Hyman's Comparative Vertebrate Anatomy Libbie Henrietta Hyman, 1992-09-15 The purpose of this book now in its third edition is to introduce the morphology of vertebrates in a context that emphasizes a comparison of structure and of the function of structural units The comparative method involves the analysis of the history of structure in both developmental and evolutionary frameworks The nature of adaptation is the key to this analysis Adaptation of a species to its environment as revealed by its structure function and reproductive success is the product of mutation and natural selection the process of evolution The evolution of structure and function then is the theme of this book which presents system by system the evolution of structure and function of vertebrates Each chapter presents the major evolutionary trends of an organ system with instructions for laboratory

exploration of these trends included so the student can integrate concept with example *The Principal Diseases of Lower Vertebrates* H. Reichenbach-Klinke, E. Elkan, 2013-10-22 *The Principal Diseases of Lower Vertebrates* presents the material published by Heinz H Reichenbach Klinke between 1957 and 1962 in three separate volumes as *Krankheiten der Aquarienfische* Alfred Kernen Stuttgart *Krankheiten der Amphibien* and *Krankheiten der Reptilien* Gustav Fischer Stuttgart The scope of the work has been enlarged with material contributed by E Elkan who has also done the translation Representatives of the main groups of parasites affecting fish have been presented as far as possible The book is organized into three parts covering the diseases of fishes amphibians and reptiles Experience has shown that those who keep or are interested in one kind of lower vertebrate will sooner or later also take an interest in one of the other groups It was therefore thought expedient to include what is at present known of lower vertebrate pathology in one volume even at the risk of some repetition where fishes amphibians and reptiles suffer from similar diseases or are the victims of identical parasites
