20 Greatest Explorers of The World Kalyani Mookherji,2014-01-01 The urge to explore is an ancient one in the human species The earliest explorations were driven by physical needs like food and shelter But later with greater resources at their disposal human beings became curious about their extended geographical environment and began to venture further from their safe zone Over time mankind began to recognize that with successful exploration came rewards In fact access to virgin natural resources was one of the driving factors behind the Golden Age of Exploration during the 15th and 16th centuries when many significant discoveries were made about the geography of the Earth Again in the eighteenth and nineteenth centuries much of the exploration of Africa and Asia were driven by the need to discover and colonize new markets for goods made by European countries The *20 Greatest Explorers of the World* traces these currents in the journey of human exploration by focusing on the most famous explorers in history as well as some lesser known names who are nevertheless responsible for charting new territories Ranging from classical Greece to the mid twentieth century traversing all parts of the

globe and indeed beyond it these explorers are testament to the fact that the desire to know and discover has inspired humans across time and space in history

known Marco Polo 1254-1324 is an instantly recognizable name and he is known for his travels but it's safe to say that his influence and importance has been greatly overlooked in the nearly 700 years since he died. Born in Venice, Marco Polo was in a fortuitous position to participate in the Mediterranean trade but he was still a young man when he went on the journey that would make him famous and greatly inspire the Age of Exploration. Though he was destined to become famous, Marco Polo was simply following in the footsteps of his own family and it's believed that he was already a teenager before he met his father and uncle who had been traveling to the Far East and according to Marco Polo had met Kublai Khan, the famous grandson of Genghis Khan. A few years later they set off for Asia again, this time with Marco Polo, and they would not return to Venice for 24 years. When they came back, they had allegedly traveled about 15,000 miles and brought back plenty of riches and treasure. Marco Polo was hardly the only European merchant or trader who traveled to the Far East, but it was his written account of his travels that would generate extreme interest in Asia. Having described such a rich land full of desired resources, Marco Polo's travels became a source for European cartographers of the era and they became the impetus for men like Christopher Columbus who added his own annotations to Marco Polo's account and used it as a reference for his own legendary expedition in search of the Far East. Centuries later, historians have scoured over the account and what was written in an effort to validate its authenticity, leading to sharp debates today.
