Dearing,2022-08-19 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1959 **Text Analysis for the Social Sciences** Carl W. Roberts,2020-07-24 This book provides descriptions and illustrations of cutting edge text analysis methods for communication and marketing research cultural historical comparative and event analysis curriculum evaluation psychological diagnosis language development research and for any research in which statistical inferences are drawn from samples of texts Although the book is accessible to readers having no experience with content analysis the text analysis expert will find substantial new material in its pages In particular this collection describes developments in semantic and network text analysis methodologies that heretofore have been accessible only among a smattering of methodology journals The book s international and cross disciplinary content illustrates the breadth of quantitative text analysis applications These applications demonstrate the methods utility for international research as well as for practitioners from the fields of sociology political science journalism communication computer science marketing education and English This is an ecumenical collection that contains applications not only of the most recent semantic and network text analysis methods but also of the more traditional thematic method of text analysis In fact it is originally with this volume that these two relational approaches to text analysis are defined and contrasted with more traditional thematic text analysis methods The emphasis here is on application The book s chapters provide guidance regarding the sorts of inferences that each method affords and up to date descriptions of the human and technological resources required to apply the methods Its purpose is as a resource for making quantitative text analysis methods more accessible to social science researchers Mobile Communication and Greater China Wai-chi Rodney Chu,2012 This edited volume examines mobile phone use in China Unlike most studies on ICT development in China this book argues for the importance of the cultural realm as captured in mobile phone usage in reflecting the normative basis and struggle of the people It stresses how the mobile phone is in fact an important means by which one can understand a rapidly changing China A key concern of the book is to assert the uniqueness of China s experience in mobile phone usage This uniqueness is encapsulated by the phrase riding the double juggernaut in that Chinese society is exposed to a rapid process of industrialization and cyberization in a short

period of time The contributors maintain that such density of experience under a compressed period when the society has a thick cultural heritage of its own and yet is still under a dictating rule all come together to provide a unique situation in China
