**England Nature** David K. Leff, Eric D. Lehman, 2020-12-01 Since its founding four hundred years ago New England has been a vital source of nature writing Maybe it's the diversity of landscapes huddled so close together or the marriage of nature and culture in a relatively small six state region Maybe it's the regenerative powers of the ecosystem in a place of repeated exploitations Or maybe we have simply been thinking about our relationship with the natural world longer than everyone If all successive nature writing is a footnote to Henry David Thoreau then New England has a strong claim to being the birthplace of the genre But there are as the sixty entries in this anthology demonstrate many other regional voices that extol the wonders and beauty of the outdoors explore local ecology and call for environmental sustainability Between these covers Noah Webster calls for our stewardship of nature and Lydia Sigourney finds sublime pleasure in it Jonathan Edwards and Helen Keller both find miracles while Samuel Peters and Mark Twain find humor Author Nathaniel Hawthorne discovers a place to hide his metaphors while the enslaved James Mars discovers an actual hiding place Through it all is the apprehension of a profound and lasting splendor the glory of physical nature as W E B Dubois calls it something beyond our everyday concerns and yet tied so closely to our daily lives that we cannot escape it Nature writing cultivates our sense of beauty inflaming curiosity and the passion to explore It opens us to deep primal experiences that enrich life Anyone wanting to understand our relationship with the world must start here
