Subject Cataloging Division,Library of Congress. Office for Subject Cataloging Policy,2013 *Book Parts* Dennis Duncan,Adam Smyth,2019-06-27 What would an anatomy of the book look like There is the main text of course the file that the author proudly submits to their publisher But around this hemming it in on the page or enclosing it at the front and back of the book there are dozens of other texts page numbers and running heads copyright statements and errata lists each possessed of particular conventions each with their own lively histories To consider these paratexts recalling them from the margins letting them take centre stage is to be reminded that no book is the sole work of the author whose name appears on the cover rather every book is the sum of a series of collaborations It is to be reminded also that not everything is intended for us the readers There are sections that are solely directed at others binders librarians lawyers parts of the book that if they are working well are working discreetly like a theatrical prompt whispering out of the audience s ear shot *Book Parts* is a bold and imaginative intervention in the fast growing field of book history it pulls the book apart Over twenty two chapters *Book Parts* tells the story of the components of the book from title pages to endleaves from dust jackets to indexes and just about everything in between *Book Parts* covers a broad historical range that runs from the pre print era to the digital bringing together the expertise of some of the most exciting scholars working on book history today in order to shine a new light on these elements hiding in plain sight in the books we all read **The Book-lover** ,1902 Manuscript Albums and

their Cultural Contexts Janine Droese, Janina Karolewski, 2023-12-04 Manuscript albums are oftentimes contradictory objects ephemeral yet monumental coherent yet inviting change Collecting items made by others owners form their albums as representations of their selves their worlds and their traditions The volume s contributors who come from musicology European history English literary studies and Islamic art history explore a set of these challenging manuscripts while addressing questions of manuscript studies through their respective disciplinary lenses The albums under investigation range from Early Modern Stammb cher or alba amicorum to albums assembled jointly by nineteenth century cultural elites and from muraqqa s of the Persianate world to English and North American friendship albums including some kept by women This book is the first contribution to the comparative study of manuscript albums focusing on their materiality and analysing the practices of all those involved in making and using them Moreover the collection introduces this hard to grasp type of written artefact to the field of cross disciplinary manuscript studies and suggests albums as a touchstone for manuscriptological theories and terminologies
