Hereford Locomotive Shed Steve Bartlett, 2017-10-30 Hereford Locomotive Shed is the first in a series of in depth studies to look closely at the changing engine allocations and operational responsibilities of motive power depots during the latter days of steam In Herefords case this was a varied mixture of main line passenger freight trip working branch line passenger station pilot duties and yard shunting Unusually the latter remained a steam preserve until months before depot closure in November 1964 Not forgotten are the depots small sub sheds which had varying responsibilities over the years as the district boundaries changed at Ledbury Leominster Ross on Wye and Craven Arms Their very different duties were inevitably a reflection of a bygone age and an all too rapidly changing future The author personally recorded the Hereford railway scene from the late 1950s until depot closure He made shed visits several times a week and at other times observed the ever changing locomotive scene from the elevated Bulmers Sidewalk behind the depots coaling stage Details carefully kept from those far off days has proved a valuable cross reference with present day research into Herefords role from official records at The National Archives Kew and other railway research sources Having spent almost forty years working in the industry the author is able to sympathetically unravel and interpret the story of this hard working mixed traffic depot Hereford is strategically located on the North West route from South Wales and the West of England to the North West as well as being an important junction for Worcester the West Midlands Branch lines to Brecon and Gloucester radiated from this Border Counties railway junction and freight trips radiated out to serve the surrounding area All of this made Hereford a fascinating rail centre and a locomotive shed worthy of its story for posterity which is meticulously recorded in this book **Shropshire Parish Registers** Shropshire Parish Register Society, 1915 The World's First Railway System Mark Casson, 2009-09-10 This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done **Early Travels in Palestine** Thomas Wright, 2024-01-01 Early Travels in Palestine by Thomas Wright gives a fascinating glimpse into the writer s explorations of the Holy Land all through the 19th century The book details Wright s experiences and observations as he navigates the ancient landscapes of Palestine A travelogue of cultural and ancient significance Wright s narrative gives readers with a bright portrayal of the location blending personal encounters with the broader ancient context Wright s eager eye for detail and his appreciation for the archaeological and architectural marvels of Palestine shine via in the pages of this paintings As he traverses ancient cities and sacred web sites the author weaves collectively a narrative this is each informative and reflective The book no longer only serves as a journey account however additionally delves into the

complexities of the political and social dynamics of the time Early Travels in Palestine is a testament to Wright's intellectual curiosity and his dedication to documenting the landscapes and cultures he encounters The textual content is richly adorned with descriptions of biblical websites local customs and the author's interactions with the various communities inhabiting the location
