**Evangelization and Cultural Conflict in Colonial Mexico** Robert H. Jackson, 2014-05-02 In a study published in the mid twentieth century French historian Robert Ricard postulated that the evangelization and conversion of the native populations of Mexico had been rapid and relatively easy However different forms of evidence show that the so called spiritual conquest was anything but easy or rapid and in fact natives continued to practice their traditional beliefs alongside Catholicism Within several decades of initiating the so called spiritual conquest the campaign to evangelize and convert the native populations the missionaries faced growing evidence of idolatry or the persistence of traditional religious practices and apostasy straying from Church teachings The evidence includes written documents such as inquisition investigations that resulted for example in the execution of don Carlos the native ruler of Tezcoco on December 1 1539 or that uncovered evidence of systematic organized resistance to Dominican missionaries in the Sierra Mixteca of Oaxaca Other forms of evidence include pre Hispanic religious iconography incorporated into what ostensibly were Christian murals and pre Hispanic stones embedded in the churches and convents the missionaries had built One example of this was the stone with the face of Tl loc at the rear of the Franciscan church Santiago Tlatelolco in Distrito Federal During the course of some three centuries missionaries from different Catholic religious orders attempted to convert the native populations of colonial Mexico with mixed results Native groups throughout colonial Mexico resisted the imposition of the new religion in overt and covert forms and incorporated Catholicism into their worldview on their own terms Native cultural and religious traditions were more flexible than the Iberian Catholic norms introduced by the missionaries The so called spiritual conquest a term coined by Ricard evolved as a cultural war set against the backdrop of the imposition of a foreign colonial regime The 11 essays in this volume examine the efforts to evangelize the native populations of Mexico the approaches taken by the missionaries and native responses The contributions investigate the interplay between natives and missionaries in central Mexico and on the southern and northern frontiers of New Spain and among sedentary and non sedentary natives In the end many natives found little in the new faith to attract them and resisted the imposition of new religious norms and way of life

**The Colonial Andes** Elena Phipps, Johanna Hecht, Cristina Esteras Martín, Metropolitan Museum of Art (New York, N.Y.), 2004 The arrival of the Spanish in South America in 1532 permanently transformed the Andean cultural landscape Within a generation societies that had developed over thousands of years including the great Inca Empire had been irrevocably altered The arts from the

Spanish colonial period those that drew on native traditions such as textiles silver woodwork and stonework as well as painting sculpture and other genres introduced by the Spanish preserve an unspoken dialogue that developed between Andean and European modes of expression This beautiful book presents silver objects textiles and other masterpieces of colonial Andean culture Essays discuss the artistry of this culture and explain how it has been recently reevaluated and celebrated for its vibrant energy reflecting the convergence of two essentially distinct cultural traditions This book accompanies an exhibition at The Metropolitan Museum of Art September 29 to December 12 2004 Elena Phipps is conservator Textile Conservation and Johanna Hecht is associate curator European Sculpture and Decorative Arts at The Metropolitan Museum of Art

**Colonial Urbanism in the Age of the Enlightenment** Claudia Murray, 2023-06-06 This book tells the story of how the monarchy aimed at creating a new capital city in a remote and forgotten area of the empire It also shows how the local Creole bourgeoisie rapidly assumed the role of urban developers and enhanced their economic status by investing in and controlling the Buenos Aires property market In a short period from 1776 to 1810 the urban transformation of Buenos Aires helped increase the Crown's revenues and considerably reduced contraband trade Nevertheless urban changes generated an internal struggle for power for the control of the city between the Spanish loyalist and the local wealthier Creoles As this book concludes for an empire such as the Spanish which was built upon a network of cities the Crown's loss of the control of Buenos Aires urban space was a serious threat to its power that foreshadowed Argentina's wars of independence

Death and Dying in Colonial Spanish America Martina Will de Chaparro, Miruna Achim, 2011-12-01 When the Spanish colonized the Americas they brought many cultural beliefs and practices with them not the least of which involved death and dying The essays in this volume explore the resulting intersections of cultures through recent scholarship related to death and dying in colonial Spanish America between the sixteenth and eighteenth centuries The authors address such important questions as What were the relationships between the worlds of the living and the dead How were these relationships sustained not just through religious dogma and rituals but also through everyday practices How was unnatural death defined within different population strata How did demographic and cultural changes affect mourning The variety of sources uncovered in the authors original archival research suggests the wide diversity of topics and approaches they employ Nahua annals Spanish chronicles Inquisition case records documents on land disputes sermons images and death registers Geographically the range of research focuses on the viceroyalties of New Spain Peru and New Granada The resulting records both documentary and archaeological offer us a variety of vantage points from which to view each of these cultural groups as they came into contact with others Much less tied to modern national boundaries or old imperial ones the many facets of the new historical research exploring the topic of death demonstrate that

no attitudes or practices can be considered either Western or universal
