**The Barcelona Pavilion by Mies van der Rohe** Dietrich Neumann, 2020-12-07 While Mies van der Rohe's pavilion at the International Exposition in Barcelona in 1929 went unnoticed by most of the visitors to the fairgrounds contemporary critics enthusiastically hailed it as the most convincing statement of the Modern Age This book presents 100 selected texts about this much discussed building written then and now from the opening speech by the Spanish king to newspaper articles and private letters voices of contemporary architects architecture critics and historians and even a text by artist Ai Weiwei who created an installation in the outdoor area of the pavilion in 2010 Thus the history of this building's reception depicts a dazzling picture and inconceivable breadth including statements by such eminent authors as Frank Lloyd Wright Leonardo Benevolo Rem Koolhaas Peter Eisenman

*American Architects and the Mechanics of Fame* Roxanne Kuter Williamson, 2014-03-07 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one's own vision Perhaps she says this is the case in all the arts *American Architects and the Mechanics of Fame* is sure to provoke thought and comment in architecture and other creative fields

**The Rise of the Joyful Economy** Michael Hutter, 2015-03-24 This book argues for the increasing importance of the arts as a major resource in fuelling growth through the experiential dimension of today's economy As we move from the knowledge economy to a new stage called the joyful economy, consumers shift their spending from physical objects and technical know-how to experiences of joy and disappointment This book investigates how artistic ideas are translated into successful commercial production and how economic growth impacts artistic invention It examines cases of successful innovation in the creative industries ranging from the Italian Renaissance to the present The book suggests a framework where social players move in diverse worlds of value which leads to a stream of controversies and manias that result in the establishment of new joy products Studies include the effect of linear perspective as pioneered by Filippo Brunelleschi, the discovery of taste as an argument for consumption, the serial production of Pop Art and the self-commercialization of contemporary works by artists like Takashi Murakami This theoretical and empirical study brings together the fields of cultural economics, economic sociology, management studies and cultural history In doing so it offers a fascinating study of how creativity has shaped and fuelled commerce
