the mutual relationships between living standards social habits education an

Demographic Change and Long-Run Development Matteo Cervellati,Uwe Sunde,2017-10-20 Recent approaches to economic demography investigating the effect of the transition to low mortality and low fertility on economic development Over the last two hundred years mortality and fertility levels in the Western world have dropped to unprecedented levels This demographic transition was accompanied by an economic transition that led to widespread education and economic growth after centuries of near stagnation At the same time other changes have occurred in family structures culture and the organization of society Economists have only recently begun to take into account the demographic transition from high

mortality and high fertility when modeling and researching economic development This CESifo volume reviews recent approaches to economic demography considering such topics as the bio geographic origins of comparative development differences the role of health improvements and mortality decline as well as physiological familial cultural and social aspects After an overview of the study of demography and economic demography the chapters cover subjects including the Neolithic era and the period of the formation of states and social institutions longevity and economic growth household decision making and fertility land inequality education and marriage in nineteenth century Prussia and caste systems and technology in pre modern societies The book concludes with a call for further investigation of the institutional and social factors that influence demographics and economies suggesting that unified growth theory offers a potential approach to studying development Contributors Matteo Cervellati Francesco Cinnirella David de la Croix Carl Johann Dalgaard Matthias Doepke Elena Esposito Davide Fiaschi Tamara Fioroni Oded Galor Boris Gershman Erik Hornung Fabian Kindermann Nils Petter Lagerlöf Holger Strulik Uwe Sunde David N Weil

In the Long Run We Are All Dead Geoff Mann, 2017-01-24 In the ruins of the 2007 2008 financial crisis progressives the world over clamoured to resurrect the economic theory of John Maynard Keynes The crisis seemed to expose the disaster of small state free market liberalization and deregulation Keynesian political economy in contrast could put the state back at the heart of the economy and arm it with the knowledge needed to rescue us But what it was supposed to rescue us from was not so clear Was it the end of capitalism or the end of the world For Keynesianism the answer is both Geoff Mann's *In the Long Run We are All Dead* is a thoroughgoing critique of Keynes for our post crash world and an accessible and historically grounded introduction to his masterwork *The General Theory of Employment Interest and Money* Mann argues that Keynesianism is thus modern liberalism's most persuasive internal critique meeting two centuries of crisis with a proposal for capital without capitalism and revolution without revolutionaries

Global Transition Graeme Donald Snooks, 1999-08-31 *Global Transition* is an innovative study that analyses the problems and prospects of the Third World by building on the theoretical contribution the dynamic strategy model made in the author's acclaimed *Longrun Dynamics* It formulates a general economic and political theory he calls the global strategic transition GST model The central feature of this model is the global strategic demand response mechanism involving an interaction between the world's expanding strategic core and its fringe which is facilitated through strategic inflation This model also provides the basis for a new policy approach to economic development

Cycles, Growth and Structural Change Lionello F Punzo, 2003-09-02 This volume gathers together key new contributions on the subject of the relationship both empirical and theoretical between economic oscillations growth and structural change Employing a sophisticated level of mathematical modelling the collection contains articles from amongst others William Baumol Katsuhito Iwai and William Brock

The Laws of History Graeme Snooks, 2002-09-26 This is an original and controversial reflection on the course of human history and a remarkable attempt to develop a scientific model of laws for the social sciences It

considers the nature of laws and the reasons we might expect to find them in history employs an underlying framework concerning societal dynamics historical change and institutional change which are in fact the laws of history This volume consolidates the author s previous research in *The Dynamic Society* and *The Ephemeral Civilization* *U.S. Economic Growth from 1976 to 1986: Forecasts of long-run economic growth*, 1976

Long-run Convergence in Greenhouse Gases, Reactive Compounds, Aerosol Precursors and Aerosols Diego Romero-Ávila, 2025-04-18 This book examines the presence of stochastic and deterministic convergence in ten series of greenhouse gases aerosol precursors and aerosols across 29 industrialized and emerging countries from 1820 to 2018 The author utilizes the Panel Analysis of Nonstationarity in Idiosyncratic and Common Components PANIC method for the empirical exercise The analysis reveals strong evidence of stochastic convergence patterns in the series of log per capita emissions for black carbon carbon monoxide ammonia non methane volatile organic compounds and nitrogen oxides demonstrated by the existence of pairwise cointegration among individual series Regarding deterministic convergence the book provides compelling evidence of convergence in per capita emissions for black carbon carbon monoxide ammonia non methane volatile organic compounds nitrogen oxides and sulfur dioxide There is also moderate evidence of convergence in per capita emissions for carbon dioxide nitrous oxide and organic carbon and weaker evidence for methane emissions The findings have significant implications for environmental policy particularly in light of the observed deterministic convergence in emissions

Strategic Corporate Communication Richard Stanton, 2017-09-16 This textbook takes a refreshing approach to strategic corporate communication and provides students and practitioners with the tools needed to understand what make a successful communication strategy It offers a new way of understanding the way successful communication strategies are constructed and delivered Using a unique reverse engineering approach it takes apart the components of corporate communication examines the mechanics then rebuilds the strategy for use by communication students and practitioners across a wide range of corporate entities including not for profit organisations This textbook will be recommended reading for advanced undergraduate and postgraduate students studying PR corporate or strategic communications either within a business school or media studies department The book will also appeal to students studying related topics including international relations and media studies especially those wishing to work in a communications role for a corporate or not for profit organisation after university

Elasticities of Fertilizer Demands for Corn in the Short and the Long Run Mark Denbaly, 1991

Growth, Distribution and Uneven Development Amitava Krishna Dutt, 1990-07-27 This book presents an international study of economic growth and income distribution with a focus on North South differences The text discusses the topic from a purely theoretical perspective comparing the relations between economies by using formal mathematical models Four well known approaches are discussed neoclassical neo Marxian neo Keynesian and Kalecki Steindl Models are developed to highlight and contrast the basic features of these approaches Subsequent chapters systematically introduce inflation technological change sectoral

issues and international trade building upon these simple one sector models This book will be of value to anyone with an interest in areas such as developmental economics growth trade and political economy *Historical Analysis in Economics* Graeme Snooks,2019-10-19 Neo classical economics is frequently criticised for paying inadequate attention to historical processes However it has proved easier to make broad claims that history matters than to theorise with any depth about the appropriate role for history in economic analysis *Historical Analysis in Economics* considers what history can contribute to the science of economics how would it matter if history mattered **Embedding Global Markets** John G.

Ruggie,2016-12-05 John Ruggie introduced the concept of embedded liberalism in a 1982 article that has become one of the most frequently cited sources in the study of international political economy The concept was intended to convey the manner by which capitalist countries learned to combine the efficiency of markets with the broader values of the community that socially sustainable markets themselves require in order to survive and thrive Examining the concept and the institutionalized practice of embedded liberalism this collection provides a survey of the macro patterns in industrialized countries Leading scholars combine to demonstrate the benefits of embedded liberalism in practice as well as its gradual erosion at national levels and to analyze public opinion They provide a better understanding of what embedded liberalism means why it matters and how to reconstitute it in the context of the global economy The contributors contextualize the current challenge historically and theoretically so that students scholars and policy makers alike are reminded of what is at stake and what is required **Vietnam's Foreign Exchange Statistics and Evidence of Long-Run Equilibrium ,**

Demand, Complexity, and Long-Run Economic Evolution Andreas Chai,Chad M. Baum,2019-05-11 The purpose of this contributed volume is to consider how global consumption patterns will develop in the next few decades and what the consequences of that development will be for the economy policymakers and society at large In the long run the extent to which economic growth translates into better living conditions strongly depends on how rising affluence and new technologies shape consumer preferences The ongoing rise in household income in developing countries raises some important questions Will consumption patterns always continue to expand in the same manner as we have witnessed in the previous two centuries If not how might things evolve differently And what implications would such changes hold for not only our understanding of consumption behavior but also our pursuit of more sustainable societies Fusion for Profit Sharan Jagpal,with the assistance of Shireen Jagpal,2008-09-26 The corporate world is typically structured in silos Managers urgently need to overcome this silo effect by fusing ideas across different functional areas in the firm In *Fusion for Profit* Sharan Jagpal a well known and highly respected multidisciplinary researcher and business consultant explains in simple language using real world examples how managers can use sophisticated concepts to fuse different functional areas in the firm especially marketing and finance to increase the firm s value The author provides novel solutions to a wide range of complex business problems ranging from choosing pricing and bundling strategies to positioning and messaging strategies to

measuring brand equity to measuring advertising productivity in a mixed media plan including Internet advertising to compensating a multiproduct sales force to measuring the potential gains and risks from mergers and acquisitions These concepts are illustrated using case studies from a variety of firms in different industries including AT T Coca Cola Continental Airlines General Electric Home Depot Southwest Airlines and Verizon
