Outsourcing Energy Management Steven Fawkes, 2017-05-15 This book describes energy management outsourcing as a way of addressing the current energy challenges facing all organizations, namely high and volatile energy prices, the need to mitigate climate change and potential supply constraints as oil production peaks. Factor X Michael Angrick, Andreas Burger, Harry Lehmann, 2013-11-26 The editors of Factor X explore and analyze this trajectory predicting scarcities of non renewable materials such as metals limited availability of ecological capacities and shortages arising from geographic concentrations of materials They argue that what is needed is a radical change in the ways we use nature s resources to produce goods and services and generate well being The goal of

saving our ecosystem demands a prompt and decisive reduction of man induced material flows Before 2050 they assert we must achieve a significant decrease in consumption of resources in the line with the idea of a factor 10 reduction target EU wide and country specific targets must be set and enforced using strict accurate measurement of consumption of materials Their arguments are drawn from empirical evidence and observations as well as theoretical considerations based on economic modeling and on natural science *Investment Grade Energy Audit* Shirley J. Hansen, James W. Brown, 2003-10-29 This book was written to give energy involved professionals the tools they need to take their energy audits to the next level and use them to accurately predict a building's future energy use and true savings potential Going beyond the conventional energy audit which can lead to projections which are frequently off by as much as 20% this book provides detailed guidelines on how to use the new tool the investment grade audit IGA which enables prediction of savings with much greater accuracy Building on the traditional audit the IGA requires the addition of a risk assessment component which evaluates conditions in a specific building and or process and reduces the level of uncertainty as to how proposed energy efficiency measures will really behave over time The authors have covered every aspect of the IGA including risk management the people factor measurement and verification financing issues report presentation guidelines and master planning strategies **Water Poverty** Shirley J.
