emphasis of this book to present aspiring scenographers with an approach and a set of concepts that will enable them to grow Toward that end Payne establishes five priorities the first of which is to develop in students what he calls time vision or the ability to see the historical past as a living place with living inhabitants The second priority is to bring about an awareness that allows students to see beneath the surface of objects and events Third students must be helped to recognize and appreciate the difference between the concept of space as it exists outside the theatre and the concept of space as it is used within the theatre The fourth priority is to ingrain in students an understanding of the importance of imagery to the scenographer and the final priority is to teach those technical skills necessary to carry out the concepts of the scenographer
