How Do You Explain That? Danny Fourie, 2017-09-01 We know that the moon influences the tides but did you know that with the full moon you always see the same side of the moon Or that a yawn is contagious for humans and some animals And what precisely causes birds not to bump into one another when they fly in a swarm and they swerve These facts are part of a massive amount of knowledge about nature physics and space that the RSG programme Hoe verklaar jy dit has been sharing for 37 years This book translated from the original bestselling Afrikaans version contains a selection from the hundreds of questions curious listeners have been asking the experts to answer in order to make the world a little less strange because not all knowledge is obvious There are so many wonderful enigmas in nature and space that beg to be explained and we won't even mention man made inventions How Do You Explain That will pique your interest in the world around you It is a book that can be enjoyed on its own or can lie on the coffee table or can go camping with the family to elicit wonderful conversations around the campfire

Neyman Constance Reid, 2013-12-01 This book is the result of a suggestion made to me by Erich Lehmann of the Department of Statistics of the University of California at Berkeley Throughout the writing of it I have enjoyed his assistance and companionship and that of his wife Juliet Shaffer In the beginning writing about a man like Neyman who was alive and still very active I planned to limit myself to his recollections and records and to my personal observations of him during his eighty fifth year It soon became apparent however that I would need to supplement these with the recollections of his colleagues and former students With his consent I consulted them I am most grateful for the time and effort which so many people expended in talking and writing to me I would like to mention especially the assistance I received from Lucien Le Cam and Elizabeth Scott and the very friendly cooperation of Egon S Pearson Without the latter's careful preservation of Neyman's early letters I would have found it impossible to write in any detail of the years from 1926 to 1938 A number of libraries and archives also provided valuable material These included the Bancroft Library and the various administrative archives of the University of California the D M S Watson Library at University College the National Archives and the Rockefeller Foundation Archives The careful work of Kay Kewley who was responsible for the organization of the Neyman papers made my own work much easier
