Natural History Of Parrots Histoire Naturelle Des Perroquets:

The Natural History of Parrots Prideaux John Selby, 1836 **The Natural History of Edward Lear, New Edition** Robert McCracken Peck, 2021-04-13 Edward Lear is well known as the brilliant writer of nonsense poetry children's books and travel books who popularized the limerick and wrote verses such as *The Owl* and *The Pussycat*. But few people are aware that Lear was one of the most talented and accomplished painters of natural history subjects in the nineteenth century and worked with British scientists, collectors and publishers to make Britain the nexus for scientific investigation and its circulation. One of the best ornithological artists of his generation, Lear published his first book, a monograph on the parrot family, at age 18 and established a format that would be followed by decades by such publishers as John Gould, with whom he worked closely and often anonymously. Over his career, Lear produced a multitude of drawings of birds and mammals from around the world for scientific publications, public institutions and individual patrons, not just of English species but of birds and mammals from Australia, New Zealand and the Americas. He is also the Lear in the name of the rare species, Lear's Macaw. In this book, Peck has assembled the first comprehensive view of this important part of Lear's career. Featuring over 200 illustrations and a foreword by Sir David Attenborough, the book also examines the influence Lear had on modern artists such as Walton Ford and Tony Foster. This new edition includes a new chapter that addresses Lear's continued fascination with wildlife and the natural world after giving up his career as a scientific illustrator and his fascination with domestic pets from his own beloved cat, which he cartooned repeatedly, to the portraits of dogs owned by his family and friends, alongside thirteen never before published illustrations, including fully finished watercolors, rough preliminary sketches and whimsical cartoons.

This beautiful book takes a close look at parrots in Australia from the first published illustration of an Australian parrot, a Rainbow Lorikeet, collected live on Cook's 1770 voyage to William T Cooper's twentieth century watercolour of the elusive Night Parrot. With introductory essays by ornithologist Penny Olsen, *Flocks of Colour* covers two and a quarter centuries of discovery and illustration of Australia's avifauna. It features a rich portfolio of images of all the Australian parrots by various artists, including John Gould, Edward Lear, Neville W Cayley and William T Cooper, selected from the collections of the National Library of Australia. The foreword is by Joseph Forshaw, a world expert on the parrot family.
