Manufacture Of Evil Ethics Evolution And The Industrial State:

The Manufacture of Evil Lionel Tiger, 1987 It is widely held that humanity is now in a terrible tangle of moral ethical and social confusion IN this ambitious new book an eminent anthropologist explains why we are in a this unsatisfactory state where we are going and what can be done about it *Evolution and Human Values*, 2022-03-07 Initiated by Robert Wesson *Evolution and Human Values* is a collection of newly written essays designed to bring interdisciplinary insight to that area of thought where human evolution intersects with human values The disciplines brought to bear on the subject are diverse philosophy psychiatry behavioral science biology anthropology psychology biochemistry and sociology Yet as organized by co editor Patricia A Williams the volume falls coherently into three related sections Entitled *Evolutionary Ethics* the first section brings contemporary research to an area first explored by Herbert Spencer *Evolutionary ethics* looks to the theory of evolution by natural selection to find values for human living The second section *Evolved Ethics* discusses the evolution of language and religion and their impact on moral thought and feeling *Evolved ethics* was partly Charles Darwin s subject in *The Descent of Man* The last section bears the title *Scientific Ethics* A nascent field scientific ethics asks about the evolution of human nature and the implications of that nature for ethical theory and social policy Together the essays collected here provide important contemporary insights into what it is and what it may be to be human **Evolutionary Origins of**

Morality Leonard D. Katz, 2000 This volume includes four principal papers and a total of 43 peer commentaries on the evolutionary origins of morality **Genetic Seeds of Warfare** R. Paul Shaw, Yuwa Wong, 2020-12-22 For millennia humanity has simultaneously deplored and waged war With each conflict the stakes have risen and we now face global annihilation for the sake of a practice all the world claims to condemn Is there some seemingly irresistible force that impels us toward our own destruction To explain this central paradox of human behaviour *Genetic Seeds of Warfare* originally published in 1989 advances a startling new theory It traces the origins of warfare back to early groups of *Homo sapiens* in competition for scarce resources showing that warfare evolved as these groups evolved kin group against kin group tribe against tribe nation against nation Rather than being tied to a specific gene warfare emerged as one of many behavioural strategies for maximising genetic survival As social groups became more complex motivations for warfare developed from simple protection of blood relations to political appeals to shared ethnicity religion and national identity But the ultimate cause of warfare is rooted in the most basic of human drives the need to ensure that one s genes will survive and reproduce The authors challenge many assumptions about human behaviour in general and warfare in particular They convincingly present the case for an evolutionary understanding of the propensity for warfare supporting their argument with data from a vast array of social and natural science research In doing so they reveal why previous attempts at ending war have failed and make proactive suggestions toward the development of a new agenda for world peace **Routledge Library Editions:**

Security and Society Various, 2021-09-30 This 12 volume set contains titles originally published between 1934 and 1995 An

eclectic mix of titles this collection draws from anthropology economics ethics politics psychology and sociology Exploring security in both war and peacetime it includes volumes looking at the causes of war and its effect on society as a whole the soldiers themselves and their place in society the portrayal of war in the press both in words and photographs and the politics behind them **The Origin of Values** Michael Hechter,Lynn Nadel,Richard E. Michod,1993-01-01 Although values play a leading role in nearly every explanatory theory in the broad realm of the social and behavioral sciences very little multidisciplinary research material on values is available Addressing this need the editors bring together distinguished social scientists psychologists and biologists who collaboratively explore fundamental questions about values What are the determinants of social values taboos and ideologies What are the determinants of individual values What is the nature of motivations and rewards Is there an evolutionary basis for the development of values **The Imperial Animal** Lionel Tiger,2017-07-12 The Imperial Animal offers a compelling perspective on the controversy over humans and their biology This now classic study is about the social bonds that hold us together and the antisocial theories that drive us apart The authors divulge how the evolutionary past of the species reflected in genetic codes determines our present and coerces our future This book gives us a direct and intimate look at how we see ourselves It offers insight into our politics our ways of learning and teaching reproducing and producing playing and fighting The authors assert that the purpose of this book is twofold to describe what is known about the evolution of human behavior and then to try to show how the consequences of this evolution affect our behavior today To do this they draw from numerous disciplines zoology biology history and primatology among others In the new introduction Tiger and Fox outline then reasons for originally writing the book as well as the process they used to do their research The Imperial Animal is a classic work that will continue to be of interest to sociologists zoologists biologists and primatologists *Principles of Sustainable Living* Richard R. Jurin,2012-01-30 The e book for Principles of Sustainable Living is available at a reduced price and allows readers to highlight and take notes throughout the text When purchased through the Human Kinetics site access to the e book is immediately granted when your order is received **The Character of Human Institutions** Michael Egan,2017-07-28 This volume celebrates the life and work of Robin Fox and the idea of a biosocial science From his early studies of kinship primates the brain evolution the incest taboo and aggression to his later work on literature politics civilization law the Bible Shakespeare and the history of ideas Robin Fox inspired many with an evolutionary vision of humanity that goes beyond narrow disciplinary boundaries and embraces the universal history of mankind Fox s work represents an independent biosocial science stream of thinking that accepts the Darwinian mandate while avoiding reductionism by recognizing culture as a natural phenomenon The essays cover Fox s life and his contributions and address topics as diverse as the meaning and function of laughter the unforgiving discipline of writing popular anthropology extreme drinking rituals among young men training for the British army Darwin and close cousin marriage the universal essence of the epic form as a super attractor anthropologists autobiographies the conflict

between science and anti science and the decline of British imperial education This engaging collection on a mainstream maverick has been edited by Michael Egan It includes essays by Sir Antony Jay Lionel Tiger Howard Bloom Michael McGuire Kate Fox Melvin Konner Alan Macfarlane Adam Kuper Dieter Steklis Alexandra Maryanski Bernard Chapais Jonathan Turner Linda Stone Charles Macdonald Anne Fox David Jenkins Frederick Turner Robert Trivers and an essay by Robin Fox himself

The Pursuit of Pleasure , But just as there have been suspicions of the dangers of pleasure there have also been its supporters who assert its vital and joyful centrality to human experience The Pursuit of Pleasure favors an agnostic approach borrowed from natural science BOOK JACKET *The Environment, Our Natural Resources, and Modern Technology* Thomas R. DeGregori, 2008-06-02 Always controversial Thomas DeGregori has released another classic volume that is sure to inform confound and present new perspectives on today's environmental issues This time he is taking on the environmentalists naturalists green consumerists and those that hail the natural lifestyle as the healthy politically correct thing to do DeGregori examines the economics of green consumerism the reality of saving the environment how historical cultures may have influenced environmental damage and how being ecologically correct may have a more damaging effect on our environment Not just a regurgitation of theories DeGregori offers real time strategies and alternatives to enhance our natural resources and our environment in harmony with today's modern technology This is the book everyone will be talking about for years to come The Decline of Males Lionel Tiger, 2000-09-02 Tiger links current social problems such as the increasing numbers of single mothers abortions working women and men abandoning their families to the rise of efficient methods of contraception which has marginalized men in the process of reproduction Jacket **Human Nature and Public Policy** A. Somit, S. Peterson, 2003-07-03 Arguing for an evolutionary perspective this book directly challenges the Standard Social Science Model SSSM on which public policy has often been based The SSSM maintains that human behavior is solely the product of culture and learning In sharp contrast the Evolutionary Model EM holds that our behavior flows from the interaction between learning and culture on the one hand and biological factors especially our evolutionary legacy on the other These different approaches to human behavior understandably lead to divergent conceptions of sound domestic and foreign policy The SSSM views human behavior as essentially plastic and thus readily changed by governmental action Disagreeing the Evolutionary Model sees that malleability as seriously limited by our species evolved propensity for aggression status seeking xenophobia ethnocentrism and hierarchical social structures *God's Brain* Lionel Tiger, Michael McGuire, The joint effort of two distinguished authors and scholars is impressive It manages to bring the experience and energy of both men together in one pithy provocative package Washington Times With economy evidence and no little wit and elegance Lionel Tiger and Michael McGuire look for the answer to religion's ubiquity and persistence in the only place possible the human brain To say more would be to give away their answer and that would spoil a great read and a serious and informative argument This is easily the best book on the nature of religion to appear for a long time Robin Fox University

Professor of Social Theory Rutgers University If God's Brain sounds whimsically paradoxical it is only because the authors believe that most people of faith have been looking for God in all the wrong places The authors suggest that religious believers should look inward rather than outward to find God The book is a well written easy to read unique perspective on religion Yes God has a brain The book will captivate all but the piously religious faint of heart Jay R Feierman Editor The Biology of Religious Behavior The Evolutionary Origins of Faith and Religion Two distinguished authors radically alter the fractious debate on the existence of God and the nature of religion Taking a perspective rooted in evolutionary biology with a focus on brain science renowned anthropologist Lionel Tiger and pioneering neuroscientist Michael McGuire a primary discoverer of serotonin's crucial role in brain chemistry elucidate the perennial questions about religion What is its purpose How did it arise What is its source Why does every known culture have some form of it Their answer is deceptively simple yet at the same time highly complex The brain creates religion and its varied concepts of God and then in turn feeds on its creation to satisfy innate neurological and associated social needs Brain science reveals that humans and other primates alike are afflicted by unavoidable sources of stress that the authors describe as brainpain To cope with this affliction people seek to brainsoothe We humans use religion and its social structures to induce brainsoothing as a relief for innate anxiety How we do this is the subject of this groundbreaking book In a concise lively accessible and witty style the authors combine zoom lens vignettes of religious practices with discussions of the latest research on religion's neurological effects on the brain Among other topics they consider religion's role in providing positive socialization its seeming obsession with regulating sex creating an afterlife how religion's rules of behavior influence the law the common biological scaffolding between nonhuman primates and humans and how this affects religion a detailed look at brain chemistry and how it changes as a result of stress and evidence that the palliative effects of religion on brain chemistry is not matched by nonreligious remedies Concluding with a checklist offering readers a means to compute their own brainsoothe score this fascinating book provides key insights into the complexities of our brain and the role of religion perhaps its most remarkable creation Lionel Tiger New York NY is the bestselling author of Men in Groups The Imperial Animal with Robin Fox The Pursuit of Pleasure Optimism The Biology of Hope and The Decline of Males His articles have appeared in the New York Times the Wall Street Journal Rolling Stone Harvard Business Review and Brain and Behavioral Science He is the Charles Darwin Professor of Anthropology at Rutgers University Michael McGuire MD Cottonwood CA is the author or editor of ten books including Darwinian Psychiatry with A Troisi He is the president of the Biomedical Research Foundation director of the Bradshaw Foundation and the Gruter Institute of Law and Behavior and a trustee of the International Society of Human Ethology Formerly he was a professor

Compliance Ideologies Richard W. Wilson, 1992-05-29 Originally published in 1992 this book is about political culture It examines developments in the social sciences and integrates them into a theoretical explanation of historical changes in political values The starting point is the premise that political culture is rooted in the

interaction between individual thinking and social norms *Sociobiology and Conflict* V. Falger, 2012-12-06 1 1 THE STUDY OF CONFLICT Polemos Pantoon Pater Heraclitus Conflict on all levels of organic existence is pervasive persistent ubiquitous Conflict is the universal experience of all life forms Organisms are bound in multiple conflict configurations and coalitions which have their own dynamic and their own logic This does not mean however that the more paroxysmal forms of conflict behaviour naked violence and destruction are also universal Conflict and cooperation are always intertwined Conflicts do however have a propensity to gravitate towards violence There is as Pettman 1975 pointed out no accepted or agreed list of the social units by which conflicts might be classified To talk of conflict in intra personal inter personal familial group class ethnic religious intra state or inter state terms is to assume perhaps erroneously that each kind of social unit having its own range of size structure and institutions will also have its own modes of interaction and thus its own patterns of conflict with other social units Fink 1968 like and unlike itself Such an assumption merits scrutiny on its own since despite the plausibility of some sort of analytical link between the parties to a conflict and the nature of the confrontation that ensues the link should be demonstrated and not allowed to stand by assertion alone This volume is devoted to one type of analysis of conflict the socio biological one **Books in Print** ,1991 Public Characters James M.
