**Characters of the Information and Communication Industry** Richard F. Bellaver, 2011-05-06 I have taught a graduate course on the history of the information and communications industry for 20 years The course shows students how the world has moved from primitive communication to the integrated multi media situation we are in today Concentration is on the fields of journalism telecommunications broadcasting and computing Emphasis is placed on the leaders of the areas and the political and cultural surroundings that encouraged or discouraged growth of the industry It is true that technology

is a driving force of this industry but it has been the individual people characters impelled by discovery acceptance and marketability of that technology who have taken the next step to improve communication The Journalism field started with Gutenberg and early added Ben Franklin later it got a little yellow with Hearst and Pulitzer I think Henry Luce started the business of media integration but Rupert Murdoch certainly keeps it going The first practical use of electricity was found by Samuel Morse and his telegraph Bell invented the telephone or was it Meucci Theodore Vail invented the Bell System Broadcasting started with Marconis invention or was it Teslas David Sarnoff and William Paley made the medium practical and characters like Edwin R Morrow Walter Cronkite and even Oprah Winfrey gave it credibility Certainly Charles Babbage and Ada Lovelace had something to do with the start of computers but later scientists Vannevar bush and Jon von Neumann added the electronics Then UNIVAC convinced Thomas Watson Junior that IBM better start making them Jobs and Wozniac started the personal computer business but Bill Gates created the software to make them run Tim Berners Lee hooked those computers to a network and then Amazon eBay and Google found a way to make money using the result This book is the story of these people and companies *Benjamin Franklin's Intellectual World* Paul E. Kerry,Matthew S.

Holland,2012-12-27 This volume attempts to throw fresh light on two areas of Benjamin Franklin s intellectual world namely his self fashioning and his political thought It is an odd thing that for all of Franklin s voluminous writings a fantastically well documented correspondence over many years scientific treatises that made his name amongst the brightest minds of Europe newspaper articles satires and of course his signature on the Declaration of Independence and the U S Constitution and yet scholars debate how to get at his political thought indeed if he had any political philosophy at all It could be argued that he is perhaps the American Founder most closely associated with the Enlightenment Similarly for a man who left so much evidence about his life as a printer bookseller postmaster inventor diplomat politician scientist among other professions one who wrote an autobiography that has become a piece of American national literature and indeed a contribution to world culture the question of who Ben Franklin continues to engage scholars and those who read about his life His identity seems so stable that we associate it with certain virtues that apply to the way we live our lives time management for example The image of the stable figure of Franklin is applied to create a sense of trust in everything from financial institutions to plumbers His constant drive to improve and fashion himself reveal however a man whose identity was not static and fixed but was focused on growth on bettering his understanding of himself and the world he lived in and attempted to influence and improve **Benjamin Franklin** Christopher J.
