Crawford, Jessica Nicole Cooke Bailey, William Scott Bush, 2020-10-30 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact **The Condor** ,1997 **Nature Conservation C** Margules, M Austin, 1990-01-01 The proceedings of a Cost Effective Biological Surveys and Data Analysis workshop held at the old Quarantine Station North Head Sydney in March 1988 under the auspices of the Council of Nature Conservation Ministers CONCOM and the Australian Environment Council AEC Natural Diversity in the New Millennium Joanna M. Cross, Chiarina Darrah, Nnadozie Oraguzie, Nourollah Ahmadi, Aleksandra Skirycz, 2016-09-06 Natural diversity has been extensively used to understand plant biology and improve crops However studies were commonly based on visual phenotypes or on a few measurable parameters Nowadays a large number of parameters can be measured thanks to next generation sequencing metabolomics proteomics and transcriptomics thus providing an unprecedented resolution in the detection of natural diversity This enhanced resolution offers new possibilities in terms of understanding plant biology Technology advances also contribute to a better assessment of the biodiversity loss currently taking place Hence the topic presents an

overview on efforts for maintaining biological diversity in crops on possibilities offered by recent technologies in the assessment of natural variation and ends with examples of the diversity found even at the cellular level Next-Generation Plant Breeding Approaches for Stress Resilience in Cereal Crops Mallana Gowdra Mallikarjuna,S. Chandra Nayaka,Tanushri Kaul,2022-09-15 This edited book highlights the gravity and efficacy of next generation breeding tools for the enhancement of stress resilience in cereals especially in the context of climate change pests diseases and abiotic stresses The content of the book helps in understanding the application of emerging genetic concepts and neoteric genomic approaches in cereal breeding It collates all the latest information about enhancing the stress resilience in cereal crops for overcoming food security issues Cereals have predominantly been used as a staple food since time immemorial and contribute more than 50% of the caloric requirement of the global population However in cereals the yield losses due to various stresses are very high considering the crop growth stage and stress sensitivity Therefore to feed and nourish the generations in the era of climate change it is imperative to develop stress resilient cereal cultivars This book explores newly developed next generation breeding tools viz genome wide association studies genomic prediction genome editing and accelerated generation advancement methodologies which revealed promising outcomes by enhancing the stress resilience in cereals with yield potential This book is useful for postgraduate students specializing in plant breeding plant stress physiology plant genomics agriculture and agronomy It is of immense value to scientific community involved in teaching research and extension activities related to cereal cultivation *Genetic Diversity in Plants* Mahmut Caliskan,2012-03-14 Genetic diversity is of fundamental importance in the continuity of a species as it provides the necessary adaptation to the prevailing biotic and abiotic environmental conditions and enables change in the genetic composition to cope with changes in the environment *Genetic Diversity in Plants* presents chapters revealing the magnitude of genetic variation existing in plant populations The increasing availability of PCR based molecular markers allows the detailed analyses and evaluation of genetic diversity in plants and also the detection of genes influencing economically important traits The purpose of the book is to provide a glimpse into the dynamic process of genetic variation by presenting the thoughts of scientists who are engaged in the generation of new ideas and techniques employed for the assessment of genetic diversity often from very different perspectives The book should prove useful to students researchers and experts in the area of conservation biology genetic diversity and molecular biology *Soil Mapping and Process Modeling for Sustainable Land Use Management* Paulo Pereira,Eric Brevik,Miriam Muñoz-Rojas,Bradley Miller,2017-03-13 *Soil Mapping and Process Modeling for Sustainable Land Use Management* is the first reference to address the use of soil mapping and modeling for sustainability from both a theoretical and practical perspective The use of more powerful statistical techniques are increasing the accuracy of maps and reducing error estimation and this text provides the information necessary to utilize the latest techniques as well as their importance for land use planning Providing practical examples to help illustrate the application of soil process modeling and

maps this reference is an essential tool for professionals and students in soil science and land management who want to bridge the gap between soil modeling and sustainable land use planning Offers both a theoretical and practical approach to soil mapping and its uses in land use management for sustainability Synthesizes the most up to date research on soil mapping techniques and applications Provides an interdisciplinary approach from experts worldwide working in soil mapping and land management

Nature in Focus Roger Sayre, Ellen Roca, Gina Sedaghatkish, Bruce Young, Shirley Keel, Roberto Roca, Stewart Sheppard, 1999-12 Rapid Ecological Assessment REA is a methodology developed by The Nature Conservancy to provide comprehensive and reliable information about biodiversity resources in situations where time and financial resources are limited REAs utilize a combination of remote sensed imagery reconnaissance overflights field data collection and spatial information visualization to generate useful information for conservation planning Nature in Focus is an in depth guide to the theory and practice of REAs offering a detailed approach for assessing biodiversity in a rapid and integrative manner It provides researchers with the essential tools and techniques they need to conduct an REA and offers valuable advice about the planning and implementation aspects The book presents an overview of the REA methodology and sampling framework reviews all aspects of an REA planning and management mapping and spatial information information management describes surveys of vegetation and fauna presents a generalized description of threat assessments explores the manner in which large amounts of data produced by different REA teams are integrated and synthesized into a cohesive set of management recommendations explains how the REA effort is documented published and disseminated offers a detailed REA case study Also included is a set of twelve color maps that describe the sequence of mapping activities in the case study REA along with other map examples from a range of REAs In addition to the case study appendixes offer a full set of REA field forms for sampling and a model Scope of Work that describes the nature of work to be conducted in an REA and outlines the roles and responsibilities of the participating organizations Nature in Focus presents the collective experience of more than ten years of REA field testing Conservation practitioners and biodiversity scientists who are involved with REA initiatives along with managers policymakers and others involved with conservation programs will find the book a useful and nontechnical guide to an essential element of successful conservation
