**Maps and Mirrors** Steve Martinot, 2001 *Maps and Mirrors* explores the links and gaps between the aesthetic and the political at the intersection of philosophy and literature Testing the major voices of aesthetic and literary theory it raises important questions about the implicit political contexts and commitments of thinkers from Kant to de Man Taken together the essays provide a tour of the complexities and richness of contemporary modes of critique

**Poetics of Singularity** Timothy Clark, 2019-06-01 This polemical book reveals the basic tenets of what may be called a poetics of singularity in Martin Heidegger Maurice Blanchot Jacques Derrida and the strange late essays of Hans Georg Gadamer At issue is the at first simple even familiar idea that literary or poetic meaning cannot be stated in terms other than its own that a text strives towards the status of being an example if of anything only of itself sole witness of what it alone projects This issue opens a series of powerful questions concerning basic features of Western thought about the nature of understanding on Kierkegaard's singular individual that is yet each human life in its exceptionality of the uniqueness of historical testimony the nature of community The Poetics of Singularity forms an ethically compelling alternative to the currently dominant cultural social studies paradigm in literary criticism a neo Darwinian understanding of art and life which is sometimes only a disguised version of American nationalism Features An original work of scholarship combining elucidation research and polemics Identifies a forceful tradition of twentieth century poetics which differs from received ideas of deconstruction which the author names the poetics of singularity Makes available in English some previously untranslated material in the chapters on Heidegger and Gadamer and covers relatively unknown texts by Blanchot and some very recent work by Derrida

**Feminist Activism and Digital Networks** Aristeia Fotopoulou, 2017-02-07 This book sheds new light on the way that in the last decade digital technologies have become inextricably linked to culture economy and politics and how they have transformed feminist and queer activism This exciting text critically analyses the contradictions tensions and often paradoxical aspects that characterize such politics both in relation to identity and to activist practice Aristeia Fotopoulou examines how activists make claims about rights online and how they negotiate access

connectivity openness and visibility in digital networks Through a triple focus on embodied media practices labour and imaginaries and across the themes of bodily autonomy pornography reproduction and queer social life she advocates a move away from understandings of digital media technologies as intrinsically exploitative or empowering By reinstating the media as constant material agents in the process of politicization Fotopoulou creates a powerful text that appeals to students and scholars of digital media gender and sexuality and readers interested in the role of media technologies in activism

**Writing the Body Politic** Mark Featherstone, Thomas Kemple, 2019-08-08 This book brings together key essays from the career of social theorist John O'Neill including his uncollected later writings focusing on embodiment to explore the different ways in which the body trope informs visions of familial economic personal and communal life Beginning with an exploration of O'Neill's work on the construction of the biobody and the ways in which corporeality is sutured into social systems through regimes of power and familial socialisation the book then moves to concentrate on O'Neill's career long studies of the productive body and the ways in which the working body is caught in and resists disciplinary systems that seek to rationalise natural functions and control social relations The third section considers O'Neill's concern with the ancient early modern and psychoanalytic sources of the post-modern libidinal body and a final section on the civic body focuses specifically on the ways in which principles of reciprocity and generosity exceed the capitalist individualist body of neo-liberal political theory The volume also includes an interview with O'Neill addressing many of the key themes of his work a biographical note with an autobiographical postscript a select bibliography of O'Neill's many publications and an extensive introduction by the editors A challenging and innovative collection *Writing the Body Politic* A John O'Neill Reader will appeal to critical social theorists and sociologists with interests in the work of one of sociology's great critical readers of classical and contemporary texts

*American Dolorologies* Simon Strick, 2014-02-19 *American Dolorologies* presents a theoretically sophisticated intervention into contemporary equations of subjectivity with trauma Simon Strick argues against a universalism of pain and instead foregrounds the intimate relations of

bodily affect with racial and gender politics In concise and original readings of medical debates abolitionist photography Enlightenment philosophy and contemporary representations of torture Strick shows the crucial function that evocations of bodies in pain serve in the politicization of differences This book provides a historical contextualization of contemporary ideas of suffering sympathy and compassion thus establishing an embodied genealogy of the pain that is at the heart of American democratic sentiment This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/1705>

**Tragedy and the Return of the Dead** John D Lyons, 2018-05-15 Early modernity rediscovered tragedy in the dramas and the theoretical writings of the ancient Greeks and Romans Attempting to make new tragic fictions writers like Shakespeare Webster Hardy Corneille and Racine created a dramatic form that would probably have been unrecognizable to the ancient Athenians Tragedy and the Return of the Dead recovers a model of the tragic that fits ancient tragedies early modern tragedies as well as contemporary narratives and films no longer called tragic but which perpetuate the same elements Authoritative wide ranging and thought provoking Tragedy and the Return of the Dead uncovers a set of interlocking plots of family violence that stretch from Greek antiquity up to the popular culture of today Casting aside the elite idealist view that tragedy manifests the conflict between two equal goods or the human struggle against the divine John D Lyons looks closely at tragedy's staging of gory and painful deaths ignominious burials and the haunting return of ghosts Through this adjusted lens *Le Cid* *Hamlet* *Frankenstein* *The Spanish Tragedy* *Romeo and Juliet* *Ph dre Macbeth* and other early modern works appear in a striking new light These works are at the center of a panorama that stretches from Aeschylus's *Agamemnon* to Hitchcock's *Psycho* and are placed against the background of the Gothic novel Freud's uncanny and Burke's sublime Lyons demonstrates how tragedy under other names such as Gothic fiction and thrillers is far from dead and continues as a vital part of popular culture

*Dark Writing* Paul Carter, 2008-10-31 We do not see empty figures and outlines we do not move in straight lines Everywhere we are surrounded by dapple the geometry of our embodied lives is curviform meandering bi pedal Our personal worlds are timed inter positional and contingent But nowhere in the language of cartography and design do these ordinary experiences appear This *Dark Writing* argues is a serious omission because they are designs on the world architects and colonizers use their lines to construct the places where we will live But the rectilinear streets squares and public spaces produced in this way leave out people and the entire environmental history of their coming together How this book asks can we explain the omission of bodies from maps and plans And how can we redraw the lines maps and plans use so that the qualitative world of shadows footprints comings and goings and occasions all essential qualities of places that incubate sociality can be registered In short *Dark Writing* asks why we represent the world as static when our experience of

it is mobile It traces this bias in Enlightenment cartography in inductive logic and in contemporary place design This is the negative critique Its positive argument is that when we look closely at these designs on the world we find traces of a repressed movement form Even the ideal lines of geometrical figures turn out to contain traces of earlier passages and there are many forms of graphic design that do engage with the dark environment that surrounds the light of reason How can this dark writing so important to reconfiguring our world as a place of meeting of co existence and sustaining diversity be represented And how therefore can our representations of the world embody more sensuously the mobile histories that have produced it Dark Writing answers these questions using case studies the exemplary case of the beginnings of the now world famous Papunya Tula Painting Movement Central Australia and three high profile public place making initiatives in which the author was involved as artist and thinker These case studies are nested inside historical chapters and philosophical discussions of the line and linear thinking that make Dark Writing both a highly personal book and a narrative with wide general appeal

*Gadamer* Donatella Di Cesare,2013-02-20 Hans Georg Gadamer 1900 2002 one of the towering figures of contemporary Continental philosophy is best known for Truth and Method where he elaborated the concept of philosophical hermeneutics a programmatic way to get to what we do when we engage in interpretation Donatella Di Cesare highlights the central place of Greek philosophy particularly Plato in Gadamer s work brings out differences between his thought and that of Heidegger and connects him with discussions and debates in pragmatism This is a sensitive and thoroughly readable philosophical portrait of one of the 20th century s most powerful thinkers

**Revealing Bodies** Erin Goss,2012 Revealing Bodies turns to the eighteenth century to ask a question with continuing relevance what kinds of knowledge condition our understanding of our own bodies Focusing on the tension between particularity and generality that inheres in intellectual discourse about the body Revealing Bodies explores the disconnection between the body understood as a general form available to knowledge and the body experienced as particularly one s own Erin Goss locates this division in contemporary bodily exhibits such as Gunther von Hagens Body Worlds and in eighteenth century anatomical discourse Her readings of the corporeal aesthetics of Edmund Burke s Philosophical Enquiry William Blake s cosmological depiction of the body s origin in such works as The First Book of Urizen and Mary Tighe s reflection on the relation between love and the soul in Psyche or The Legend of Love demonstrate that the idea of the body that grounds knowledge in an understanding of anatomy emerges not as fact but as fiction Ultimately Revealing Bodies describes how thinkers in the eighteenth and nineteenth centuries and bodily exhibitions in the twentieth and twenty first call upon allegorized figurations of the body to conceal the absence of any other available means to understand that which is uniquely our own our existence as bodies in the world

*Kant and the Human Sciences* A. Cohen,2009-10-22 This book provides the first sustained attempt to extract from Kant s writings on biology anthropology and history an account of the human sciences their underlying unity their presuppositions as well as their methodology that is to say Kant s philosophical and epistemological foundation of the human sciences
