Mapping and Naming the Moon

A HISTORY OF LUNAR CARTOGRAPHY
AND NOMENCLATURE

Mapping And Naming The Moon

Geological Survey (U.S.)

Mapping And Naming The Moon:

Mapping and Naming the Moon Ewen A. Whitaker, 2003-12-11 Almost 30 years after the Apollo missions Tranquillity Base Hadley Rille or Taurus Littrow are names still resonant with the enormous achievements represented by the lunar landings But how did these places get their names Who named Copernicus Crater Where did all those names on lunar maps come from and what stimulated their selection Ewen Whitaker traces the origins and evolution of the present day systems for naming lunar features such as craters mountains valleys and dark spots The connections between the prehistoric and historic names and today s gazetteer are clearly described Beautiful lunar maps spanning four centuries of progress wonderfully illustrate the unfolding of our ability to map the Moon Rare early photographs add to the sense of history Comprehensive appendices and the bibliography make this delightful book a work of lasting reference and scholarship

Who's Who In The Moon Brian Jones, 2024-12-30 Who s Who in the Moon is aimed not only at the beginner or near beginner but also at the backyard astronomer who is perhaps experienced in other areas of observation but who has decided to spend more time considering the Moon as an alternative target The book provides a visual introduction to our closest celestial neighbor opening with an introductory section which details both with the history of lunar mapping and naming of lunar formations as well as providing useful information on observing the lunar surface and what observers can realistically expect to see when they look at the Moon with the naked eye binoculars or a small medium telescope The introductory section is followed by a lengthy series of images including not only wide field panoramic views but also a large number of more detailed images showing close up views of different areas of the Moon and featuring individual craters mountains valleys and much more Many of the individual features shown on these images are identified by name and are accompanied by biographical sketches relating to the men and women after whom they are named This is a non technical up close and personal visual look at the Earth s only natural satellite and many of the individual features scattered across its surface Rather than offering itself as a full and exhaustive guide to the lunar surface A Guide to the Moon is more of a vade mecum which enables and hopefully encourages the reader to become more acquainted with the lunar landscape on a personal level with a view to learning more about the astronomers and other scientists whose names are immortalised by having lunar features named after them Who s Who in the Moon was inspired by and is a tribute to a Memoir published by the British Astronomical Association BAA in 1938 entitled Who s Who in the Moon written by Mary Evershed the first Director of the BAA Historical Section The biographical notes in A Guide to the Moon include examples of those penned by Mary Evershed in her original publication
