MANUFACTURING

VICTIMS

What the
Psychology Industry
is doing to People

"This book is dynamic. While showing tremendous compassion towards real victims of rape, accidents and torture, Dr. Tania Dineen skillfully takes the Psychology Industry to task for destroying families, promoting hostile views of men and women, promoting distrust and suspicion, and misusing science."

Manufacturing Victims What The Psychology Industry Is Doing To People:

Manufacturing Victims Tana Dineen, 1998 *Ethical Issues and Guidelines in Psychology* Philip Banyard, Cara Flanagan, 2006-04-07 How do we know right from wrong good from bad help from hindrance and how can we judge the behavior of others Ethics are the rules and guidelines that we use to make such judgements Often there are no clear answers which make this subject both interesting and potentially frustrating In this book the authors offer readers the opportunity to develop and express their own opinions in relation to ethics in psychology There are a number of famous many psychological studies that appear to have been harmful or cruel to the people or animals who took part in them For example memory researchers carried out studies on a man who had no memory for over forty years but because he had no memory he was never able to agree to the studies Is this a reasonable thing to do to someone Comparative psychologist Harry Harlow found that he could create severe and lasting distress in monkeys by keeping them in social isolation Is this a reasonable thing to do even if we find out useful things about human distress If you were able to use psychological techniques to break someone down so that they revealed information that was useful to your government would you do it If so why and if not why not These ethical issues are not easy to resolve and the debates continue as we encounter new dilemmas The book uses many examples of psychological research to look at key ethical issues ethical guidelines of psychologists socially sensitive research ethics in applied psychology the use of animals in research This book will be essential reading for and undergraduate and pre undergraduate students studying psychology and students of other subjects concerned with ethics **Doing Counselling**

Research John McLeod, 2003-05-16 This is a great starting point for anyone studying or interested in counselling research I would thoroughly recommend the Second Edition of this book Terry Hanley Healthcare Counselling and Psychotherapy Journal Doing Counselling Research Second Edition is a practical and accessible introduction to the research process within counselling and psychotherapy Written both as a guide to carrying out research and to using existing findings to inform practice it provides essential information for all trainees and practitioners John McLeod guides the reader through the principles and practice of undertaking a successful research project explaining how to review the literature select appropriate methods qualitative and quantitative collect data design and implement an effective study plan evaluate findings Taking account of developments in research methods the book has been fully revised and updated and includes new chapters on evidence based practice and practitioner research Research literacy is now within the skillset of all counsellors and psychotherapists and as a practical introduction to the subject Doing Counselling Research will be indispensable to trainees and practitioners alike **Healing Trauma** Kitty K. Wu, Catherine S. Tang, Eugenie Y. Leung, 2011-04-01 This is the first book written on clinical research and work related to the development of applied trauma psychology in Hong Kong Contributed by numerous reputable researchers and clinicians the book covers the latest research on and practice in assessment psychological sequel including psychological distress and growth of traumatic experience evidence based clinical

intervention and rehabilitation services for people affected by various traumatic stresses Discussed in detail are interpersonal trauma like child sexual abuse and family violence health and medical trauma such as infectious disease and the pain related to end of life mass trauma and disaster including community psychological support programme developed in Hong Kong and Sichuan as well as the rationale for mainstreaming trauma training in university education This book serves to strengthen the link between research and practice and between academic work and community awareness It is a guidebook for professionals serving the traumatized academics dedicated to research and development of trauma psychology students learning and educators passing on the existing knowledge and experience accumulated for healing trauma

Neurosis and Modernity Petteri Pietikainen, 2007-07-30 In late nineteenth century Sweden paths to modernity created socio cultural conditions conducive to the dissemination of the language of nerves This book shows how neurosis became an extremely contagious diagnosis and how our modern language of discontent stress and malaise has a history that goes back to the birth of modern neuroses in the 1880s Hysteria neurasthenia psychoneurosis and other neuroses spread from middle class women to all segments of the Swedish population and by the mid 1950s nobody was safe from the medico cultural virus of neurosis While offering the first historical analysis of the ways in which neuroses became a national malady in Sweden this book illustrates and analyses general aspects of social and cultural history during the Age of Nervousness

Worked Up Selves E. Swan, 2009-11-27 Drawing upon current literature on the history and politics of therapeutic cultures and upon original qualitative research this book was produced in response to rapidly growing interest in the rise of new HRD practices such as

coaching soft skills training and personal development training

The Skeptic Encyclopedia of Pseudoscience Michael Shermer, 2002-11-14 A thorough objective and balanced analysis of the most prominent controversies made in the name of science from the effectiveness of proposed medical treatments to the reality of supernatural claims Edited by Michael Shermer editor and publisher of The Skeptic magazine this truly unique work provides a comprehensive introduction to the most prominent pseudoscientific claims made in the name of science Covering the popular the academic and the bizarre the encyclopedia includes everything from alien abductions to the Bermuda Triangle crop circles Feng Shui and near death experiences Fifty nine brief descriptive summaries and 23 investigations from The Skeptic magazine give skeptical analyses of subjects as far ranging as acupuncture chiropractic and Atlantis The encyclopedia also gives for and against debates on topics such as evolutionary psychology and case studies on topics like police psychics and the medical intuitive Carolyn Myss Finally the volumes include five classic works in the history of science and pseudoscience including the speech William Jennings Bryan never delivered in the Scopes trial and the first scientific and skeptical investigation of a paranormal spiritual phenomenon by Benjamin Franklin and Antoine Lavoisier

Ableism in Education: Rethinking School Practices and Policies (Equity and Social Justice in Education) Gillian Parekh, 2022-05-10 How we organize children by ability in schools is often rooted in ableism Ability is so central to schooling where we explicitly and continuously shape assess measure and report on students abilities that ability based decisions often appear logical and natural However how schools respond to ability results in very real lifelong social and economic consequences Special education and academic streaming or tracking are two of the most prominent ability based strategies public schools use to organize student learning Both have had a long and complicated relationship with gender race and class In this down to earth guide Dr Gillian Parekh unpacks the realities of how ability and disability play out within schooling including insights from students teachers and administrators about the barriers faced by students on the basis of ability From the challenges with ability testing to gifted programs to the disability rights movement Parekh shows how ableism is inextricably linked to other forms of bias Her book is a powerful tool for educators committed to justice seeking practices in schools

The Courage to Lead R. Brian Stanfield, 2012-04 To transform society we first need to transform ourselves The Courage to Lead starts from this premise and delivers a strong simple message if you relate authentically to life to yourself to the world and to society you start the process of social change Grounded in more than fifty years of in depth research and practical experience in over thirty nations The Courage to Lead uses a large canvas to paint a vivid picture of leadership in its many forms personal family work organization community Activist stories from around the world demonstrate the profound premise and inspires a deep understanding of leadership This is a book that changes lives These days the complexity of life tends to leave us paralyzed The Courage to Lead will help people move out of their paralysis and invite them to join the ranks of those social pioneers who create what is needed for the 21st century This book speaks to you in a strange language that you do not at first remember but that you will eventually

recognize as your mother tongue David Patterson CEO Northwater Capital Management The Courage to Lead provided me with a great deal of guidance and support at a time when I needed to make significant life decisions It also provided me with a framework and a language to better understand who I am where I needed to be and where I wanted to go I recommend this course to anyone who is open to a transformative experience in which one brings many important life questions into focus Garret Keown Teacher in Training Lakehead University 325 University Health Network UHN staff have participated in The Courage to Lead study program over the last five years The fundamental principles in the book align with our belief that everyone can lead from where they stand We think that leadership is not about a formal role or job title but about a philosophy values and attitude in how one approaches life This program has helped staff tap into the leader within themselves and in doing so has supported our mission to deliver excellent patient centered care Irene Wright Senior Development Manager Human Resources University Health Network

The Death of Psychotherapy Donald A. Eisner, 2000-01-30 Psychologist attorney Eisner puts psychotherapy on trial by critically examining its effectiveness through the lens of the scientific method From psychoanalysis to cognitive behavior therapy as well as the 500 or so other psychotherapies there is not a single experimental study that supports the effectiveness of psychotherapy over a placebo or religious healing Using both case examples and clinical research this book challenges the conclusion that there is empirical support for the notion that psychotherapy is effective

Lost Daughters Reinder Van Til, 1997 Lost Daughters movingly depicts the human toll exacted by the widespread belief in Recovered Memory Therapy It portrays families devastated by daughters RMT inspired memories of childhood sexual abuse and their accusations against parents

Contesting Stories of Childhood Sexual Abuse J. Woodiwiss, 2009-08-26 Located within a burgeoning therapeutic self help culture this book explores stories of childhood sexual abuse recovered memories and multiple personalities and explodes the myths surrounding women who without memories redefine themselves as victims

Pseudoscience in Therapy Stephen Hupp, Cara L. Santa Maria, 2023-03-23 This field guide covers mental health myths diagnostic controversies questionable assessment practices and dubious treatments

Pseudoscience and the Paranormal Terence Hines, 2010-09-30 Television the movies and computer games fill the minds of their viewers with a daily staple of fantasy from tales of UFO landings haunted houses and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary or they never learn to make the distinction in the first place In this thorough review of pseudoscience and the paranormal in contemporary life psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence Hines devotes separate chapters to psychics life after death parapsychology astrology UFOs ancient astronauts cosmic collisions and the Bermuda Triangle faith healing and more New to this second edition are extended sections on psychoanalysis and pseudopsychologies especially recovered memory

therapy satanic ritual abuse facilitated communication and other questionable psychotherapies There are also new chapters on alternative medicine which is now marketed in our drug stores and on environmental pseudoscience with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer Finally Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary This valuable highly interesting and completely accessible analysis critiques the whole range of current paranormal claims

Placebo Dylan Evans,2004 Can we really cure ourselves of disease by the power of thought alone Faith healers and alternative therapists are convinced that we can but what does science say Contrary to public perception orthodox medical opinion is remarkably confident about the healing powers of the mind For the past fifty years doctors have been taught that placebos such as sugar pills and water injections can relieve virtually any kind of medical condition Yet placebos only work if you believe they work so the medical confidence in the power of the placebo effect has provided scientific legitimacy to popular claims about the healing power of the mind In this intriguing exploration Dylan Evans exposes the flaws in the scientific research into the placebo effect and reveals the limits of what can and cannot be cured by thought alone Drawing on new ideas in immunology and evolutionary biology Evans proposes a new theory about how placebos work and asks some searching questions about our concepts of health and disease

Bold Faith Ben Pugh,2017-03-09 Bill Johnson Joyce Meyer Heidi Baker The fame of these names is evidence enough that though the controversies are less intense the Charismatic Movement is alive and well today It continues to attract thousands of adherents who find its vision of a supernatural lifestyle uniquely compelling Now for the first time all that is most theologically innovative about the movement is synthesized into five distinct and original ideas These five brand new theologies have been created not by theologians but by practitioners who believed their concepts were inspired by the Spirit Inner Healing Shepherding Word of Faith Spiritual Warfare and Signs and Wonders Plenty of studies have been written by Pentecostal scholars about Pentecostal theology but these tend to group the very distinct approaches of Charismatics together with Classical Pentecostals Bold Faith aims to analyze and evaluate the ways in which practitioners within independent Charismatic networks especially in their Anglo American expressions have responded to the challenges of secular modernity

Counseling and the Therapeutic State James J. Chriss, **The Future of Training in Psychotherapy and Counselling** John Rowan,2014-02-25 The Future of Training in Psychotherapy and Counselling presents a revealing and stimulating account of the current state of training that demonstrates how training will have to adapt if it is to successfully meet the needs and challenges of the future In an attempt to look afresh at the whole question of training John Rowan proposes that there are three ways of doing therapy and any examination of training has to consider each of these the instrumental where the main emphasis is on the treating the client or patient the authentic way where the main emphasis is on meeting the client or patient the transpersonal way where main emphasis is on linking with the client in a more personal way Each approach makes different assumptions about the self

about the relationship and about the level of consciousness involved in doing therapy By challenging the basic precepts of traditional training John Rowan encourages the reader to reconsider subjects including the difference between counselling and psychotherapy culture and ethics the origins of disturbance in clients and child development The Future of Training in Psychotherapy and Counselling provides a much needed new perspective that will compel all psychotherapists and counsellors to take a closer look at training in the field **Encyclopedia of Trauma** Charles R. Figley, 2012-09-17 This timely and authoritative two volume set includes hundreds of signed entries by experts in the field of traumatology exploring traditional subjects as well as emerging ideas as well as providing further resources for study and exploration
