The Ark and Beyond Ben A. Minteer,Jane Maienschein,James P. Collins,2018-02-23 Scores of wild species and ecosystems around the world face a variety of human caused threats from habitat destruction and fragmentation to rapid climate change But there is hope and it too comes in a most human form zoos and aquariums Gathering a diverse multi institutional collection of leading zoo and aquarium scientists as well as historians philosophers biologists and social scientists The Ark and Beyond traces the history and underscores the present role of these organizations as essential conservation actors It also offers a framework for their future course reaffirming that if zoos and aquariums make

biodiversity conservation a top priority these institutions can play a vital role in tackling conservation challenges of global magnitude While early menageries were anything but the centers of conservation that many zoos are today a concern with wildlife preservation has been an integral component of the modern professionally run zoo since the nineteenth century From captive breeding initiatives to rewilding programs zoos and aquariums have long been at the cutting edge of research and conservation science sites of impressive new genetic and reproductive techniques Today their efforts reach even further beyond recreation with educational programs community based conservation initiatives and international collaborative programs designed to combat species extinction and protect habitats at a range of scales Addressing related topics as diverse as zoo animal welfare species reintroductions amphibian extinctions and whether zoos can truly be wild this book explores the whole range of research and conservation practices that spring from zoos and aquariums while emphasizing the historical scientific and ethical traditions that shape these efforts Also featuring an inspiring foreword by the late George Rabb president emeritus of the Chicago Zoological Society Brookfield Zoo *The Ark and Beyond* illuminates these institutions growing significance to the preservation of global biodiversity in this century

Kenneth George Tobin, 2006 Teaching and Learning Science consists of 66 chapters written by more than 90 leading educators and scientists. The contributions are informed by cutting edge theory and research and address numerous issues that are central to K 12 education. The book is arranged according to themes that are central to science education: language and scientific literacy, home and school relationships, equity, new roles for teachers and students, connecting science to other areas of the curriculum, resources for teachers and learners, and science in the news. The authors address controversial topics such as evolution and present alternative ways to think about teaching learning, the outcomes of science education, and issues associated with high stakes testing. In addition, relationships between science and literacy are explored in terms of art and science, making sense of visuals in textbooks, reading writing children's literature, and uses of comics to represent science.
