Maps of Time David Christian, 2004-02-23 An introduction to a new way of looking at history from a perspective that stretches from the beginning of time to the present day Maps of Time is world history on an unprecedented scale Beginning with the Big Bang David Christian views the interaction of the natural world with the more recent arrivals in flora and fauna including human beings Cosmology geology archeology and population and environmental studies all figure in David Christian's account which is an ambitious overview of the emerging field of Big History Maps of Time opens with the origins of the universe the stars and the galaxies the sun and the solar system including the earth and conducts readers through the evolution of the planet before human habitation It surveys the development of human society from the Paleolithic era through the transition to agriculture the emergence of cities and states and the birth of the modern industrial period right up to intimations of possible futures Sweeping in scope finely focused in its minute detail this riveting account of the known world from the inception of space time to the prospects of global warming lays the groundwork for world history and Big History true as never before to its name

Maps of Time David Christian, *Maps of Time* David Christian, 2004 An introduction to a new way of looking at history from a perspective that stretches from the beginning of time to the present day Maps of Time is world history on an unprecedented scale Beginning with the Big Bang David Christian views the interaction of the natural world with the more recent arrivals in flora and fauna including human beings

Teaching Big History Richard B. Simon, Mojgan Behmand, Thomas Burke, 2015 Big History is a new field on a grand scale it tells the story of the universe over time through a diverse range of disciplines that spans cosmology physics chemistry astronomy geology evolutionary biology anthropology and archaeology thereby reconciling traditional human history with environmental geography and natural history Weaving the myriad threads of evidence based human knowledge into a master narrative that stretches from the beginning of the universe to the present the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them Teaching Big History is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching Big History as well for sharing ideas about the subject and planning a curriculum around it Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History The book includes teaching materials examples and detailed sample exercises This book is also an engaging first hand account of how a group of professors built an entire Big History general education curriculum for first year students demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike

Globalization and Global Citizenship Irene Langran, Tammy Birk, 2016-06-10 Globalization and Global Citizenship examines the meaning and realities of global citizenship as a manifestation of recent trends in globalization In an interdisciplinary approach the chapters outline and

analyse the most significant dimensions of global citizenship including transnational historical and cultural variations in its practice foreign and domestic policy influences and its impact on personal identities The contributions ask and explore questions that are of immediate relevance for today's scholars including How does globalization in its current form present a new set of challenges for states non state actors and individual citizens How has globalization diminished expanded or complicated notions of citizenship What rights could exist outside the context of state sovereignty How can social accountability be imagined beyond the borders of towns cities or states What forms of political representational legitimacy could be productive on the global level When is it useful possible or desirable for individuals to identify with global political communities Drawing together a broad range of contributors and cutting edge research the volume offers chapters that seek to reflect the full spectrum of approaches and topics providing a valuable resource which highlights the value of an extended and thoughtful study of the idea and practice of global citizenship within a broader consideration of the processes of globalization It will be of great use to graduates and scholars of international relations sociology and global studies affairs as well as globalization

Talking Back to the Bible Edward G. Simmons, 2016-02-25 Talking Back to the Bible by Dr Edward G Simmons In a fascinating rumination Edward G Simmons combines a lifetime's experiences and biblical research in a voice that is as comfortable and welcoming as if one was seated in an easy chair in his study With his fierce intellect and honesty Simmons layers his philosophical lessons with personal insights and the latest discoveries of science The audience I hope will be anyone who enjoys studying the Bible and prefers seeking new and challenging insights rather than devotional rehashing of traditional messages Pastors scholars students and anyone in quest of spiritual insight through Bible study should find these conversations entertaining challenging and inspirational My hopes would be met if such readers found the insights presented here did indeed promote a stronger sense of relationship with God Edward G Simmons

Navigating Complexity in Big History David J. LePoire, Leonid Grinin, Andrey Korotayev, 2025-05-08 This book explores periodization in Big History against the background of complexity growth across the Universe on our planet and in biological social and cultural systems It traces the accelerating rise in complexity throughout history and the major historical transformations involved in the evolution of life humans and civilization It draws on concepts from physics and evolutionary biology to offer potential models of the underlying mechanisms driving this acceleration along with potential clues to how it might end In the editors introduction Chapter 1 the effort to periodize is placed within the historical context along with considerations from complexity science Subsequent chapters explore various aspects of periodization and complexity by a identifying symmetrical cosmic and biosocial trends b testing rigor and criteria for evaluating periodization c attempting to integrate different approaches through multiple perspectives d proposing different strategies for determining geometric patterns in terrestrial bio social evolution and e applying the traditional threshold model to gain insights into possible future pathways A concluding chapter identifies commonalities research gaps and possible approaches to integration as the current state of the

world system rapidly evolves while also offering a deeper understanding of complexity dynamics and historical processes Each chapter includes an extensive bibliography allowing a deeper and more detailed examination of the issues covered

21st-Century Narratives of World History R. Charles Weller, 2017-11-06 This book makes a unique and timely contribution to world global historical studies and related fields It places essential world historical frameworks by top scholars in the field today in clear direct relation to and conversation with one another offering them opportunity to enrich elucidate and at times challenge one another It thereby aims to 1 offer world historians opportunity to critically reflect upon and refine their essential interpretational frameworks 2 facilitate more effective and nuanced teaching and learning in and beyond the classroom 3 provide accessible world historical contexts for specialized areas of historical as well as other fields of research in the humanities social sciences and sciences and 4 promote comparative historiographical critique which helps identify continuing research questions for the field of world history in particular as well as b further global peace and dialogue in relation to varying views of our ever increasingly interconnected interdependent multicultural and globalized world and its shared though diverse and sometimes contested history *Cosmos & Culture* Steven J. Dick, Mark Lupisella, 2009 From GPO Bookstore s Website Authors with diverse backgrounds in science history anthropology and more consider culture in the context of the cosmos How does our knowledge of cosmic evolution affect terrestrial culture Conversely how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos Are life mind and culture of fundamental significance to the grand story of the cosmos that has generated its own self understanding through science rational reasoning and mathematics Book includes bibliographical references and an index [Global Brain Singularity](#) Cadell Last, 2020-07-30 This book introduces readers to global brain singularity through a logical meditation on the temporal dynamics of the universal process Global brain singularity is conceived of as a future metasystem of human civilization that represents a qualitatively higher coherence of order To better understand the potential of this phenomenon the book begins with an overview of universal history The focus then shifts to the structure of human systems and the notion that contemporary global civilization must mediate the emergence of a commons that will transform the future of politics economics and psychosocial life in general In this context the book presents our species as biocultural evolutionary agents attempting to create a novel and independent domain of technocultural evolution that affords us new levels of freedom Lastly the book underscores the internal depths of the present moment structured by a division between subject and object The

nature of the interaction between subject and object would appear to govern the mechanics of a spiritual process that is key to understanding the meaning of singularity inclusive of observers Given its scope the book will appeal to readers interested in systems approaches to the emerging world society especially historians philosophers and social scientists *Future Primal* Louis G. Herman,2013 To address global political unrest and ecological collapse political science professor Herman presents ways to incorporate the wisdom of the hunter gatherer culture of the San Bushmen of southern Africa into modern Western culture Kondratieff waves Brian J. L. Berry, Leonid E. Grinin, Andrey V. Korotayev, Philippe Jourdon, Lucas Bernard, Aleksandr V. Gevorkyan, Tom Palley, Willi Semmler, William R. Thompson, Arno Tausch, Denis J. Dean, Euel Elliott, Jonas Van Vossle, Peter Herrmann, Stephen I. Ternyik, Leo Nefiodow, Simone Nefiodow, Anton L. Grinin, Valentina M. Bondarenko, Nikolai D. Kondratieff, Barry K. Gills, Robert A. Denemark, 2015-05-29 In the period from the 1920s to 1930s the theory of economic cycles underwent dramatic changes Due to the research of such famous economists as Nikolay Kondratieff Joseph Kitchin Wesley Mitchell Simon Kuznets and Joseph Schumpeter the idea of a whole system of economic cycles with characteristic periods between two and sixty years was developed The idea of a system of intertwined economic cycles is nowadays paramount to the school of evolutionary economics and its development promises rather interesting future outcomes That is why this issue of our Kondratieff Waves Yearbook is devoted to the interconnections between various economic cycles As to the subtitle of this volume one should note that many of the contributors refer to the system of cycles and the fact that real economic cycles make up a system whereas among different types of cycles the Juglar Kuznets and Kondratieff cycles are the most important ones for the present day economic dynamics Although Kondratieff himself considered long waves as above all an economic phenomenon the theory of the long waves became however very actively developed in connection with their political and geopolitical aspects In this Yearbook the political aspect of Kondratieff waves is the subject of several articles in the second section The last section of this Yearbook is devoted to the heritage of Kondratieff and other prominent economists The year 2015 marks the 150th anniversary of the outstanding Russian economist one of the most prominent researchers of medium term economic cycles Mikhail Tugan Baranovsky and the volume is concluded with Kondratieff's article about him Concerning 2015 we should mention another anniversary namely 30 years since the death of Simon Kuznets 1901 1985 This edition will be useful for economists social scientists as well as for a wide range of those interested in the problems of the past present and future of global economy and globalization

Climate Change and the Course of Global History John L. Brooke, 2014-03-17 The first global study by a historian to fully integrate the earth system approach of the new climate science with the material history of humanity **To Explain It All** Chris Edwards, 2020-02-21 World history is not a subject it is all the subjects Because of this world history as a discipline has never fit well with the traditional definition of historical research H G Wells wrote the first true book of world history in 1920 and only a few authors have made the attempt to explain it all since Wells In that time world history has become the

chosen subject of polymaths and possesses the most potential to unite all of the fields of knowledge The subject of world history has developed several approaches with Big History being the most modern and flawed of its variants **The Routledge Companion to Big History** Craig Benjamin, Esther Quaedackers, David Baker, 2019-08-01 The Routledge Companion to Big History guides readers through the variety of themes and concepts that structure contemporary scholarship in the field of big history The volume is divided into five parts each representing current and evolving areas of interest to the community including big history's relationship to science social science the humanities and the future as well as teaching big history and little big histories Considering an ever expanding range of theoretical pedagogical and research topics the book addresses such questions as what is the relationship between big history and scientific research how are big historians working with philosophers and religious thinkers to help construct meaning how are leading theoreticians making sense of big history and its relationship to other creation narratives and paradigms what is little big history and how does big history impact on thinking about the future The book highlights the place of big history in historiographical traditions and the ways in which it can be used in education and public discourse across disciplines and at all levels A timely collection with contributions from leading proponents in the field it is the ideal guide for those wanting to engage with the theories and concepts behind big history *The History Manifesto* Joanna Guldi, David Armitage, 2014-10-02 A call to arms to historians and everyone interested in history in contemporary society This title is also available as Open Access *Architects of World History* Kenneth R.
