Australian National Bibliography: 1992 National Library of Australia, 1988 **Australian National Bibliography**, 1995-05 **Reader's Guide to the Social Sciences** Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense **The Microeconomics Anti-Textbook** Rod Hill, Tony Myatt, 2021-12-02 Mainstream textbooks present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students **Australian Books in Print 1997** Bowker, 1997-03 excellent coverage essential to worldwide bibliographic coverage AMERICAN REFERENCE BOOKS ANNUAL This comprehensive reference provides current finding ordering information on more than 60 000 in print books published in or about Australia or written by Australian authors organized by title author keyword You ll also find brief profiles of more than 5 000 publishers distributors whose titles are represented as well as information on trade associations local agents of overseas publishers literary awards more **Essentials of Microeconomics** Bonnie Nguyen, Andrew Wait, 2024-01-31 Essentials of Microeconomics is an excellent introduction to microeconomics It presents the basic tools of microeconomics clearly and concisely It presents a vigorous treatment of all relevant introductory microeconomic concepts and emphasises on modern economics game theory and imperfect markets Each chapter is self contained and includes the required key mathematical skills at the start Now in its second edition this updated textbook includes Expanded lecturer resources including detailed lecture slides sample exam questions and updated test bank multiple choice questions An additional section on Economics in Practice focused on policy econometrics and behavioural economics This book is ideal not only for introductory microeconomics courses but its level of analysis also makes the book appropriate for introductory level economics taught at postgraduate level With the emphasis on strategy this text is also well suited for use in business economics courses **Agricultural and Resource Policy** David Godden, 2006 Why do governments make decisions How do governments make decisions What are the economic consequences of the decisions that governments make Agricultural and resource policy is more than just theory it is the application of economics to real world problems Agricultural and Resource Policy develops a framework for analysis and

investigates the issues that affect the sector internally and in interactions with the rest of the economy Agricultural and Resource Policy is an invaluable text for students of agriculture economics and business It is also an important reference for those interested in the continuing development of agricultural industry Resources in Education ,1993-07 Electricity Sector Reform in Developing Countries Tooraj Jamasb,2005 Driven by ideology economic reasoning and early success stories vast amounts of financial resources and effort have been spent on reforming infrastructure industries in developing countries It is therefore important to examine whether evidence supports the logic of reforms The authors review the empirical evidence on electricity reform in developing countries They find that country institutions and sector governance play an important role in the success and failure of reform And reforms also appear to have increased operating efficiency and expanded access to urban customers However the reforms have to a lesser degree passed on efficiency gains to customers tackled distributional effects and improved rural access Moreover some of the literature is not methodologically robust and on par with general development economics literature Further findings on some issues are limited and inconclusive while other important areas are yet to be addressed Until we know more implementation of reforms will be more based on ideology and economic theory rather than solid economic evidence World Bank web site *South Pacific Bibliography* ,1988
