Appreciating Physical Landscapes T.A. Hose ,2016-02-01

Geotourism as a form of sustainable geoheritage tourism was defined and developed from the early 1990s to contextualize modern approaches to geoconservation and physical landscape management However its roots lie in the late seventeenth century and the emergence of the Grand Tour and its domestic equivalents in the eighteenth century Its participants and

numerous later travellers and tourists including geologists and artists purposefully explored wild landscapes as geotourists. The written and visual records of their observations underpin the majority of papers within this volume; these papers explore some significant geo-historical themes, organizations, individuals and locations across three centuries, opening with seventeenth-century elite travellers and closing with modern landscape tourists. Other papers examine the resources available to those geotourists and explore the geotourism paradigm. The volume will be of particular interest to Earth scientists, historians of science, tourism specialists and general readers with an interest in landscape history. *A Complete Catalogue of Books General, Theological, Historical, Artistic, Educational, and Juvenile*, 1888 Book Catalogue, 1854
