Networks of Music and Culture in the Late Sixteenth and Early Seventeenth Centuries David J. Smith, Rachelle Taylor, 2016-04-29 Peter Philips c 1560 1628 was an English organist composer priest and spy He was embroiled in multifarious intersecting musical social religious and political networks linking him with some of the key international players in these spheres Despite the undeniable quality of his music Philips does not fit easily into an overarching progressive view of music history in which developments taking place in centres judged by historians to be of importance are given precedence over developments elsewhere which are dismissed as peripheral These principal loci of musical development are given prominence over secondary ones because of their perceived significance in terms of later music However a consideration of the networks in which Philips was involved suggests that he was anything but at the periphery of the musical cultural religious and political life of his day In this book Philips s life and music serve as a touchstone for a discussion of various kinds of network in the late sixteenth and early seventeenth centuries The study of networks enriches our appreciation and understanding of musicians and the context in which they worked The wider implication of this approach is a constructive challenge to orthodox historiographies of Western art music in the Early Modern Period The Cambridge History of Medieval Music Mark Everist, Thomas Forrest Kelly, 2018-08-09 Spanning a millennium of musical history this monumental volume brings together nearly forty leading authorities to survey the music of Western Europe in the Middle Ages All of the major aspects of medieval music are considered making use of the latest research and thinking to discuss everything from the earliest genres of chant through the music of the liturgy to the riches of the vernacular song of the troubadours and trouvères Alongside this account of the core repertoire of monophony The Cambridge History of Medieval Music tells the story of the birth of polyphonic music and studies the genres of organum conductus motet and polyphonic song Key composers of the period are introduced such as Leoninus Perotinus Adam de la Halle Philippe de Vitry and Guillaume de Machaut and other chapters examine topics ranging from musical theory and performance to institutions culture and collections **Vivaldi** Michael Talbot, 2017-07-05 Since 1978 the 300th anniversary of Vivaldi s death there has been an explosion of serious writing about his music life and times Much of this has taken the form of articles published in academic journals or conference proceedings some of which are not easy to obtain The twenty two articles selected by Michael Talbot

for this volume form a representative selection of the best writing on Vivaldi from the last 30 years featuring such major figures in Vivaldi research as Reinhard Strohm Paul Everett Gastone Vio and Federico Maria Sardelli Aspects covered include biography Venetian cultural history manuscript studies genre studies and musical analysis The intention is to serve as a first port of call for those wishing to learn more about Vivaldi or to refresh their existing knowledge An introduction by Michael Talbot reviews the state of Vivaldi scholarship past and present and comments on the significance of the articles
