web fixed baseplate design user manual download sample report open calculation the scope of this calculation module is to design fixed base plate for uniaxial moments and axial loads transferred from steel column to foundation concrete with or without stiffener plates axial load can either be tensile or compressive in nature

stiffeners steelconstruction info - Apr 11 2023

web stiffeners are secondary plates or sections which are attached to beam webs or flanges to stiffen them against out of plane deformations almost all main bridge beams will have stiffeners however most will only have transverse web stiffeners i e vertical stiffeners attached to the web deep beams sometimes also have longitudinal web stiffeners

web aug 22 2020 i think the method for base plate design case with m and n dimensions is mainly for concentrically loaded

column or with small eccentricities for large moment with resultant force fall outside of the kern you should use other methods
