## Maps Of The Ancient Sea Kings:

**Maps of the Ancient Sea Kings** Charles H. Hapgood, 1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century Hapgood believes that they mapped all the continents This would mean that the Americas were mapped thousands of years before Columbus Antarctica would have been mapped when its coasts were free of ice Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene Ice Age land bridge

**Maps of the Ancient Sea Kings** Charles H. Hapgood, 1979 **Maps of the Ancient Sea Kings** Charles H. Hapgood, 1966 Maps of the Ancient Sea Kings Charles Hutchins Hapgood, 1966 *Imagining Atlantis* Richard Ellis, 2012-01-11 Ever since Plato created the legend of the lost island of Atlantis it has maintained a uniquely strong grip on the human imagination For two and a half millennia the story of the city and its catastrophic downfall has inspired people from Francis Bacon to Jules Verne to Jacques Cousteau to speculate on the island's origins nature and location and sometimes even to search for its physical remains It has endured as a part of the mythology of many different cultures yet there is no indisputable evidence let alone proof that Atlantis ever existed What then accounts for its seemingly inexhaustible appeal Richard Ellis plunges into this rich topic investigating the roots of the legend and following its various manifestations into the present He begins with the story's origins Did it arise from a common prehistorical myth Was it a historical remnant of a lost city of pre-Columbians or ancient Egyptians Was Atlantis an extraterrestrial colony Ellis sifts through the scientific evidence marshaled to prove these theories and describes the mystical and spiritual significance that has accrued to them over the centuries He goes on to explore the possibility that the fable of Atlantis was inspired by a conflation of the high culture of Minoan Crete with the destruction wrought on the Aegean world by the cataclysmic eruption around 1500 b.c. of the volcanic island of Thera or Santorini A fascinating historical and archaeological detective story *Imagining Atlantis* is a valuable addition to the literature on this essential aspect of our mythohistory *Catastrophobia* Barbara Hand Clow, 2001-05-01 Bestselling author Barbara Hand Clow examines legendary cataclysms and shows how we are about to overcome the collective fear they have instilled in us The long-awaited follow-up that continues the revelations begun in *The Pleiadian Agenda* which has sold more than 60,000 copies Explains why contrary to many prophets of doom we are actually on the cusp of an era of incredible creative growth The recent discovery of the remains of ancient villages buried beneath the Black Sea is the latest instance of mounting evidence that many of the mythic catastrophes of history the fall of Atlantis the Biblical Flood were actual events In *Catastrophobia* Barbara Hand Clow shows that a series of cataclysmic disasters caused by a massive disturbance in the Earth's crust 11,500 years ago rocked the world and left humanity's collective psyche permanently scarred We are a wounded species and this unprocessed fear passed from

generation to generation is responsible for our constant expectations of apocalypse from Y2K to the famed end of the Mayan calendar in 2012. Catastrophobia reveals the insidious global forces that have used these collective fears to control humanity for thousands of years. But we are in the midst of a tremendous shift in the Earth's 26,000-year precessional cycle and there is every indication that the changes in consciousness over the last 30 years are the beginnings of a collective healing from these deep fears heralding a new age where we will see that the era of cataclysms is ending and a time of extraordinary creative activity is at hand.

**The Bloomsbury Handbook of the Philosophy of the Historical Sciences and Big History** Aviezer Tucker, David Cernín, 2025-08-21. This handbook examines the philosophy of the historical sciences and their synthesis in concepts like Big or Deep History. Written by interdisciplinary philosophers, historians, and scientists, it acts as a valuable guide for anybody interested in scientific knowledge of the deep past. Big History and the philosophy of science. The Bloomsbury Handbook of the Philosophy of the Historical Sciences and Big History is the first philosophical reference work to recognize that History is not what it used to be: the historical sciences, Deep History, Big History, and even the history of the Anthropocene have now expanded the scope of historiography beyond that of literate civilizations to cover all scientific inferences about the past from the Big Bang through the history of the planet and the history of life to the history of humanity. Different views about the scope of History have ontological, epistemic, methodological, explanatory, ethical, and educational reasons and implications. The historical sciences and the knowledge they have generated are founded on theories of knowledge of the past, epistemology of history. The contributions in this book consider whether there are common epistemic properties to all the historical sciences that distinguish them from non-historical or theoretical sciences. The first part of the handbook examines the recent expansion of the scope of the historical sciences in Big History, natural history, global history, and environmental history, and older, broader concepts of history like universal history and philosophy of history. The second part of the handbook addresses the ontology and epistemology of the past, including the basic concepts of the historical sciences such as origins, the end of history, determination and underdetermination, contingency and necessity, historical predictions and counterfactuals, and historical pseudoscience. The third part examines the philosophies of the special historical sciences: historical linguistics, textual criticism, geology, evolutionary biology, systematics, archaeology, cosmology, history of the environment, and most significantly, their integrations and combinations, for example, how genetics, archaeology, and historical linguistics have generated a whole new knowledge of deep human history. This collection offers an overview of what the philosophy of the historical sciences is and is becoming for students and experts alike.
