Microcomputer And The Classroom Teacher:

Microcomputers and the Classroom Teacher Gail A. Caissy, 1987 This monograph for teachers addresses two emerging areas in the computing field providing inservice training in microcomputer use for the general teaching population and integrating the use of microcomputers into the overall curriculum A brief discussion of why computers should be used in the classroom introduces five chapters which provide overviews of the following topics 1 the use of computers in teaching and learning areas of computer use and using the computer as a teaching learning tool 2 types of software available for schools computer assisted instruction software applications software and databases 3 integrating computers into the classroom 4 developing a plan for using computers in the classroom setting up a classroom computer center and working with only one computer in the classroom and 5 evaluating educational software general questions questions about instructional design and questions about physical characteristics of the program A concluding statement argues that the key to continued growth and expansion in the educational computing field lies with classroom teachers and urges them to take an interest in computers and begin to use this important new tool in their classrooms A 71 item reference list concludes the document EW

Case Studies of Microcomputers in the Classroom John Olson, Sandra Eaton, 1986 Teachers participating in a 12 month study investigating teacher response to computer innovation in the classroom reported several factors as influential in determining how computers are incorporated into classroom routines the support they received private and public expectations for the teacher and the school ministry and board guidelines and the rather unique process of innovation in which the teachers themselves were involved Working with grades 4 to 10 in eight schools case studies were compiled that document in detail both how and why individual teachers use computers Although the schools chosen offered a wide range of computer applications e g using the computer for graphics for geographical simulations for special education for French immersion and for core French the studies fell into two distinct groups computers as part of a literacy program and use of computers as a teaching tool These two patterns of use differed in goals learning potential demands on the teacher pedagogy and curriculum implications Of the two computer literacy was the most problematic because of its newness and uncertain status as a subject DJR

Using a Microcomputer in the Classroom Gary G. Bitter, Ruth A. Camuse, Vicki L. Durbin, 1993 Addressing the role of computers in learning and the means of integrating and applying computer technology into the curriculum this text emphasizes all the important basic topics related to technology in education There is coverage of multimedia hypermedia designing lesson plans and how to evaluate and choose software all supported by numerous forms and charts
