Hasday, 2001 A biography of the young star of the movie E T who survived her troubled early years and has gone on to become a successful actress and movie producer Danger in Space Henry M. Holden, 2012-07-01 Soaring through space at 25 000 per hour Apollo 13 was on course for the Moon Suddenly the three astronauts aboard the spacecraft heard a loud bang A strong vibration rumbled through the crew cabin There had been an explosion in the oxygen tank More than 200 000 miles from Earth Apollo 13 was in grave danger The astronauts had planned to land on the Moon but now they had a new mission survival Author Henry M Holden delivers the gripping details of how three astronauts with the help of NASA scientists on Earth turned a story of disaster into one of triumph **Astronauts** Giles Sparrow, 2006 Discusses the race for space and the astronauts who were involved **Calculated Risk** George Leopold, 2016-06-15 Unlike other American astronauts Virgil I Gus Grissom never had the chance to publish his memoirs Killed along with his crew in a launch pad fire on January 27 1967 Grissom also lost his chance to walk on the moon and return to describe his journey Others went in his place The stories of the moon walkers are familiar Less appreciated are Grissom's contributions The international prestige of winning the Moon Race cannot be understated and Grissom played a pivotal and enduring role in securing that legacy for the United States Indeed Grissom was first and foremost a Cold Warrior a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union into space and eventually to the moon Drawing on extensive interviews with fellow astronauts NASA engineers family members and friends of Gus Grissom George Leopold delivers a comprehensive and corrective account of Grissom's life that places his career in the context of the Cold War and the history of human spaceflight **Calculated Risk** The Supersonic Life and Times of Gus Grissom adds significantly to our understanding of that tumultuous and ultimately triumphant period in American history **Selecting the Mercury Seven** Colin Burgess, 2011-08-17 The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism This work provides biographical details of all thirty two finalists for the seven coveted places as America's pioneering astronauts All of the candidates were among the nation's elite pilots involved in testing new supersonic aircraft capabilities Most had served as wartime fighter and bomber pilots some were test pilots on top secret and sophisticated aviation projects while others were fleet admirals prisoners of war and proposed pilots for spaceflight programs such as the Dyna Soar X 20 The names of all 32 finalists have been kept secret until very recently **Selecting the Mercury Seven** also relates the history and difficulties behind the initial choice of candidates The lives motivations military careers and achievements of the unsuccessful twenty five finalists are explored first in fully authorized biographies Test pilots for the U S Navy Air Force and Marine Corps each man has a fascinating and very different story to tell All thirty two men had to endure meticulous demeaning and brutal week long medical examinations at the Lovelace Clinic in New Mexico This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio where they were subjected to extreme fitness and

physiological testing the sole purpose of which was to sort out the Supermen from the near supermen The final part of the book examines the accomplishments and spaceflights of the seven successful candidates bringing their amazing stories right up to date     *Space Politics and Policy* E. **Past Imperfect** Mark C. Carnes,1996-11-15 Essays that consider how classic movies have reflected history include the writings of such noted historians as Paul Fussell Antonia Fraser and Gore Vidal     *Scheherazade Cat - The Story of a War Hero* Stephanie C. Fox,2017-01-01 We humans are capable of great good In the time that our species has been on Earth we have done remarkable things to improve the human condition But a dark and horrible side of our nature often comes to the surface in the form of military conflict With sad regularity our leaders become filled with greed intolerance and lust for

power resulting in bloodshed and cruelty that has become more and more horrible as our methods of killing become more efficient. Indeed, war is the most hideous of human experiences and is tragically a regular feature of our history. However, in the midst of wartime horror, sometimes people and events come together and give some hope that in the end, the positive aspects of human nature will triumph over our evil side. Scheherazade Cat: The Story of a War Hero is an example of how love, loyalty, and kindness can shine through the darkness of war and restore faith in the human spirit. This is the true story of Lieutenant David Haines, a United States Army chemical weapons officer, and Scheherazade, a calico kitten from Failaka Island, Kuwait. He met her while performing a mission there during the Persian Gulf War. Scheherazade was playing with a small bomb during this meeting, but fortunately, it did not detonate. Seeing this alerted Lt. Haines to the presence of other mines, allowing his squad to retreat safely. Recognizing that this encounter may have saved his life and those of his men, the soldier adopted Scheherazade and brought her to America. This is a simple tale about a chance encounter, but it is also a heartwarming lesson that showing kindness and loyalty to a small creature in the midst of extreme danger brings out the best in us. For this reason, the message of this book is a positive one that demonstrates the value of compassion and goodness.

*A History of Government Public Relations in the United States* Mordecai Lee, 2025-07-09. This book presents a history of public relations in the modern American administrative state. Because government agencies have a democratic obligation to be open and transparent, the practice of public relations by government is qualitatively different from that in business administration and nonprofit management. The duty of government agencies to engage in public relations largely emerged during the Progressive era, 1890-1920. It evolved significantly under President Franklin Roosevelt. He wanted citizens to know about New Deal programs they qualified for. During World War II, federal PR encouraged civic participation in the war effort. By the 1990s, the media's traditional coverage of government faded, requiring agencies to communicate in new ways. Government PR continued evolving in the 21st century to take advantage of advances in technology. This book relates to political science, American history, public administration, and communication PR. It is intended as a textbook by researchers and for academic libraries.

**Leadership Dispatches** Michael Useem, Howard Kunreuther, Erwann Michel-Kerjan, 2015-03-11. On February 27, 2010, Chile was rocked by a violent earthquake, five hundred times more powerful than the one that hit Haiti just six weeks prior. The Chilean earthquake devastated schools, hospitals, roads, and homes, paralyzing the country for weeks and causing economic damage that was equal to 18 percent of Chile's GDP. This calamity hit just as an incumbent political regime was packing its bags and a new administration was preparing to take office. For most countries, it would have taken years, if not decades, to recover from such an event. Yet only one year later, Chile's economy had reached a six percent annual growth rate. In *Leadership Dispatches*, Michael Useem, Howard Kunreuther, and Erwann Michel-Kerjan look at how the nation's leaders in government, business, religion, academia, and beyond facilitated Chile's recovery. They attribute Chile's remarkable comeback to a two-part formula consisting of strong national leadership on the one hand

and deeply rooted institutional practices on the other Coupled with strategic deliberative thinking these levers enabled Chile to bounce back quickly and exceed its prior national performance The authors make the case that the Chilean story contains lessons for a broad range of organizations and governments the world over Large scale catastrophes of many kinds from technological meltdowns to disease pandemics have been on the rise in recent years Now is the time to seek ideas and guidance from other leaders who have triumphed in the wake of a disaster In this vein Leadership Dispatches is both a remarkable story of resilience and an instructive look at how those with the greatest responsibility for a country company or community should lead

What the Small Gray Visitor Said Stephanie C. Fox, 2020-08-26 It isn't often that a visitor from outer space gets stranded on Earth but it happens every so often When it does it's an accident No one intends to get stranded anywhere after all This visitor is female a botanist and a telepath The alien carries a Small Gray environmental suit with her She is looking for plants that can be grown on her own planet's severely depleted ecosystem The alien has just uprooted one when she finds herself stuck on Earth during a planet wide pandemic It is a spring day when Arielle an author and editor for hire spends her morning as she usually does writing editing blogging drinking coffee and sitting with her cat while looking out the back windows into her yard She gets up to stretch and takes a walk around her beautiful garden to enjoy some sunshine smell a few iris blossoms and survey her berries and herbs Suddenly she sees something under her honeysuckle bush At first she thinks it is discarded plastic litter that has blown around the area and she picks it up in disgust only to see that it is gray as light as a feather and definitely not plastic It has a face or rather a face covering Arielle glances up to find herself face to face with a stranded visitor the owner of the suit she is holding She takes her in after her husband a scientist tests them both for the virus The tests come back negative of course The aliens anticipating microbes that are not endemic to their own world have immunized themselves against Earth's pathogens before venturing out of their ship Find out what happens next and what the Small Gray Visitor said while she was here
